Your guide to selecting the perfect ceiling fan.

The ceiling fans you select for your home should not only be functional, but also show an expression of your personality and elevate each room’s design aesthetic. While there are many choices to make during the selection process, it doesn’t have to be overwhelming. This catalog is intentionally designed to easily select the perfect ceiling fan for your space.

Today’s ceiling fans incorporate beautiful features, such as hand carved blades, sleek finishes and natural elements to appeal to a variety of different design trends. At Progress Lighting, we strive to incorporate this shift in our ceiling fan designs and are eager to present an expanded offering in this catalog.

The Perfect Fan in 5 Steps

Ceiling Fan *Buyer’s Guide*

Ceiling fans are practical and efficient solutions for creating comfortable and welcoming living areas. With many styles, functions and features to choose from, narrowing down the choices can be a challenge. Here we present five tips for selecting the perfect ceiling fan for your home.

1. **Settle on Style**

Choose a style that complements your décor. Consider fan shape, blade features and finish to help you meet your room’s design needs. Choose from Traditional, Transitional, Coastal or Farmhouse styles. The possibilities are vast!
Explore Indoor vs. Outdoor Uses

Fans provide a breezy setting for reading a book or catching up with friends, making them ideal for outdoor rooms. However, it’s important to consider the certifications on the fan depending on the use. For high humidity areas, choose a UL-Listed fan for Damp Locations and for spaces that will be exposed to weather, choose a UL-Listed fan for Wet Locations. For interior use in dry spaces with minimal condensation, select a UL-Listed fan for Dry Locations. See testing listings defined on page 25.

Get Your Height Right

You want to allow at least 7 feet (84 in.) from the floor to the bottom of the fan, with 8 or 9 feet being the ideal above-floor placement. For lower ceilings, consider a ceiling fan with a low profile to avoid disturbing inhabitants. Most ceiling fans come equipped with a down rod to help you adjust to the correct height.

Size It To Your Space

Size is really important when selecting your ceiling fan. If a fan is too large, it can overwhelm the space. On the flip side, if the fan is too small, the airflow may be inadequate for that area.
Choose Your Features

There are many different features to choose from when browsing ceiling fans.

BLADE FINISH OPTIONS
Multiple blade finish options to coordinate with your home decor.
Example blade options for P250102-31M-CS:
- Rustic Charcoal
- Matte Black

LED
Consider an LED or Energy Star rated fixture to save energy.

LIGHT KIT
For a layered lighting effect, install a ceiling fan with a pre-installed light kit to complement your existing fixtures.

CCT TECHNOLOGY
Some fan models offer Correlated Color Temperature selection. Warmer color temperatures will lend a glow that is cozy and inviting. Cooler color temperatures can make the room look and feel fresh and bright. Choose the color temperature that best suits your space.

REVERSIBLE MOTOR
Typically, ceiling fans are used to help cool you down and keep the air flowing with a counter-clockwise blade direction. However, fans can also keep you warm when the direction of the blades is reversed. Select a fan with reversible motor for the option to circulate cool or warm air. Most ceiling fans have a small switch located either on the motor housing or the switch cup.

REMOTE CONTROL WITH FULL RANGE DIMMING
Full range dimming and hand-held remote control capabilities are available to offer an added convenience in controlling a room’s environment.

BLADE FINISH OPTIONS

Control from Anywhere with WiFi

Easily control your fan with your smartphone, tablet, voice or hand-held remote.
Visit progresslighting.com for more details.

WIFI COMPATIBLE
Look for these icons:
- WIFI compatible
- WIFI control included
LED Light Kits

Save Money and Energy

When you select a high-quality LED fixture, you can expect a significant return on investment from an energy conservation standpoint. Here are some of the energy saving benefits of LEDs from Progress Lighting:

**LED sources** use at least 75% less energy than incandescent lighting, allowing homeowners to save on operating expenses.

**LEDs last 35 to 50 times longer than incandescent sources** and approximately 2 to 5 times longer than fluorescent lighting. Meaning, less bulb maintenance!

