Field Installation Kit Instructions

Confidentiality Notice

This manual is provided solely as an operational, installation, and maintenance guide and contains sensitive business and technical information which is confidential and proprietary to GAI-Tronics. GAI-Tronics retains all intellectual property and other rights in or to the information contained herein, and such information may only be used in connection with the operation of your GAI-Tronics product or system. This manual may not be disclosed in any form, in whole or in part, directly or indirectly, to any third party.

Configuration

Configure ITA2000 as follows:

- Jumper JU2 must be in the B position for $\overline{\text{PTT}}$ (active low).
- SW1-1 in the DOWN position for logic level carrier detect method.
- SW1-2 in the UP position for active low logic level.
