

Area of Refuge

GAI-TRONICS® HUBBELL

Where do you go when there's an emergency?

An area of refuge (AOR) is a location in a building designed to hold occupants during a fire or other emergency, when evacuation may not be safe or possible. Occupants can wait in the safe area until rescued or relieved by first responders.

AREA OF REFUGE CODE REQUIREMENTS

- ✓ System to be comprised of remotely located Area of Refuge (AOR) stations and a central control point station
- ✓ Two-way communications between the AOR station and the control center station
- ✓ The AOR station should provide hands-free, two-way communications; provide a visible (LED) signal to indicate communication is in progress, and indicate the AOR station user's location to the control station
- ✓ Provide the control station with a visual and audible signal indicating a call has been placed
- ✓ Central control station should have a timed automatic communications dial-out capability (call rollover) to connect with a constantly monitored location (or 911) acceptable to the AHJ¹, where responsible personnel can initiate the appropriate response
- ✓ Provide appropriate identification and instructional signage.

COMMUNICATION SYSTEM SOLUTIONS

A **central control point station** for an Area of Refuge system can provide quick and reliable two-way audio and/or video* communications. Our HUBBCOM™ deskset is utilized as a control center while connected to an unlimited number of stations such as our remote, or flush-mount units to complete a system.

Reliability – Minimize Risk in a Crisis

- One-way multicast broadcast announcements
- One-way or two-way video*
- Incoming call stacking
- Call cannot be terminated by the remote station
- Intuitive design

* Dependent upon model

SIGNAGE SOLUTIONS

Dual Lite's SE Series offers bright and even LED illumination in an aluminum housing. UL Listed. AC or Emergency operation.

Special wording option also allows for customization of the stencil to convey important messages.
