Field Installation Kit Instructions

Confidentiality Notice

This manual is provided solely as an operational, installation, and maintenance guide and contains sensitive business and technical information that is confidential and proprietary to GAI-Tronics. GAI-Tronics retains all intellectual property and other rights in or to the information contained herein, and such information may only be used in connection with the operation of your GAI-Tronics product or system. This manual may not be disclosed in any form, in whole or in part, directly or indirectly, to any third party.

General Information

The Model XAC0120A External Speaker Kit provides the components necessary to install an external amplified speaker to a Model IPE2500A-MLS Desk Set (purchased separately). The external speaker will broadcast the unselect channels of the IPE2500A-MLS, allowing the desk set's integral speaker to broadcast only the select channel. This kit includes the following components:

Qty	Description
1	No. 13360-001 Amplified Speaker
1	Modular cable, 7-foot
1	No. 61531-052 Power Supply Cable Assembly
4	Adapters

Installation

Refer to Figure 1 on page 2.

1. Inside the IPE2500A-MLS Desk Set, **move the jumper JU816 to position 1 and 2**. Connect the leads of the 61531-052 cable assembly to terminal block J801, positions 17 and 18 (also inside the desk set). **Connect the silver wire to position 17 and the copper wire to position 18**.
2. Connect the 7-foot modular cable (provided with the No. 13360-001 Speaker) between the No. 13360-001 Amplified Speaker and the No. 21217-006 Connector.

NOTE 1: The plug-in power supply is configured for 120 V ac operation. Four different adapters are provided for connection to an international ac source. Slide the 120 V ac adapter out of the supply and insert the desired adapter for 230 V ac operation.

NOTE 2: See Pub. 43004-008, IPE2500A-MLS User and Installation Manual for operating instructions.
