

The PAT46LW 15 15-ton Battery Tool

The BURNDY® PATRIOT® PAT46LW (Light weight) 15-ton battery actuated crimping tool has been designed and released to offer customers a light weight alternative to the existing PAT46 “C-head” design.

The PAT46LW series has been designed with a new forged “latching head” that offers a weight reduction of 34% over the existing PAT46 design. Additionally, this new series has been designed to accept all BURNDY® standard “P” and “U” style crimping dies (w/PUADP-1adapter).

The PAT46LW series offers customers the choice of ordering the tool with a 18V Makita Lithium Ion battery, 18V Makita Nickel Metal Hydride battery or ordering the tool kit less batteries and charger. Like all BURNDY® PATRIOT® battery tools, the PAT46LW series incorporates the latest engineering technology with a patented high

speed hydraulic pump and field proven electronics designed to provide a consistent, reliable connection every time.

Now, customers have a choice when it comes to selecting a 15-ton battery powered crimping tool - the ergonomic light weight of the PAT46LW series or the application ease offered by the PAT46 “C-head” design. In addition, they also have the choice of two (2) different 18V battery platforms (Li-Ion or Ni-MH).

Features and Benefits

New light weight design (Only 16.79 lb)

Limits the fatigue experienced with heavier tools

Offering 2 battery platforms Li-Ion, and Ni-MH

Allows for easy integration into customers existing battery platform

Refined Hydraulic System

Offers superior performance, speed ,and reliability

Field proven electronics

Provides ultimate reliability in the harshest environments

Single handed operation

Allows user to advance, retract, and hold with one arm

5-year limited warranty on tool; 1-year on batteries and charger
