FOR IMMEDIATE RELEASE

Wiegmann Introduces Rain Hoods

South Bend, Indiana April 16, 2019 –Wiegmann introduces their new Rain Hood line. These products protect thermal accessories for electrical enclosures. Wiegmann, part of Hubbell Commercial Construction, provides innovative electrical products to OEM, industrial and commercial markets.

Wiegmann’s new rain hoods prevent rain, snow or sleet from reaching thermal accessories installed on the outside of an electrical enclosure. This protects electronics and electrical equipment in industrial or commercial settings, especially in corrosive environments.

A filter fan and exhaust grill mounted outside the enclosure costs much less than an internal air conditioning unit. Importantly, the design of these new rain hoods maintains a NEMA 4/4X rating for an enclosure. Without it, an outside-mounted filter fan would compromise the rating.

The rain hoods are available in five sizes and fabricated of 304 stainless steel. They are constructed with continuous seam welding. New Wiegmann rain hoods are removable for filter fan maintenance. Replaceable silicone gaskets and all mounting hardware are included.

Availability of Wiegmann rain hoods begins 2Q2019. Find more information at www.hubbell.com.

About Hubbell Commercial Construction

Hubbell Commercial Construction includes five brands that provide innovative and cost-effective electrical products with superior customer service for commercial and/or residential markets. RACO creates electrical boxes, covers, and fittings. TayMac crafts “while in use” covers for outdoor electrical applications. Bell produces weatherproof boxes, covers and outdoor lighting. Wiegmann offers the most complete line of electrical enclosures for OEM, Commercial Construction, and MRO markets. Acme manufactures power conversion and conditioning equipment for industrial, commercial and OEM applications.

These historic brands are part of Hubbell Incorporated, one of the largest electrical manufacturers in North America. The company’s history of innovation extends back to 1889. Founder Harvey Hubbell invented the pull chain light switch and duplex receptacle.
