Hubbell and The Lighting Solutions Center introduce VUE, our newest lighting and control technology education resource.

VUE is an online education resource for Hubbell Lighting customers and channel partners. All content is delivered live and hosted by one of our industry experts at the Lighting Solutions Center. Sessions are scheduled during normal business hours and are approximately 1 hour in length. Select from the following list of topics. Customized training sessions are also available to meet your specific needs.

VUE events are a great complement to traditional learning and include:
- Continuing Education Credits
- New Products
- Technology and Applications