**LEDs do not use power** when they are turned off. According to MSN Real Estate, LED lights can result in an annual bill as low as $26.

**LEDs do not produce heat like traditional sources**, reducing cooling costs. Traditional incandescent bulbs waste 98% of the energy they consume on heat.

Find Your Rating

Indoor, Damp and Wet Location

All ceiling fans sold in the United States have been tested and rated by either Underwriters Laboratories (UL) or Intertek (ETL), each an independent product safety certification organization. It’s important to pay attention to the rated listing when purchasing a ceiling fan as it will tell you what location the fan was designed for. There are three location options: dry, damp and wet.

**Dry Location**

Please note indoor only (dry location) fans should only be used indoors. Even if an outdoor area or screened-in porch is covered, the motor and the blades can be affected when exposed to humidity. You can, however, “bring the outdoors inside” – as using outdoor ceiling fans are perfectly acceptable to use in interior spaces.

**Damp Location**

If you are selecting a ceiling fan for a space that is outdoors and under a roof, i.e. any covered porches; you should select either a damp rated or wet listed fan. Damp location fans may also be used indoors.

**Wet Location**

If the fan comes directly into contact with water, you’ll need to ensure that the ceiling fan has a “wet” listing. Ceiling fans designed for damp or wet locations feature elements, such as moisture-resistant motors and all weather blades. Wet location fans may also be used indoors.
Vernal refreshes a room’s decor with elegant curves and an expansive 60-inch, five-blade span for the ultimate in design-savvy comfort. Vernal includes WiFi smart control: once installed, Vernal can be controlled by a voice assistant, tablet or smart phone. Finished in Koa Woodgrain, Matte Black or Painted Nickel, Vernal is designed to complement New Traditional and Transitional interiors.

**Specifications**

- **Model Numbers**: P250059-031-30 Black, P250059-129-30 Architectural Bronze, P250059-152-30 Painted Nickel
- **Dimensions**: 60” dia., 13.63” ht.
- **Blades**: Koa Woodgrain, Matte Black, Painted Nickel
- **Airflow**: 6,810 cubic feet per minute
- **Electricity Use**: 34 watts (excludes lights)
- **DOE Weighted CFM/W**: 242 CFM/W
- **Energy Efficiency**: 18w LED Module, 3000K, 90 CRI, 1600 source lumens, dimmable.

**Features**

- Limited Lifetime Warranty
- Dual Mount (flat or sloped ceiling-20°)
- DC Motor
- ABS blades
- Opal shatterproof shade
- Damp Rated
- Full function remote control included
- Six-speed fan operation
- Full-range dimming for light
- Reverse direction control
- WiFi enabled
- Remote control with batteries included

**Lamping**

-瞎LED Module, 3000K, 90 CRI, 1600 source lumens, dimmable.

Search the product number on progresslighting.com for full product details.
Ryne

The 52-inch Ryne fan is modern in appeal, with beautifully flowing blades that join in the middle to create a minimalistic housing. Ryne is smart control adaptable with the P2673 WiFi Module: once installed, Ryne can be controlled by a voice assistant, tablet or smart phone. Ryne’s aerodynamic design and Koa Woodgrain, Matte White or Matte Black finish perfectly suits New Traditional and Transitional interiors.

**ENERGY INFORMATION**

- **Flow**: 5,802 cubic feet per minute
- **Electricity Use**: 33 watts (excludes lights)
- **DOE Weighted CFM/W**: 204 CFM/W

**FEATURES**

- Limited Lifetime Warranty
- Dual Mount (flat or sloped ceiling-20°)
- DC Motor
- ABS blades
- Opal shatterproof shade
- Damp Rated
- Remote control with batteries included
- Add a P2673-01 WiFi module to convert to a smart fan

**LAMPING**

The LED Module, 3000K, 90 CRI, 1,600 source lumens, dimmable.

