Introducing the New
AirPro 52″ 5-Blade Ceiling Fan

NEW
CONTEMPORARY DESIGN
(from P2501)

STYLISH MOTOR HOUSING

MODERN FAN BLADE BRACKET

SLEEK BLADES

SHATTERPROOF LIGHT SHADE
(except P250085)

The **AirPro 52″ 5-blade ceiling fan** refreshes interiors with a sleek, modern form. Five clean-lined fan blades extend outward from a streamlined motor housing that contains a powerful AC motor. Its versatile yet timeless design makes it ideal for a wide range of interior décor styles. The fan can be installed on a flat or sloped ceiling.

Multiple options

- Three AC motor Energy Star rated models
- Light kits (single poly dome shades, 4-light seeded glass or poly shades)
- On-trend finishes

Captive Screws
allow for quick and easy fan blade arm installation.

Unipack Options
package the light kit with the fan, eliminating need to order the light kit separately.

Accessories
All fans can accept an accessory wall and remote control (sold separately).

Light Kits
All light kits include medium based, 3000K LED lamps.

The Perfect Fan in 5 Steps

Ceiling Fan *Buyer's Guide*

Scan with the camera on your
smartphone to explore more styles at
www.progresslighting.com/styles

Ceiling fans are practical and efficient solutions for creating comfortable and welcoming living areas. With many styles, functions and features to choose from, narrowing down the choices can be a challenge. Here we present five tips for selecting the perfect ceiling fan for your home.

1 **Settle on Style**

Choose a style that complements your décor. Consider fan shape, blade features and finish to help you meet your room's design needs. Choose from Traditional, Transitional, Coastal or Farmhouse styles. The possibilities are vast!

Modernly Minimal
See full trendboard page 204

Modern + Edgy

Fan Inspiration

Ceiling Fans can serve as a statement piece or even the focal point of a room.

Today's ceiling fans incorporate beautiful features, such as hand carved blades, sleek finishes and natural elements to appeal to a variety of different design trends.

At Progress Lighting, we strive to incorporate this shift in our ceiling fan designs and are eager to present an expanded offering in this catalog.

2   ## Explore Indoor vs. Outdoor Uses

Fans provide a breezy setting for reading a book or catching up with friends, making them ideal for outdoor rooms. However, it's important to consider the certifications on the fan depending on the use. For high humidity areas, choose a UL-Listed fan for Damp Locations and for spaces that will be exposed to weather, choose a UL-Listed fan for Wet Locations. For interior use in dry spaces with minimal condensation, select a UL-Listed fan for Dry Locations. See testing listings defined on page 23.

The Perfect Fan in 5 Steps *continued...*

36" - 42"

84"
3   ## Get Your Height Right

You want to allow at least 7 feet (84 in.) from the floor to the bottom of the fan, with 8 or 9 feet being the ideal above-floor placement. For lower ceilings, consider a ceiling fan with a low profile to avoid disturbing inhabitants. Most ceiling fans come equipped with a down rod to help you adjust to the correct height.

4   ## Size It To Your Space

Size is really important when selecting your ceiling fan. If a fan is too large, it can overwhelm the space. On the flip side, if the fan is too small, the airflow may be inadequate for that area.

Room Size	Fan Size
(in square feet)	(in inches)
0 - 75	0 - 36
76 - 144	36 - 42
145 - 225	42 - 50
226 - 360	50 - 54
361 - 499	54 - 70
500+	70+

The Perfect Fan in 5 Steps *continued...*

5 ## Choose Your Features

There are many different features to choose from when browsing ceiling fans.

Blade Finish Options

Multiple blade finish options to coordinate with your home decor.

Example blade options for P2568-0930K:

- Silver
- American Walnut

LED

Consider an LED or Energy Star rated fixture to save energy.

Reversible Motor

Typically, ceiling fans are used to help cool you down and keep the air flowing with a counter-clockwise blade direction. However, fans can also keep you warm when the direction of the blades is reversed. Select a fan with reversible motor for the option to circulate cool or warm air. Most ceiling fans have a small switch located either on the motor housing or the switch cup.

P2568-0930K

Remote Control with Full Range Dimming

Full range dimming and hand-held remote control capabilities are available to offer an added convenience in controlling a room's environment.

