ENERGY EFFICIENT HEALTH CARE LIGHTING

Save energy without sacrificing patient comfort or aesthetics. Microlyne is a full family of narrow light beams for waiting rooms, reception areas, corridors, entries, and lobbies. Microlyne offers single or continuous rows of light with luminaire efficiencies up to 85.5%. Compatible with occupancy sensors and daylight photocells for additional energy savings. T8, T5 or T5HO fluorescent lamps.

Aesthetics. Performance. Selection. Value.
We are architectural fluorescent lighting.
