

# TRAINING PROGRAMS

for Cabling Professionals

## RECENT COURSES

**Cabling 101** A course for non-professionals and those new to creating networks

**Installation Best Practices** Installer's minimum requirements

**Standards Update** Keeping abreast with technology

**Solutions Update** Introduction to the latest and greatest innovations from Hubbell Premise Wiring

**Grounding and Bonding** Safety and equipment protection are the most important aspects of a cabling project

**Fiber Optic Fundamentals** Understanding basic fiber optics technology

**Fiber Optic Parallel Transmission** Understanding parallel optics for faster, more efficient networks

**Wireless Wi-Fi 6/6A** Mobility is the fastest growing segment of network connectivity

**Passive Optical LAN (POL)** Learn how fiber optics is used to reduce network CapEx and OpEx

Network speed is approaching a terabit per second and is demanding for more complex network cabling systems. Copper, optical fiber, and wireless mediums are now combined to create the modern robust intelligent building. It is difficult to stay abreast with these multiple technologies, new unique designs, and advanced installation techniques that change so quickly.

Hubbell Premise Wiring is here to help. Hubbell has a long tradition of keeping structured cabling professionals trained. Our experience begins with our long-term sponsorship of the BICSI Cabling Skills Challenge. It also encompasses group and one-on-one training with communication installers, technicians, Registered Communication Distribution Designers (RCDD), architects, IT professionals, consultants and major corporation stakeholders.

- Hubbell Premise Wiring is committed to a tradition of excellence, delivering quality, innovation, longstanding reliability and superior network protection for our customers.
- The Hubbell MISSION CRITICAL<sup>®</sup> Certified Installer is a key component of the program.
- The Hubbell MISSION CRITICAL<sup>®</sup> program provides customers the assurance of system success with a 25-year warranty on the component performance and installation integrity of the structured cabling system.

Hubbell training information is available in various forms:

- Corporate/industry courses recognized for BICSI Continuing Education Credits
- In-house, interactive workshops
- Live, online training
- Literature detailing installation procedures and guidelines
- Installation videos
- In-house technical support

We believe shared knowledge benefits the entire industry and we would be honored to become part of your network visioning team. Contact your Hubbell Premise Wiring representative for more details or call (800) 626-0005.
