Replacement Parts Kit

Model 12590-001 Extension Cable Assembly Upgrade

This kit is used on Model 10416-002 and 10416-003 Extension Cables to permit their use with Model 10401-201 Headsets.

Installation of New Connector:

1. Cut connector off the end of the extension cable. Cut cable flush to the back of the connector.
2. Trim back the insulation on the cable at least 1.5 inches. This cable must feed through the length of the connector included in the kit.
3. Trim back the insulation approximately 0.25 inches on the individual wires.
4. Remove the pin assembly from the new connector by turning set screw clockwise. This screw is a reverse screw and actually loosens the pin assembly by turning into the connector housing.
5. Loosen cable set screws on the connector by turning them counterclockwise: these screws do not need to be removed.
6. Insert extension cables through the smaller (grommet) end of the connector, through the housing body, and extend through to a workable distance.
7. Solder wire on to connector pins as indicated:
White - Pin 1;
Black - Pin 2;
Green - Pin 3;
Red - Pin 4.
8. Insert connector pin assembly into housing.
9. Turn pin assembly set screw counterclockwise until snug.
10. Turn cable set screws clockwise until snug.
