October 10, 2011

Dear Valued Customer:

BURNDY LLC has implemented an enhanced process for Global Safety Data Sheet Management to align with the Global Harmonized System (GHS) for Classification and Labeling of Chemicals. As you are aware, GHS is a United Nations program for the classification and labeling of hazardous goods. GHS introduces revised criteria for hazard classifications and new guidelines for Safety Data Sheets (SDS) product labels and transportation information.

Within the EU, the mandatory timescales for the implementation of GHS are from the 1<sup>st</sup> of December 2010 for single substances and from 1<sup>st</sup> June 2015 for mixtures. BURNDY LLC has taken a proactive approach and introduced revised Safety Data Sheets for the products falling within the scope of requiring an associated GHS SDS. The SDS supersedes their corresponding (former) MSDS under the same product name. These SDS have been posted on our website: [www.burndy.com](http://www.burndy.com) or a copy may be requested from our customer service team at: +1 800 346-4175.

BURNDY LLC continues to commit itself to Total Customer Satisfaction, so please contact us if you require any further information regarding the implementation of GHS.

Sincerely,  
Scott McDonald, Director Strategic Services  
BURNDY LLC
