## **TayMac Introduces Weatherproof Deck Outlet Cover**

**South Bend, Indiana** December 3, 2019 – TayMac introduces a new weatherproof electrical outlet cover designed for use on residential decks. The unique low-profile product provides an effective solution for adding power to decks for outdoor lifestyles. TayMac, part of Hubbell Commercial Construction, provides innovative electrical products to industrial, commercial and residential markets.

The TayMac DOC320 Deck Outlet Cover provides a safe and code-compliant way to add an electrical outlet to a raised deck floor. Power can be placed where consumers will avoid long intrusive extension cords, which pose tripping hazards. Part of the Outdoor Comforts™ line, this weatherproof electrical cover is designed to enhance outdoor living spaces with the same convenience and comfort as indoors.

The Deck Outlet Cover features a low profile with a textured finish and beveled edge to meet ADA guidelines, reducing the chances of a trip or fall. A wide-opening, easy-access lid covers a 2-3/4" recessed space. The large space inside accepts larger cords and plugs. The robust design is constructed of heavy duty PVC.

A rain chamber and "drip loop" design, along with wide drip holes provide two levels of drip protection while in-use. Any water that travels along the cord to get inside will drip away without reaching the electrical device. Cord hooks hold cords in place below the lid, to ensure that it closes tight. A pre-attached weatherproof gasket keeps water from entering around the edge of the self-closing lid.

The DOC320 Deck Outlet Cover is UL, NEC and NEMA 3R compliant. It comes preconfigured for a 1-gang duplex outlet. A breakout adaptor allows decorator style or GFCI devices to be used. Outlet devices and weatherproof box are not included.

TayMac's new Deck Outlet Cover provides a cost-effective solution to upgrade any outdoor raised deck with electrical power for today's outdoor living. It protects electrical outlets that may be exposed to water spray, rain or snow. Suitable for use with lights, fans, and electric appliances. Applications include residential decks constructed of any material, such as wood, engineered composites or aluminum.

Availability of the TayMac DOC320 Deck Outlet Cover begins December 2019. Colors include Gray, White or Bronze. Find more information at [www.hubbell.com](http://www.hubbell.com).

## **About Hubbell Commercial Construction**

Hubbell Commercial Construction includes five brands that provide innovative and cost-effective electrical products with superior customer service for commercial and/or residential markets. RACO creates electrical boxes, covers, and fittings. TayMac crafts “while in use” covers for outdoor electrical applications. Bell produces weatherproof boxes, covers and outdoor lighting. Wiegmann offers the most complete line of electrical enclosures for OEM, Commercial Construction, and MRO markets. Acme manufactures power conversion and conditioning equipment for industrial, commercial and OEM applications.

These historic brands are part of Hubbell Inc., one of the largest electrical manufacturers in North America. The company's history of innovation extends back to 1889. Founder Harvey Hubbell invented the pull chain light switch and duplex receptacle.
