Application

Jumbo wallplates are a half inch larger to cover electrical installation imperfections. Metal construction provides enhanced durability and appearance, compared to plastic wallplates. Attractive brushed nickel finish coordinates with contemporary aesthetics. For use in residential, commercial or industrial settings.

Features

- Elegant satin brushed nickel finish
- Jumbo size 5.5 (inch height) easily hides excessive paint edge buildup from years of paint over
- Will not crack, peel or discolor over time
- Will not bow or distort during installation
- Includes mounting screw(s) in matching finish
