

The BURNDY® PATRIOT® IN-LINE® tool platform has been redesigned to meet the growing market need for a smaller, lighter, and more ergonomic IN-LINE tool.

The PATMD-LW series weighs just 6.7 lbs. and is only 18.70" in height. This represents a 14% reduction in weight and an 11% overall length reduction compared to the current PATMD series; offering unrivalled ergonomics and comfort. Newly redesigned, robust jaws featuring proprietary locking tabs and a spring release pin, simplify the jaw change out process. An added layer of safety, as the jaws stay retained in the tool when the release pin is activated. The crimp jaws accept standard BURNDY® "W" and "X" style crimping dies.

Features and Benefits

Compact Size — Reduced weight and length; 14% lighter and 11% shorter for unmatched ergonomics and comfort

Robust Jaw Design — Improves tool balance and user experience

Scissor-Action Interchangeable Jaws — Simplifies the crimping and cutting processes

Locking Tabs — Retain the jaws in place when the change-out pin is released for quick jaw changeover and user safety

LED Worklight — Lights up the work area

350° Rotatable Head — Allows the tool to be used in multiple positions for hard to reach areas

Large Triggers and Hand Grip Area — Allows for easy operation and comfort while wearing work gloves

Trigger Lock Safety Switch — Prevents accidental operation of the tool

Manual Drain Trigger — Provides total control of the crimping process

Quick-Release Actuated Blade Guide — Automatically closes to isolate cables for easy positioning and guides the blades through the cutting cycle

Makita Battery and Charger — For long lasting power

Lifetime Warranty on INFINITY DRIVE® Transmission