Introduce a rustic industrial style to your home with Bastrop, whose updated vintage design comes from its wood tone and metal cage frame construction. Curved fan blades feature an interesting bend that heightens the fan’s industrial aesthetic. A damp location rating makes Bastrop ideal for both indoor and covered outdoor use. An included remote control operates the fan.

Belva

The Belva ceiling fan offers an organic global feel and coastal charm. A lattice-like design graces the natural wicker frame, and a lovely Cottage White and Mocha finishes gives charm and depth. A trio of fan blades and vintage-style bulbs within the frame’s woven structure moves air comfortably while casting a beautifully diffused glow.

Three circular bands wrap together to create an open design. Non-metallic fan blades enclosed within a stylish cage design gives the rustic charm of a pendant combined with the functionality of a ceiling fan. Dual toned frame color combinations of Galvanized with antique white accents or Graphite with weathered gray accents. A hand painted wood grained texture complements rustic and modern farmhouse home decor, as well as urban industrial and coastal interior settings.

Freestone

A wire-formed cage adds a touch of casual style to Freestone. Five reversible plywood fans offer a customizable option to complement the room’s decor style. The light kit features a white opal shatterproof shade for a soft glow and includes medium-based LED lamps for energy efficiency. Individual pull chains operate both the fan and the light.
Mesilla has an organic style that delivers natural grace and beauty to indoor and outdoor rooms. Its flower-like silhouette comes from five hand-finished ABS blades that gently wrap around the housing, with a single metal band that seems to be holding the blades on, creating a beautiful focal point. Mesilla has a DC motor for the highest efficacy and whisper-quiet operation. A full-function remote control with a battery is included.

Deep functionality meets modern transitional styling in the Byars 54-in. Ceiling Fan. A clean-lined motor housing featuring a DC motor descends from the down rod, holding five reversible plywood blades with softly squared edges for optimal airflow. Byars offers both soft uplight and even downlight illumination with Dual-Lens combination integrated LED light sources that can be controlled individually with the 6 speed, full-function remote control with full range dimming.
Retro styling brings a nostalgic look to the Gillen 56-in Ceiling Fan. A small motor housing allows its vintage design to take center stage, showcasing an aged metal patina finish and clear glass globe shade. A DC motor controlled by a 6-speed full-function remote with full range dimming compatibility circulates the air as desired. Add charm and warmth with 1 – 7 watt, vintage-style LED Bulb (included).

2023 CEILING FAN CATALOG
Glandon offers a sophisticated design that is ideal for settings requiring a touch of modern flair. Six reversible blades in a walnut/driftwood faux wood finish are strapped by a sleek Antique Nickel metal bar for an unexpected industrial detail. The 60” Glandon ceiling fan features a 17w LED module (3000K color temperature) with a shatterproof white opal shade and a dual mount system. Full range dimming and remote control is included.
Greer

This five-blade 54" Greer ceiling fan complements either industrial or farmhouse decor. It comes with a wire meshed shade light kit that uses two vintage LED lamps (included). Remote control is also included. Greer can be hung on a flat or sloped ceiling due to its dual mount system.
Claret gracefully blends old and new with an eye-catching fluted motor housing paired with long blade arms. With its unique take on a classic design, Claret will make a statement in a variety of interiors.

Clear hammered glass shade delivers lovely textured illumination, creating a striking focal point for the Tompkins 52-inch ceiling fan. Its five reversible square plywood fan blades are held in place by a contrasting metal detail and are available in a choice of Silver and Walnut with a Brushed Nickel housing or Matte Black and Toasted Oak and a Matte Black housing. An integrated 24W LED module offers color-selectable 90 CRI illumination in a gentle 2700K, 3000K soft light or a bright 5000K light that you select from the included full-function remote control. Tompkins is UL damp location listed, making it ideal for sending cooling breezes in indoor or outdoor covered areas in coastal and modern farmhouse settings.

