LED blue strobe with constant-on and flashing operations; 12–24 V dc & 120 V ac

IP ALARM GENERATOR

Model
- GTC19001 IP Alarm Generator

EDUCATIONAL CAMPUS CASE STUDY

A university campus nestled over 2 miles in a rural Pennsylvania town requires communication devices for an existing mass-notification system that is controlled by a fire alarm system from another manufacturer. Also needed are push-button emergency phones that can alert campus security of any issues. The solution must be reliable and aesthetically pleasing to blend with campus design.

SOLUTIONS

On campus grounds, emergency towers were installed in key areas as well as emergency phones and constant-on LED blue strobes, resulting in increased campus safety. In the administration building HUBBCOM™ products are utilized.

PRODUCTS

- Emergency Towers (Model 234)
- Tower Broadcast Assembly (Model 234SBA)
- Solar/Cellular Towers
- Emergency Phones (Models 397 & 398 series)
- LED Constant-on Strobe (Model 540-001)

> *Students say they feel extremely safe and secure on campus.*
