

Redesigned for Increased Speed, Torque, & Safety

Hydraulic Long Reach Pole Chain Saws

Features & Benefits

- **Light weight, narrow kerf 13" OREGON® bar with anti-kickback .325" pitch chain** - Meets the kickback performance requirements of ANSI B175.1-2012.
- **Utilizes a CHANCE® 1.25" diameter fiberglass extension tube** - Conforms to OSHA 1910 and features reinforced ends providing extra strength. The dielectric properties of the pole also help to reduce the risk of electrical shock when maintained properly.
- **For use in either open-center or closed-center hydraulic systems** - Changeover depending on hydraulic system in use is easy and quick.
- **Adjustable, automatic chain oiler** - Allows the operator to set the desired amount of chain lubricant.
- **Optimized limb hook and chip deflector** - Allow the operator to easily manipulate and maneuver branches and deflects wood chips away from the operator.
- **Pressure (inlet) port is standard #6 SAE and return port is a #8 SAE with an integrated ball check** - Larger return port helps to prevent overheating and back pressure and the ball check prevents backward operation.
- **Large handle with a 2-stage safety trigger and guard** - Safety feature that helps to prevent accidental operation of the tool.
- **Handle area is large enough to accommodate work gloves comfortably.**
- **Insulated grip handle** - Adds comfort and keeps the handle area cool.
