

# Aluminum Compression Pin Adaptors

AYP / AYPO Family now UL Listed with Copper Flex (fine strand)

**Do More with Less**

We are pleased to announce the launch of Phase 1 of 2 for the enhanced AYP / AYPO family of aluminum compression pin adaptors — now UL Listed for use with Copper Flex (fine strand) wire. This current phase of our product enhancement allows customers to use our standard AYP / AYPO aluminum pin adaptors to terminate Copper and Aluminum Code wire from #6 AWG - 750 kcmil and Copper Flexible wire from #8 AWG - 535 kcmil DLO. This will enable our end users to **“Do More with Less”** by minimizing the number of individual SKUs necessary to support the code and flex wire ranges accommodated.

The following catalog numbers are included in this current phase of product enhancement:

AYP6, AYP4, AYP2, AYP1, AYP1/0, AYPO2/0, AYPO3/0, AYPO4/0, AYP250, AYPO250, AYPO300, AYP350, AYPO350, AYPO400, AYP500, AYPO500, AYPO600, AYP750, and AYPO750.

This enhancement is a running change, so product markings may not be updated with the flexible wire sizes. Please reference any instruction sheets, sales drawings, or cutsheets on the BURNDY website for the latest information.

Keep a lookout for the next phase of this product enhancement, **early 2020**, featuring the AYPO1000.

The AYP / AYPO product family is **ONLY UL Listed using the BURNDY Engineered System**. Any other combination of tool and/or die NOT recommended by BURNDY will **VOID** the connection's UL Listing.
