TERMINATION ENCLOSURE OPTIONS

Add suffix:

- R - Reverse Stagger the Bus Bars (to run cable in from the top)
- CU - Copper NEMA Mount Bus Bars
- C - Plastisol Covers for Bus Bars
- DF - Dead Fronts
- T - Tin Plated Bus bars
- LI - Lay-In Bus Bars
- SS - Stainless Steel Cabinets
- G - Grounding Strap
WALL-MOUNTED TERMINATION ENCLOSURES

TYPE LWTE
Three-Phase, NEMA 3R (rain-proof), 600 Volt Rated

- Aluminum mechanical bar connector eliminates compression tools, lugs and bolt assemblies.
- Aluminum enclosure is lightweight, low maintenance and has excellent corrosion resistance.
- Ample working space, allowing for easier termination with a removable swinging door.
- All-welded construction: welds and seams are ground smooth.
- Manufactured to meet or exceed ANSI C57-12.28 for wall-mount equipment enclosure integrity.
- Three-point positive latch mechanism (secured with a captive and recessed penta-head bolt) and shielded padlock shackle.
- Finish meets or exceeds proposed EEI paint specification.
- Finish is gray, oven cured powder coat.
- All mounting hardware is 18-8 stainless steel.

PAD-MOUNTED TERMINATION ENCLOSURES

TYPE LPTE/LPLE
Three-Phase, NEMA 3R (rain-proof), 600 Volt Rated

- Aluminum mechanical bar connector eliminates compression tools, lugs and bolt assemblies.
- Aluminum enclosure is lightweight, low maintenance and has excellent corrosion resistance.
- All-welded construction: Welds and seams are ground smooth.
- Manufactured to meet or exceed ANSI C57-12.28 for pad-mount equipment enclosure integrity.
- Removable swinging doors - Doors have stainless steel lift off hinges with stainless steel three-point locking handles and recessed stainless steel penta-head bolts for security.
- Finish is Munsell green, oven cured powder coat.
- All mounting hardware is 18-8 stainless steel.
- Any pad mount enclosure can be made with a lift-off (removable) top. In order to designate this use “LPLE” instead of “LPTE”

Cover available not - U.L. listed TEC-34
TYPE LPTE/LPLE - LI

Three-Phase, NEMA 3R (rain-proof), 600 Volt Rated

- Aluminum enclosure is lightweight, low maintenance and has excellent corrosion resistance.
- All-welded construction: Welds and seams are ground smooth.
- Removable swinging doors - Doors have stainless steel lift off hinges with stainless steel three-point locking handles and recessed stainless steel penta-head bolts for security.
- Finish is Munsell green, oven cured powder coat.
- All mounting hardware is 18-8 stainless steel.
- Aluminum mechanical bar connector eliminates compression tools, lugs and bolt assemblies.
- Unique lay-in feature reduces frustration of feeding multiple conductors through standard connectors.
- Each outlet has a removable “keeper” that allows conductors to be laid into the outlet, solving the problem of trying to bend large conductors in confined areas. The “keeper” is then slid over the conductor and the set-screws are tightened. It is fast and easy at initial installations and for later service additions.
- Connectors are fabricated from 6061-T6 aluminum alloy for conductivity and strength.
- Fully tested to ANSI C119.4 for Class “A” connectors.
- Any pad mount enclosure can be made with a lift-off (removable) top. In order to designate this use “LPLE” instead of “LPTE”

D-Enclosures and Pedestals

LWSC-6NC0
ABOVE-GRADE PEDESTAL
WITH COVERED CONNECTORS

TYPE PA-200 / PF-300

- Standard Mussel green tint and ultraviolet stabilizer ensure an attractive and long-lasting pedestal. Add suffix “LG” for light willow green tint.
- Pedestal ribbing ensures in-ground stability where driven stakes are not used.
- Stainless steel penta-head lock assembly.
- Linear low-density polyethylene rotational molding process produces superior fit and finish, with high impact and tensile strength and a dielectric strength of 450 volts/mil.
- Incorporates unique molded connector brackets that support the mounted connectors.
- Clear, hard Lexan cover; clear or black plastisol cover available.
- Connector set-screws accept a 5/16” Allen wrench. Recommend 9” insulated Allen wrench.

Covers: Made of clear, hard lexan.
**PA-200**

- **Electric**
- **Ground Line**
- **Base Depth**

Dimensions:
- 15 9/16
- 17 1/2
- 17 3/4
- 38 3/8
- 15 1/2
- 17

**PF-300**

- **Electric**
- **Ground Line**
- **Base Depth**

Dimensions:
- 15 9/16
- 17 1/2
- 16 1/8
- 17 3/4
- 33
- 24 1/8
**FEATURES:**

- Linear low-density polyethylene with UV inhibitors (this is the same classification of polyethylene used as jacket for URD medium voltage cable).
- Excellent weathering characteristics.
- High environmental stress crack resistance.
- High tensile strength.
- High impact strength at low temperatures.
- Dielectric strength of 450 volts per mil.
- All external hardware 304 stainless steel.
- Standard Munsell green color identifies pedestal power.
- Alternate colors for special application include light green, gray, black, brown, tan and purple.

**OPTIONS AVAILABLE:**

- Connectors and insulating cover factory installed in pedestal.
- Stainless steel stake.
- Graphics: molded-in-engraved logo, name, etc. - colored surface applied vinyl warning and ID.
- Graphics: colored pre-mold and post molded custom graphics, all factory applied to customer specifications.
- All pedestal tops interchangeable size for PA200 and PF300.
- Temporary service power module for unmetered power will fit either PA200 or PF300 pedestal.

*Note: A complete copy of the polyethylene material specification is available upon request.*

The inert characteristics of polyethylene, the physical design of the pedestal and the design options, which CMC Utility Products has incorporated, make it the most versatile and still competitive pedestal choice available today.
**Features**

- Linear Low Density Polyethylene, rotational molded for consistent finish and dimensional tolerance MP635-661.
- UV stabilized for weathering performance, 1700 ppm Cytec 3346.
- Mechanical properties of materials listed below, provide for excellent field performance in all climatic conditions, with high strength values.
- Penta head bolt and padlock provision provided.
- Ribbed base provides superior rigidity and flexural strength.
- Available with connectors and covers installed as an option.
- Available with stainless steel stake as an option.
- Refer to drawings for specific dimensions and design geometry.