P2662-01

Light Kit

For a layered lighting effect, install a ceiling fan with a pre-installed light kit to complement your existing fixtures.

LED Light Kits

Save Money and Energy

When you select a high-quality LED fixture, you can expect a significant return on investment from an energy conservation standpoint. Here are some of the energy saving benefits of LEDs from Progress Lighting:
Whirl
P2574-8130K
shown with Driftwood blades

Features

LED sources use at least 75% less energy than incandescent lighting, allowing homeowners to save on operating expenses.	LEDs last 35 to 50 times longer than incandescent sources and approximately 2 to 5 times longer than fluorescent lighting. Meaning, less bulb maintenance!	LEDs do not use power when they are turned off. According to MSN Real Estate, LED lights can result in an annual bill as low as $26.	LEDs do not produce heat like traditional sources, reducing cooling costs. Traditional incandescent bulbs waste 98% of the energy they consume on heat.

Find Your Rating

Indoor, Damp and Wet Location

All ceiling fans sold in the United States have been tested and rated by either Underwriters Laboratories (UL) or Intertek (ETL), each an independent product safety certification organization. It's important to pay attention to the rated listing when purchasing a ceiling fan as it will tell you what location the fan was designed for. There are three location options: dry, damp and wet.

Image: Dostie Homes

Dry Location

Please note indoor only (dry location) fans should only be used indoors. Even if an outdoor area or screened-in porch is covered, the motor and the blades can be affected when exposed to humidity. You can, however, "bring the outdoors inside" – as using outdoor ceiling fans are perfectly acceptable to use in interior spaces.

Damp Location
If you are selecting a ceiling fan for a space that is outdoors and under a roof, i.e. any covered porches; you should select either a damp rated or wet listed fan. Damp location fans may also be used indoors.

Wet Location

If the fan comes directly into contact with water, you'll need to ensure that the ceiling fan has a "wet" listing. Ceiling fans designed for damp or wet locations feature elements, such as moisture-resistant motors and all weather blades. Wet location fans may also be used indoors.

Ceiling Fans

Modern + Edgy

with Steve

Quirky and functional, this style's flair comes from its modern, yet retro, juxtaposition. Mid-Century Modern style furniture adds unique shapes and pops of color to a room. Designers look for statement pieces to complete the look. This style is gravitating toward a cleaner, more minimalistic look through the incorporation of a neutral palette and softer accent colors. Mid-Century

Modern homes are largely characterized by the use of wood textures to create a sense of connection to nature and the outdoors.

- Antique Bronze - 020
- Galvanized - 141
- Graphite - 143
- Matte Black - 31M

P250067-020-WB
with rich oak faux wood accent finish

The Briarwood ceiling fan brings vintage farmhouse detailing into the present day with a classic cross-brace pattern enclosing vintage-style bulbs and a trio of fan blades within its airy, open-frame design. Faux-painted wood accentuates Briarwood's simple geometric form, adding the perfect touch of country character to a variety of room settings.

An Industrial Edge

A simple but edgy vibe takes its cue from industrial origins.

1

Try a fandelier style ceiling fan like Sanford that delivers ultra-powerful air movement packaged in a vintage design.

2

Toss your table lamp and try two low-hanging pendants over the nightstand instead.

3

Finish the room with organic elements of wood and worn textures that celebrate the signature look of the industrial setting.

T20 JA8

Clean and Natural

Indoor-outdoor living begins with organic origins.

1

Select a large ceiling fan like Vast in covered outdoor areas to move air while making a design statement.

2

Bring the outdoors in with weathered wood furniture and organic decor.

3

Use a cool color palette and eye-catching architectural features like a double fireplace for a sophisticated, resort-like feel.

Featuring Vast, Image: Meritage Homes

Arlo

P250026-009-30
shown with Brushed Nickel blades

Unwind under the cooling breeze created by the clean, crisp blades of the Arlo collection's modern ceiling fan. A central LED light provides a perfect way to light a space without flooding the room with harsh light as six metal blades attach to the fan's center. Offered in three different finishes, Arlo is sure to create an intriguing, yet serene retreat in whatever space it calls home.

Modern Farmhouse design embraces tradition but is firmly planted in the present.

1

Look for details like the beautifully carved, solid wood fan blades of the Farris ceiling fan that centers the room with statement-making style.

