

CERTIFIED INSTALLER

Program for MISSION CRITICAL®

GETTING STARTED

Contact your Hubbell Premise Wiring representative to guide you through the Certified Installer Process.

Complete the Certified Installer questionnaire.

Sign the Mission Critical® agreement.

Participate in, and make personnel available for, Hubbell Certified Installer training.

Provide the names of BICSI RCDDs and LAN Specialists on your staff.

Register projects in accordance with the Hubbell Mission Critical warranty.

Install genuine Hubbell products in accordance with TIA standards, BICSI guidelines and Hubbell instructions.

Upload link, channel and fiber optic test results via the Certified Installer portal.

Initiate the Mission Critical Warranty request for our mutual customer.

Hubbell structured cabling solutions offer a fully integrated system of copper, fiber optic and wireless network cabling and components designed to exceed all applicable standards for performance and reliability. Mission Critical® Certified Installers assist customers desiring Hubbell Mission Critical warranty on their structured cabling systems.

Cabling installers interested in the Hubbell Certified Installer designation should contact their local Hubbell Premise Wiring sales representatives to self-nominate.

Hubbell will promote the Certified Installer and Mission Critical Warranty programs to end-users, building owners and operators. Their message reinforces the Hubbell Mission Critical warranty requiring the Certified Installer meet the most current industry installation performance standards and safety guidelines.

- Hubbell Premise Wiring is committed to a tradition of excellence, delivering quality, innovation, longstanding reliability and superior network protection for our customers.
- The Hubbell MISSION CRITICAL® Certified Installer is a key component of the program.
- The Hubbell MISSION CRITICAL® program provides customers the assurance of system success with a 25-year warranty on the component performance and installation integrity of the structured cabling system.

Hubbell Premise Wiring is committed to providing our Certified Installers with industry-leading products and system performance. In addition, we will provide:

- Training programs eligible for BICSI Continuing Education Credits (CECs)
- Installation procedures and guidelines
- Periodic standards updates
- In-house technical support
- Online technical information
- Sales growth incentives

The Hubbell Certified Installer portal is available for registering projects, uploading certification test results, downloading system performance reports, and initiating Mission Critical Warranty requests.
