

BELL® RaynGuard™ Extra Duty While-In-Use Metallic Covers

We are pleased to announce the introduction of the new Weatherproof product line of RaynGuard™ Extra Duty Metallic While-in-Use Covers. The new single and double gang Metallic While-in-Use covers will give BELL® Weatherproof a long awaited presence in the market.

The RaynGuard™ Extra Duty while-in-Use Covers are designed for use whenever protection is required while an outlet is in use. All RaynGuard™ covers meet or exceed the extra duty rating per UL 514D, and are NEMA 3R rated.

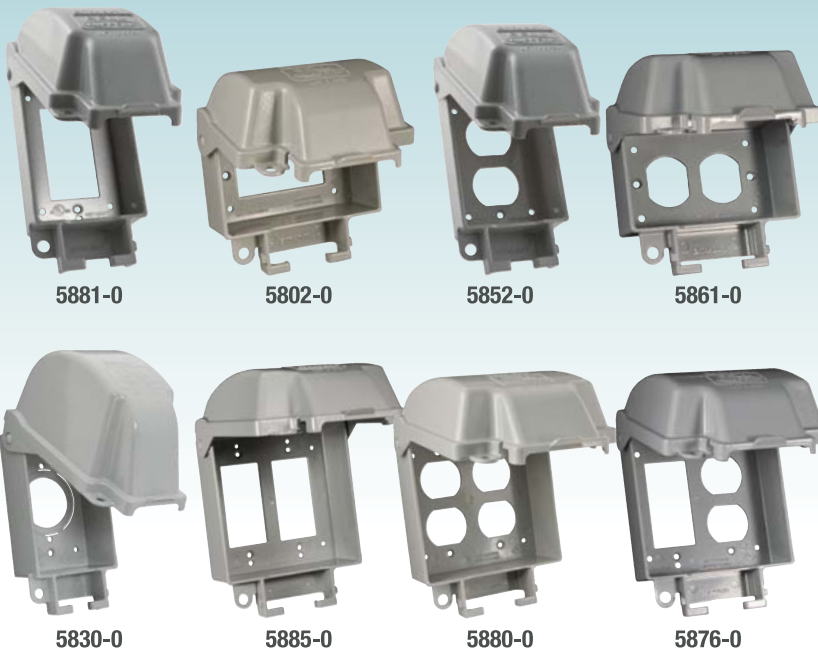

The commercial quality die cast aluminum construction that are powder coated provides for superior corrosion resistance. The unique lid design allows for larger plugs and provides more room for the bend radius of electrical cords. The added rain chamber gives extra protection from splashing and each side has a provision for holding cords so that cords will not pull out. The covers are contractor surveyed and preferred because they are specifically designed for each wiring application – No Plates to Assemble! These patent pending covers accept standard size padlocks and includes gasket and hardware.

Applications

The RaynGuard™ Extra Duty While-In-Use Covers are designed for use whenever protection is required while an outlet is in use.