2

Modernize a traditional approach by contrasting a light and airy palette with a natural stone fireplace, weathered wood mantel and exposed beams.

3

Use organic materials for decorative accessories like greenery, wood and cozy textiles to add a welcoming touch.

Gaze

P2554-1530K

Inspirational Elements

Patterns and curves inspire the design of the room.

1

Select a sleek, contemporary fan like the two-blade Spades to harmonize with the contemporary feel of the living area.

2

Take one element, such as patterned window coverings, to inspire the rest of the room's palette.

3

Nothing jump starts design envy like architectural elements like an interesting ceiling.

Holland

Accessorize with Style

Pops of blue and plenty of collectibles give a room personality.

1

Select a ceiling fan like Billows, whose whitewashed-finish blades accentuate the organic textures in the room.

2

Follow your style by curating your space with treasures that you love.

3

Pick a focal point like the rough stone fireplace and use its natural color palette to inform the color choices for the rest of the space.

45° Canopy
- Standard canopy works with sloped ceilings up to 45°. (12:12 ceiling pitch)
- Outlet box mounting plate includes convenient hands-free hanger for wiring.
- Oversize, textured die-cast hanger ball reduces vibrations that can cause noise and wobble.
- Dual-mount for downrod or close-to-ceiling installation (on select fans)

SureConnect® System
- Motor screws pre-installed in blade arms to prevent them from falling out during installation.
- Special guides perfectly align blade arms to motor.
- Preinstalled rubber isolation pads prevent vibration noise.

Relaxed 3

Organic Shapes 1

Beach Accents 2

Easy, Breezy, Coastal

with Dan

Dan McGinty
Product Designer

Bring your home right to the ocean side with beach-inspired accents, organic furnishings and an overall relaxed feel. Designers often create a relaxed and open environment with soft throw blankets, pillows, cozy rugs and cushioned furniture to complete the Coastal look. Focus on an all-white color palette for your coastal inspired home, while incorporating in soft beachy hues to complement the look.

When it comes to selecting materials for flooring, décor and furniture, seek out dark or weathered wood pieces to emulate a seaside environment nestled nicely by the shore.

Modernly Minimalism

with James

James Thomas
Senior Product Designer

Modern interiors showcase sleek design through the use of neutrals, a minimalism approach, and the use of glass décor and technology. Take advantage of spaces with wide windows and use glass in other details such as countertops and furniture. This creates a sleek design for interior spaces. Integrate new innovations into a home's décor by adding elements, such as voice activated devices and remote controlled light dimmers. To accentuate a Modern color palette, stick to neutral shades, as well as an overall minimalistic design to create this look.

Downrod Selection Guide

Allow at least 7 feet (84 in.) from the floor to the bottom of the fan, with 8 or 9 feet being the ideal above-floor placement.

Average length downrod, included with each fan.

8' or less ceiling — CTC Installation

8' - 9' ceiling — 4″ - 6″ Downrod*

9' - 10' ceiling — 12″ Downrod

10' - 11' ceiling — 18″ Downrod

11' - 12' ceiling — 24″ Downrod*

12' - 14' ceiling — 36″ Downrod

13' - 15' ceiling — 48″ Downrod

14' - 16' ceiling — 60″ Downrod

15' - 17' ceiling — 72″ Downrod

Remotes, Wall Controls & 45º Canopies

P2662-01
Fan/Light Remote
Universal remote operates three fan speeds and full-range dimming light control. Includes canopy receiver and wall storage bracket. Will work with LED lamps and modules. Featuring four "dip" switches and 16 code options to avoid the chance of interference from other remotes.

P2663-01
Fan/Light Remote
Universal remote with two, four or eight-hour timer option, operates three fan speeds and full-range dimming light control. Includes canopy receiver and wall storage bracket. Will work with LED lamps and modules. Featuring many code combination options to avoid the chance of interference from other remotes.

P2618-01
Fan/Light Remote
Provides fan speed and light control from convenient hand-held remote. Compatible with non-dimmable compact fluorescent lamps. For single pole applications. Receiver fits in fan canopy.

P2661-01
Universal Fan/Light Remote
Provides fan speed and full range light dimming control from a convenient hand held remote control. For single pole applications. Includes a wall plate for added storage convenience. Receiver fits in the fan canopy.

