**FOR IMMEDIATE RELEASE**

## **Acme Electric Introduces Premium DIN Rail Power Supplies**

**South Bend, Indiana** February 6, 2018 –Acme Electric has introduced a premium line of DIN rail mounted DC power supplies. These new products offer innovative solutions to an array of control applications. Acme Electric, part of Hubbell Commercial Construction, provides innovative electrical products to industrial, commercial and residential markets.

Acme's new DM Series DIN rail power supplies are designed to provide optimal performance with faster installation. Universal input increases application versatility. Single phase models address input voltage from 90-264V and three phase models address 340-575V automatically.

DM series models include output power from 20W to 480W and feature current output from 0.6A to 20A. Universal auto-ranging input simplifies applications. Adjustable output voltage compensates for voltage drop. The Acme design provides constant current with overload protection to ride through inrush. This prevents the nuisance tripping and unreliable operation of competing designs that operate in "hiccup mode."

Every DM series power supply is UL508 Listed. Each unit can operate at full rated power, making them cost effective. Other power supplies need to be derated to 50% for use in a UL508 compliant control cabinet. DM units are also CE compliant. Accessories include Hubbell branded surge protection devices and DIN rail mounted receptacles.

The Acme DM Series includes models with metal cases, slimline cases or plastic cases. The compact, rugged design of these units make for easy installation. All units are IP20 rated touch proof. Housings snap onto standard 35mm DIN rail without the use of tools. Pluggable connections make wiring a breeze. Visual indicators on the front of each unit include overload and DC output status.

The DM series comprises one of the broadest product ranges available for any application in the North American market. Applications include process control, material handling, packaging or welding control for a variety of industries. The products are backed by a three-year limited warranty.

Acme Electric DM series DIN Rail power supplies are available now. Find more information at [www.hubbell.com](http://www.hubbell.com). Follow the brand on [LinkedIn](#) and [Twitter](#).

**About Hubbell Commercial Construction**

-MORE-

Hubbell Commercial Construction includes five brands that provide innovative and cost-effective electrical products with superior customer service for commercial and/or residential markets. RACO creates electrical boxes, covers, and fittings. TayMac crafts “while in use” covers for outdoor electrical applications. Bell produces weatherproof boxes, covers and outdoor lighting. Wiegmann offers the most complete line of electrical enclosures for OEM, Commercial Construction, and MRO markets. Acme manufactures power conversion and conditioning equipment for industrial, commercial and OEM applications.

These historic brands are part of Hubbell Inc., one of the largest electrical manufacturers in North America. The company's history of innovation extends back to 1888. Founder Harvey Hubbell invented the pull chain light switch and duplex receptacle.
