Manchester, NH

For Immediate Release

BURNDY® announces the release of the Newly Redesigned PATRIOT® IN-LINE® PATMD-LW Light Weight Series of Tools

BURNDY®, a leading manufacturer and provider of compression connector solutions to the industrial, energy, construction, telecommunications, petrochemical, data center, and transportation industries, is pleased to introduce the newly redesigned BURNDY® PATRIOT® IN-LINE® series of tools to meet the growing market need for a smaller, lighter, and more ergonomic IN-LINE® tool platform.

The PATMD-LW series weighs just 6.7 lbs. and is only 18.70" in height. This represents a 14% reduction in weight and an 11% overall length reduction compared to the current PATMD series; offering unrivaled ergonomics and comfort. Newly redesigned, robust jaws featuring proprietary locking tabs and a spring release pin, simplify the jaw change out process. An added layer of safety, as the jaws stay retained in the tool when the release pin is activated. The crimp jaws accept standard BURNDY® "W" and "X" style crimping dies.

Features an enhanced safety trigger lock to avoid accidental actuation, perfect balance to reduce strain, preventing fatigue and injury, and now includes an integrated LED light to assist in dimly lit areas.

The PATMD-LW is powered by Makita Li-ion batteries for long-lasting power and will accept multiple Makita battery platforms (2.0Ah through 5.0Ah). It will be offered with a choice of either 3.0Ah or 5.0Ah batteries.

Compact Size - Better Balance - Robust Jaw Design

About BURNDY

Headquartered in Manchester, New Hampshire has over 90 years of dedicated customer support in both service and product.
