**Niteway™ Multi-Function Recessed Patient Room Light**

The Niteway patient room night light is the ideal choice for the demands of healthcare environments. It combines an aesthetically pleasing form with low glare performance, rugged durability and water-tight construction. Niteway is also suitable for commercial, hospitality and residential applications. A behavioral application version is also available.

**Evexia™ Patient Bed Light**

Evexia is designed to meet the ambient and reading lighting needs in patient rooms and assisted living facilities. The luminaire has a low profile that reduces the visual impact on the wall. The contoured shape, smooth surface and anti-microbial finish support infectious disease control efforts.

**EVC Combination Exit / Emergency Light**

The EVC Series is a compact architectural LED combination exit and emergency lighting unit designed for fast installation and reliable service.

**MediMode™ Multi-Purpose Recessed Patient Room Light**

The MediMode provides the primary lighting needs for the patient environment. The ambient and reading compartment provide a low-glare even illumination while the dedicated compartment for exam lighting delivers 100+ footcandles for critical examination functions. A full lensed door is available with stainless steel hinge or secured by screws. A behavioral environment version is also available.

**Obsidian™ Message Sign**

The Obsidian Message Sign provides a reliable method to communicate critical messaging. The high contrast face panel clearly communicates the message in highly visible red or green letters when the sign is energized. In the Off condition, the face becomes black without any message bleed through - eliminating any confusion.

**CFP Edge-Lit Flat Panel**

The CFP offers edge-lit LED technology in a sleek, modern, flat panel design. The CFP is a great choice to light classrooms, offices, medical facilities, cleanrooms and general public spaces using edge-to-edge illumination, without pixelation or bright spots.
