

We Call it A+CLASS for a Reason.

A+CLASS is a classroom lighting and control energy management system. A typical 30'x 30' classroom operating on the A+CLASS™ System uses less than one watt per square foot of energy while providing multi-functional, flexible lighting to enhance the learning environment. A+CLASS reduces energy consumption through intelligent controls that are unparalleled in simplicity of use, flexibility of design and ease of installation.

A+CLASS incorporates best practices for lighting and controls as defined by the US Green Building Council's LEED for Schools, Collaborative for High Performance Schools guidelines (CHPS), the California Energy Commission (CEC) Pier recommendations and other significant best practices adopted by school districts, lighting designers, states and localities.
