The family of Hubbell SystemOne floorboxes has been expanded to provide industry leading flexibility while accommodating an extensive range of applications. Hubbell SystemOne is constructed to give customers the ability to create personal solutions for their most demanding, power, data and AV requirements.

## Hubbell SystemOne Recessed Floor Box Applications

### 2-Gang Recessed

The Hubbell SystemOne 2-gang recessed concrete floor box offers eight styles, satisfying the requirements of almost any commercial building application. Rectangular or round covers, as well as furniture feed covers, are available in a variety of finishes to blend with any existing or new décor. A parallel-device layout reduces plug interference, maximizing functionality and performance.

### 4-Gang Recessed

Similar to the 2-gang Recessed Concrete Floor Box, Hubbell's SystemOne 4-gang recessed concrete floor box is available with rectangular or round covers. Ten different styles make it possible to meet the electrical requirements of most commercial projects—new construction or renovation. The parallel device layout maximizes functionality which can be limited when devices are mounted 90° from one another.

### 6-Gang Recessed

Increased power, data, and AV capacity is what the Hubbell SystemOne 6-gang recessed concrete floor box was designed to handle. Four styles allow the floor box to work within almost any commercial application to enhance connectivity. Rectangular and round covers are available in a variety of finishes that work with any aesthetic or finish.

### 10-Gang Recessed

With maximum capacity in a small footprint, the 10-gang box provides a uniform look with rectangular or round covers that are available in several finishes to complement existing décor. Electrical devices are mounted vertically and are mounted to the plate prior to securing it to the box. Two inch knockouts are designed into each box allowing for simple installation of AV cables with pre-connectorized heads and specific bend radius requirements.

### Cover

- 180° cover opening
- Two large cable egress doors
- Listed to UL 514A and UL scrub water compliant
- Die cast aluminum cover construction
- Available in round, rectangular and furniture feed styles
- All covers are ADA compliant
- Post pour adjustment

### Box

- 16 gauge galvanized sheet metal and cast iron construction
- Optional fusion-bonded, green epoxy paint for on-grade use
- 6" solid conductor ground pigtail in each gang
- 3" deep version accepts adapter (CFBHUB2) for 2" conduit
- Pre pour adjustment
- Meets UL 514A requirements and are UL scrub water compliant
- Patent pending, labor saving, easy mount device plates

*CR version is coated with fusion-bonded epoxy paint to help prevent corrosion and intended for on-grade use.*

## The Family Look

Hubbell SystemOne recessed floor box line offers a common look regardless of capacity or installation. This simple concept ensures a consistent look throughout a building with rectangular or round covers. Round covers lend themselves to multi-story buildings, also using fire-rated poke-through devices.

### A | Covers

All SystemOne covers are ADA compliant. The doors open to 180° for maximum access. Cables and plugs are protected by recessed connections.

### C | Easy Mount Device Plates

The Easy Mount device plates allow for a device to be mounted to the plate and wired outside of the floor box. The device and plate assembly are then easily installed and secured with one stud that locates the plate and one screw to secure it.

This patent pending device fastening method maximizes efficiency while reducing install time and comes standard with all device plates for 2-, 4- and 6-gang boxes.

### B | One Screw, Three Fasteners

Pre-wired duplex or Style Line® receptacles with 8" stranded leads are installed into plates to allow for even more labor savings.

To assist with the floor box selection process, please have the following information available:

Electrical Requirements	Application	Cover Style
Power (each electrical device requires one gang) Data/AV (consult manufacturers' specification for size/volume requirements), number required  Add up total number to determine needed capacity. If necessary capacity is not shown, round up to next size. Example: 9-gang rounds up to a 10-gang floor box	Above-grade (AG) On-grade (OG)  Minimum concrete pour depth	Round Rectangular

Once this information is gathered, start with Capacity below:

- 1 Capacity: select necessary box
- 2 Application: select the concrete pour depth and on-grade or above-grade application
- 3 Cover style: select round or rectangular cover
- 4 Locate intersecting point of all three categories and move to right to select the appropriate catalog number

## Benefits and Enhancements

### Safety

- Flush flange available for tile, finished concrete or terrazzo
- Surface flange available for carpeted floors with 0.15in rise meets ADA requirements
- Hideaway egress doors fold under cover while in use
- 180° opening of main door

### Functionality

- Cables and connections are protected by recessed functionality
- Open architecture sub-plate design
- Common door layout regardless of flange for harmonized look
- Meets UL 514A scrub water requirements with ScrubShield® technology
- Easy selection with common look for all floor types

### Value

- Enhance building décor with numerous finishes
- Increase durability and longevity with cast aluminum covers

### Online Resources

## Concrete Pour Pocket Cap

This factory-installed, field-removable pour pocket cap provides a pocket in the final floor to accept the covers intended for terrazzo, tile, or finished concrete floor. The cap may not be used for carpet, wood or engineered floors.

## 2" Conduit Ready

To meet expanding AV and data needs, the Hubbell SystemOne Recessed Floor Box line readily accepts 2" conduits with the use of a 2" threaded conduit hub. The offset design allows for less conduit lifting while threading and the hub mounting holes are asymmetrical for installation efficiency.

## Corrosion Resistant Epoxy Paint

Intended for on-grade use, the CR version is coated with fusion-bonded epoxy paint to help prevent corrosion.

## Pre-Wired 2X2 USB Work Surface Pop-Up Box

Hubbell's UL listed 2X2 USB Work Surface Pop-Up Box is ideal for work surfaces, such as desks, which require power for a computer and USB charging for smart devices. Developed in coordination with the hotel industry, the Hubbell Pop-Up Box utilizes a pneumatic spring for providing a smooth action for opening and closing. Available in brushed aluminum or black powder coat, the Pop-Up Box is suited for installation with any modern décor.

Installation is simple and only requires a jig-saw or similar saw plus a screwdriver. The unit is supplied with a 5 foot cord with a molded plug end allowing it to be installed with ease. Designed to be installed into existing desks or by furniture manufactures. The Hubbell 2X2 USB Work Surface Pop-Up Box is ideally suited for any work surface application.

Charging convenience at the push of a button

## Recommended Fire-Rated Poke-Through Size Chart

To avoid over or under utilizing the capacity of the fire-rated poke-through, first determine how many gangs of power, data and AV are required for the application. The matrix below will guide you to the correct poke-through size.

		Recommended Fire-Rated Poke-Through Size					
POWER GANGS	5	8"	Exceeds capacity				
	4	8"	8"	of Hubbell recessed			
	3	6"	8"	8"	poke-throughs		
	2	6"	6"	8"	8"		
	1	4"	6"	6"	8"	8"	
	0	-	4"	6"	8"	8"	8"
		0	1	2	3	4	5
		DATA AND AV GANGS					

Example: 2 gangs of power, 1 gang of AV and 1 gang of data is required.  
 Find the intersection for 2 power gangs with 2 data/AV gangs.  
 The highlighted intersection defines the recommended FRPT.
