

MISSION CRITICAL®

Warranty Program

GETTING STARTED

Contact your Hubbell Premise Wiring representative to guide you through the system design process.

Select genuine Hubbell Premise Wiring cable, connecting hardware, components and accessories.

Install the structured cabling system using the services of a valid and current Hubbell Certified Installer (CI).

SMART BUILDINGS

Hubbell Premise Wiring MISSION CRITICAL® structured cabling solutions are designed to support new data-driven Ethernet applications. This new innovative, intelligent, energy-saving, sustainable technology is commonly referred to as the "Internet of Things" (IoT).

Examples are sensor driven outcomes, Power of Ethernet (PoE), security, audio/video, lighting control, energy monitoring, building wellness and more.

Hubbell offers a broad range of industry-leading product solutions for every aspect of network connectivity and supportive infrastructure. We have earned our reputation as an industry leader by developing high-performance cabling systems and ultra-reliable components. Our product offering is continually evolving to deliver advanced performance and installation efficiency. Hubbell's structured cabling products are designed to exceed current applicable standards to assure confidence in your selection of products for your network physical layer connectivity. Hubbell cabling systems provide the confidence of third-party component performance verification, along with the full 25-year MISSION CRITICAL® system warranty.

- Hubbell Premise Wiring is committed to a tradition of excellence, delivering quality, innovation and longstanding reliability.
- The Hubbell MISSION CRITICAL® program provides building owners and operators the assurance of structured cabling system success with a 25-year guarantee on the component performance and installation integrity.
- Hubbell structured cabling solutions offer a fully integrated system of copper and fiber optic network cabling and components designed to exceed all applicable standards for performance and reliability.

Compliance to standards also applies to Hubbell MISSION CRITICAL® objectives. Mission Critical is defined as the delivery of long-term, uninterrupted service at stated performance levels.

Adherence to network industry standards offers the following advantages:

- Interoperability of connecting hardware components
- Backward compatibility
- Open system architecture
- Ease of migration to new performance levels

This is the philosophy of the Hubbell 25-year MISSION CRITICAL warranty program.
