## **Bell Introduces Two New LED Swivel Floodlights**

**South Bend, Indiana** July 2, 2019 – Bell Outdoor introduces two new swivel floodlights for convenience and security. The LL1200 and LL800 series LED lights offer distinct options for floodlighting. Bell, part of Hubbell Commercial Construction, provides innovative electrical products to industrial, commercial and residential markets.

Bell's two new LED models are optimized for outdoor wet location use. The DLC Listed LL1200 is commercial grade, for use on 120/277Vac circuits. It features Bell's unique locking swivel joint for easy light adjustment. The 1200 lumen LED offers equivalent light to a 75W incandescent lamp while only using 13W. The 2700K warm white LED provides 50,000 hours of maintenance-free use.

The LL800 features a swivel ball joint for easy light adjustment. The 120Vac model includes an 800 lumen LED light source, equivalent to a 60W incandescent lamp that uses only 8W. This 2700K warm white LED also offers a 50,000 hour life.

Both Bell LED floodlights feature rugged die-cast aluminum construction with premium powder coat finishes. Available colors include white, bronze and gray. Diffused tempered glass lenses provide even light distribution. They are NEC and NEMA 3R compliant. Standard ½" NPT threads with 6" wire leads allow them to mount to Bell boxes, box covers or round cluster covers.

These new floodlights offer years of safety and convenience. They are ideal for landscape, architectural or security lighting in residential, commercial and light industrial applications.

Availability of the Bell LL1200 and LL800 series floodlights begins in August. Find more information at [www.hubbell.com](http://www.hubbell.com).

### **About Hubbell Commercial Construction**

Hubbell Commercial Construction includes five brands that provide innovative and cost-effective electrical products with superior customer service for commercial and/or residential markets. RACO creates electrical boxes, covers, and fittings. TayMac crafts "while in use" covers for outdoor electrical applications. Bell produces weatherproof boxes, covers and outdoor lighting. Wiegmann offers the most complete line of electrical enclosures for OEM, Commercial Construction, and MRO markets. Acme manufactures power conversion and conditioning equipment for industrial, commercial and OEM applications.

These historic brands are part of Hubbell Incorporated, one of the largest electrical manufacturers in North America. The company's history of innovation extends back to 1889. Founder Harvey Hubbell invented the pull chain light switch and duplex receptacle.
