Hinged Mud Rings

For Faster Rough-In Electrical Work

RACO Hinged Mud Rings speed up installation while ensuring that devices mount flush to the wall surface. The hinged design allows switches and outlets to be attached to the ring first, which then swings out of the way for wiring. This frees up both hands for the installer. Design also allows the ring to mount to the 4" square box without removing screws. Maintains code-compliant installations.

Application

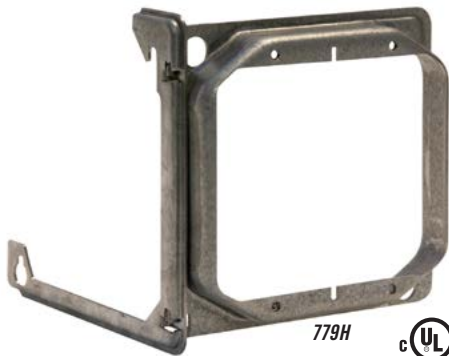

Perfect for boxes mounted behind drywall or ceramic tile in commercial or residential applications.
