The Next Generation in Charging Technology

Charges a Wide Variety of Personal Mobile Devices

Great for Use in a Wide Variety of Applications

More Ways to Charge Faster with 5 Amp Devices

USB Charging Receptacles Type-C • Type A&C • Type A

Bryant USB Chargers are available in the new Type-C port, a combination unit with Type A and C, and the legacy Type A, all with more power. The increase in power to a 5 Amp, 5 Volt USB port adds capacity so that there is always ample current to support multiple device charging. Portable mobile device manufacturers recently announced products using the faster Type-C ports. More phones, tablets and other electronic devices are expected to use this new standard.

The USB Charger delivers USB power eliminating the need for adapters, while maintaining electrical outlets for higher current requirements. The new USB standard Type-C port supports faster mobile device charging. Bryant offers more charging options with Type-C and Type A USB configurations.

Features

- Compliant with USB BC1.2 Battery Charging and 3.0 Power delivery. Compatible with USB 2.0, 3.0 and 3.1 devices.
- USB Type-C port is legacy USB Type A compatible (with adapter cord - not included).
- Heavy duty stainless steel USB ports; rated for 10,000 cord insertions and removals.
- Patented Bryant Tamper-Resistant technology uses cam action shutters. When two plug blades are inserted the interlocked cams slide an insulating barrier out of the way. The friction-free design of the mechanism doors requires much less force, allowing the plug to slide in effortlessly.
- Designed for commercial, industrial and home use.

Metal PlugTrak® with USB Charger Outlets

Bryant PlugTrak® with USB Charger Outlets makes portable power and USB charging available and accessible. PlugTrak can be mounted on walls, under raised floors, over ceilings, or under cabinets making it perfect for both residential and commercial environments. Featuring tamper-resistant electrical wiring receptacles and USB outlets, PlugTrak® provides a quick and convenient place to charge.

Features

- 2.4 Amp, 5 Volt DC USB type 2.0 ports
- 15 Amp, 125 Volt AC tamper-resistant receptacles
- Three and six foot configurations
- cULus listed to UL5 Steel, UL1363 Portable Plug-in, and UL1310
- Green LED indicators light up to show USB power is available
- USB stainless steel ports rated for minimum 10,000 insertions and removals
- Complies with battery charging specification BC1.2
- Compatible with USB 1.1/2.0/3.0 devices
