

It pays to have good connections

WORK FROM HOME Connectivity Kits

Working remotely from home is on the rise. The real-time communication applications utilized for remote working are not tolerant of the inherent lag of a shared Wi-Fi connection. Hubbell has put together a pair of connectivity kits that make upgrading home connections more convenient than ever. Set up direct hardwired links or move wireless access points closer to the end device for improved speed and reliability with Hubbell's Work From Home Kits.
