General Information

The Model 12587-103 ICS Subset to Page/Party® Amplifier Conversion Cable allows an ICS Page/Party® remote subset to be used with a standard Page/Party® remote amplifier. This conversion cable also allows the interface of ICS subset extension cables to Page/Party® remote amplifiers. The conversion cable is compatible between 7245 Series remote enclosure amplifiers and all ICS Page/Party® remote subsets.

The Model 12587-103 consists of an 8-foot, 24-conductor, PVC jacket cable with a DB25 connector on one end and 24-position connector on the other end.

The Model 12587-103 must ONLY be used in non-hazardous areas.

Installation

1. Arrange the cable so that the 24-position male connector is located at the remote amplifier enclosure or wall receptacle and the cable's DB25 female connector is located at the ICS remote subset. Plug the DB25 connector into the rear of the subset housing and secure the two screws.