P2667-31
WiFi Fan/Light Remote
Universal WiFi remote control for AC motor fans. Control your ceiling fan or light via WiFi from anywhere. Pairs with Alexa, Google Home, or app on your phone or tablet. Voice control the fan with three speeds and the light with full range dimming. App control the fan with three speeds or four timer selections or full range dimming control of the light. Can be controlled with the hand held remote included with the kit.

P2665-30 White
Universal remote includes a wall mount transmitter, that operates three fan speeds and full-range dimming light control. Includes canopy receiver and wall storage bracket. Will work with LED lamps and modules. Featuring four "dip" switches and 16 code options to avoid the chance of interference from other remotes.

P2631-30 White
Full-function wall control transmitter (receiver sold with ceiling fan). Use with, or in place of, hand-held remote included with fans that have a downlight and a reverse module. Includes switch plate cover.

P2630-30 White
Four-speed fan wall control with full-range light dimmer. Fits single-gang wall box; requires two circuits. Includes switch plate cover. Not for use with multiple fans.

P2613-30 White
Four-speed fan wall control. Includes switch plate cover. Not for use with multiple fans.

P2673-01
DC Fan WiFi Module
Add the WiFi module to your Ryne or 52″ Springer ceiling fan ceiling fan for control at your fingertips. You can easily control your fan with a hand-held remote; or a smart phone, tablet, voice assistant (Amazon Alexa and Google Home) via the Smart By Bond app.

PROGRESS LIGHTING™

All finish representations are part of Progress Lighting's comprehensive design and specification program. Through extensive research, these finishes have been carefully chosen to compelment all Progress Lighting products, including our extensive range of materials and accessory options.

These finish representations match actual finish colors as accurately as possible, and while every effort has been made to render colors accurately, they may vary slightly from the actual product, especially hand-painted finishes due to the nature of hand craftsmanship.

Notes

Notes

Notes

Symbol Legend

Products referencing this logo meet the energy efficiency requirements for ceiling fans and or ceiling fan light kits set forth in ENERGY STAR® product specifications. Please refer to www.energystar.gov for specific product qualifications and list of certified products.

Please note indoor only (dry location) fans should only be used indoors. Even if an outdoor area or screened-in porch is covered, the motor and the blades can be affected when exposed to humidity. You can, however, "bring the outdoors inside" – as using outdoor ceiling fans are perfectly acceptable to use in interior spaces.

If you are selecting a ceiling fan for a space that is outdoors and under a roof, i.e. any covered porches; you should select either a damp rated or wet listed fan. Damp location fans may also be used indoors.

If the fan comes directly into contact with water, you'll need to ensure that the ceiling fan has a "wet" listing. Ceiling fans designed for damp or wet locations feature elements, such as moisture-resistant motors and all weather blades. Wet location fans may also be used indoors.

JA8 This marking indicates fixtures that have an integrated LED or replaceable LED module or LED lamps that has been tested and listed in the California Appliance Database. Check for certified lamps, fixtures or LED light engines by searching the MAEDBS database. Go to cacertappliances.enegy.ca.gov

ADA Complies with "American with Disabilities Act"

T20 Products comply with the California Appliance Efficiency Regulations. Certified products are listed on the appliance efficiency database found at www.appliances.energy.ca.gov.

Products with this icon are Dark-Sky Friendly: they are certified by the International Dark-Sky Association to minimize glare while reducing light trespass and skyglow (they don't pollute the night sky.)

The products with this logo have passed the cUL requirements and are available for sale in Canada. These products include the additional safety features needed to comply with the regulations in Canada. Items with the icon are listed with NRCan.

Products with this icon are WiFi compatible and may be controlled with WiFi when one of the following controls is added;
- AC Motor fans can add the P2667-31 WiFi remote control
- DC Motor fans that are WiFi compatible can add the P2673-01 WiFi module.

With the addition of one of the above controls, you may easily control your fan or light with your smart phone, tablet, voice controls, or hand held remote. Use the Smart by Bond technology to control on/off function of the fan and the light kit along with full range dimming and fan speed control..

Products with this icon have WiFi Control Included. Easily control your fan with your smart phone, tablet, voice controls, or a hand held remote. Use the Smart by Bond technology to control on/off function of the fan and the light kit along with full range dimming and fan speed control.

Warranty
