

# On a Road Trip with The Grounding Superstore™

**It can get lonely up in the Alaskan oil fields.  
Just you, Mother Nature and a whole bunch  
of connectors.**

So BURNDY packed The Grounding Superstore™ into one of our demo fleet trucks and headed north—past Anchorage, up to Prudhoe Bay, over the famous “haul road” (Dalton Highway) and across one of Alaska’s ice roads.

Along the way, BURNDY salespeople—the first manufacturing representatives some customers had seen in years—gave demonstrations of BURNDY® mechanical grounding connectors, the HYGROUND® Irreversible Compression Grounding System as well as BURNDY’s complete line of compression tools and cutters. Seeing the products work in the Alaskan environment proved far more effective than any email or phone call!

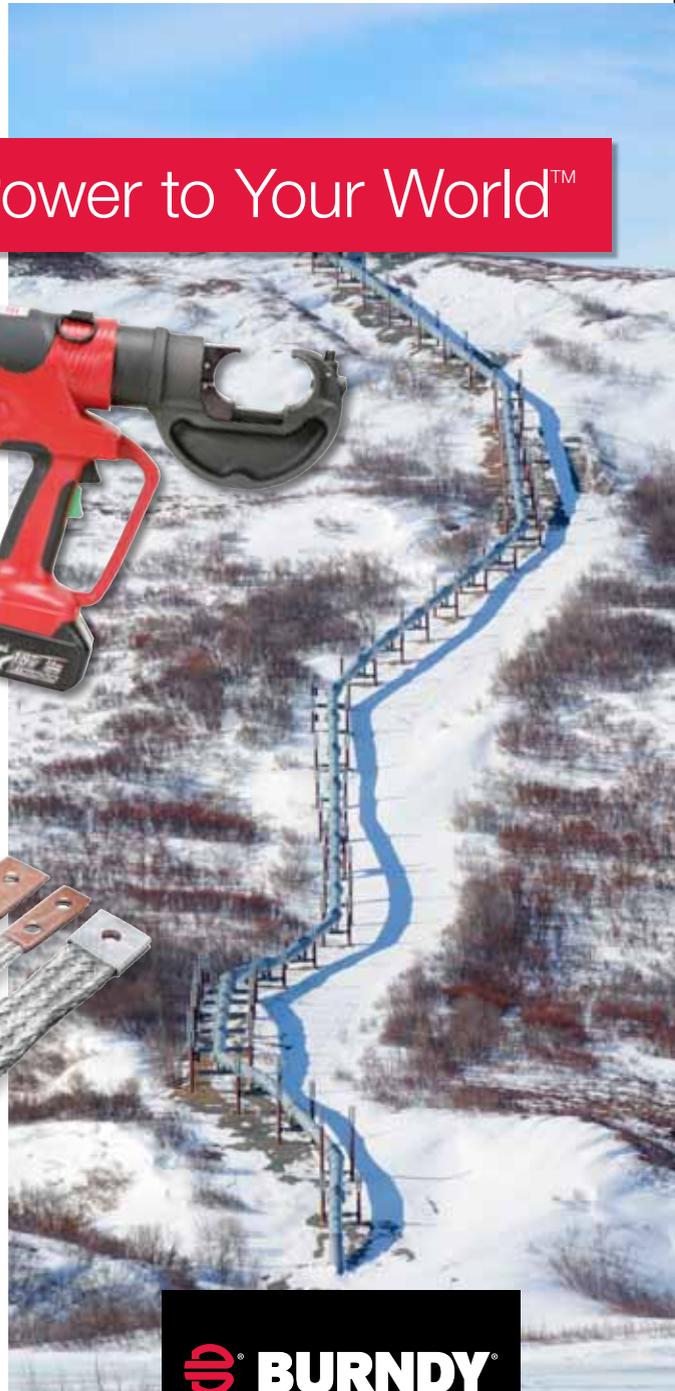

Where are you working today?
