## **Wiegmann Introduces Stainless Steel Pushbutton Enclosures**

**South Bend, Indiana** May 5, 2020 – Wiegmann introduces stainless steel versions of the PBGX series pushbutton enclosures. These NEMA 4X enclosures are design to hold industry standard 22.5MM push buttons. Wiegmann, part of Hubbell Commercial Construction, provides innovative electrical products to OEM, industrial and commercial markets.

Wiegmann’s new stainless steel models adds a new level of protection for operator interfaces. Standard “4 way” 22.5MM pushbutton holes accept all standard brands of miniature pushbuttons, switches and pilot lights.

The PBGX\_SS series enclosures are fabricated of 304 stainless steel. Seams are continuously welded and ground smooth. To maintain superior sealing, closed cell oil-resistant neoprene gaskets and captivated cover screws that thread into sealed wells are provided. External mounting plates are included on the top and bottom. Grounding provisions are included.

The Wiegmann stainless steel operator interface line includes 6 different size pushbutton enclosures, ranging from 1-6 holes. They provide NEMA 4X level protection. Perfect for protecting switch wiring from dust, dirt, oil and water in harsh, even corrosive, industrial environments.

Wiegmann PBGX\_SS enclosures will be available by the end of May 2020. UL and CSA Listed. Find more information at [www.hubbell.com](http://www.hubbell.com).
