

The new light weight 15-ton Y46LWBH Latch Head and Y46LWSBH C-Head remote operated crimping tools have been redesigned with new forged heads that offer a weight reduction of more than 10%. Additionally, these tools continue to accept all standard BURNDY® "P" & "U" style crimping dies (w/PUADP-1 adapter).

Now, customers have two light weight ergonomic choices when it comes to selecting a 15-ton remote operated crimping tool - the new Y46LWBH Latch Head and Y46LWSBH C-Head designs.

In addition, these tools are offered in variations with covered heads and female couplers.
