ENERGY EFFICIENT EDUCATIONAL LIGHTING

In educational facilities, lighting has to multi-task while saving energy. Microlyne products accomplish this by offering a full range of high performance, high efficiency lighting solutions in recessed, suspended, surface, and wall mount applications. Dimming, circuiting, daylight harvesting, occupancy sensor compatible with efficiencies of up to 85.5%, and using your facility's standard fluorescent lamp: T8, T5 or T5HO, these small aperture products are even available in your school colors.

Aesthetics. Performance. Selection. Value.
We are architectural fluorescent lighting.
