

BURNDY® announces expansion of UNIRAP™ Cable Tie Mounting Bases

Available two colors and with multiple mounting methods:
Acrylic or Rubber Adhesive, Screw Mounting, or a Combination

BURNDY®, a leading manufacturer and provider of connector solutions to the industrial, energy, construction, telecommunication, petrochemical, data center, and transportation industries, announces the expansion of our nylon mounting bases. Mounting bases are an effective, versatile, and durable wire management mounting product for routing and securing wires and cables in place. These mounting bases are easy to install and are available in a variety of styles to attach to the mounting surface. The mounting bases are square with rubber or acrylic adhesive, and/or 1, 2, or 4 screw holes for mounting depending on the design. Acrylic adhesive is recommended for applications requiring more adhesive strength and in high temperature environments. Additionally, acrylic adhesive bases are more durable and suitable for mounting on plastics and metals producing a secure bond between oily and/or contaminated surfaces. All the mounting bases are available in Natural or UV Black color.

Mounting bases are used in conjunction with cable ties to stabilize and secure wire bundles. The bases not only improve aesthetics, but are suitable for both indoor and outdoor applications. Mounting bases provide a quick, economical, and dependable solution for supporting, routing, and protecting wires or cables.

About BURNDY

Headquartered in Manchester, New Hampshire with 90 years of dedicated customer support in both service and product. Our customers need to look no further than BURNDY for all their connector, tool, and accessory needs. BURNDY is the only manufacturer to have the BURNDY® Engineered System of coordinating dies, connectors and tools. The three elements have been specifically designed to work together and engineered to meet stringent, accepted quality standards - allowing the user complete confidence in the integrity of the connection.