Relax under the refreshing breeze of the Springer Collection 60-Inch Windmill Ceiling Fan. Its large scale and windmill-style blades make it ideal for any great room, bedroom, living room, or bonus room in modern farmhouse, rustic, and coastal-style settings. Its twelve sweeping blades are coated in a choice of Distressed Charcoal with a Matte Black housing, Antique Nickel with Galvanized blades, and Distressed Walnut finished blades with an Architectural Bronze body for a rustic flair. Its cULus damp rating makes this lovely fan ideal for use inside or in outdoor covered areas. A full-function remote control and wall bracket are included.

A sturdy metal housing and long lines bring contemporary style to Kasota. Three rectangular fan blades with long blade arms that span the entire length are finished in a linen-like texture that softens its modern look. Kasota is damp rated, making it ideal for outdoor and indoor settings. Inside, it has a DC motor for the highest efficacy and whisper-quiet operation. A full-function remote control with a battery and a LED light kit with a white opal glass shade is included.

Upshur

Angles and curves bring contemporary style to Upshur. Three hand-finished ABS blades have a distinctive, angled design and are mounted directly to the flywheel to complete the fan’s sleek, modern look. An AC Motor offers quiet operation and creates powerful cool breezes, while a dimmable LED light kit is energy efficient and casts the perfect glow. The included remote control operates the fan, including reverse and full light dimming functions.

  - White
  - Universal remote includes a wall mount transmitter, ideal for multi-family applications, that operates three fan speeds and full-range dimming light control. Includes canopy receiver and wall storage bracket. Will work with LED lamps and modules. Featuring four “dpi” switches and 16 code options to avoid the chance of interference from other remotes.

**WiFi Fan/Light Remote**

- **P2667-031**
  - 2.31" L, 1.52" D, 4.75" ht.
  - Provides fan speed and light control from WiFi. Compatible with non-dimmable compact fluorescent lamps. For single pole applications. Receiver fits in fan canopy.

**DC Fan WiFi Module**

- **P2673-01**
  - White
  - For use with fans that have a downlight. Use with, or in place of, hand-held remote included with the kit.

**Universal Fan/Light Remote**

- **P2665-01**
  - 2.37" L, 0.87" D, 4.57" ht.
  - Universal remote includes a wall mount transmitter, ideal for multi-family applications, that operates three fan speeds and full-range dimming light control. Includes canopy receiver and wall storage bracket. Will work with LED lamps and modules. Featuring four “dpi” switches and 16 code options to avoid the chance of interference from other remotes.

**Fan/Light Remote**

- **P2663-01**
  - 1.75" L, 0.5" D, 4.37" ht.
  - Universal remote with two, four or eight-hour timer option, operates three fan speeds and full-range dimming light control. Includes canopy receiver and wall storage bracket. Will work with LED lamps and modules. Featuring many code combination options to avoid the chance of interference from other remotes.

**WiFi Fan/Light Remote**

- **P2667-031**
  - 2.31" L, 1.52" D, 4.75" ht.
  - Provides fan speed and light control from WiFi. Compatible with non-dimmable compact fluorescent lamps. For single pole applications. Receiver fits in fan canopy.

All finish representations are part of Progress Lighting’s comprehensive design and specification program. Through extensive research, these finishes have been carefully chosen to complement all Progress Lighting products, including our extensive range of materials and accessory options.

These finish representations match actual finish colors as accurately as possible, and while every effort has been made to render colors accurately, they may vary slightly from the actual product, especially hand-painted finishes due to the nature of hand craftsmanship.
Icon Guide

Products referencing this logo meet the energy efficiency requirements for ceiling fans and ceiling fan light kits set forth in ENERGY STAR® product specifications. Please refer to www.energystar.gov for specific product qualifications and list of certified products.

Please note indoor only (dry location) fans should only be used indoors. Even if an outdoor area or screened-in porch is covered, the motor and the blades can be affected when exposed to humidity. You can, however, "bring the outdoors inside" - as using outdoor ceiling fans are perfectly acceptable to use in interior spaces.

If you are selecting a ceiling fan for a space that is outdoors and under a roof, i.e. any covered porches, you should select either a damp rated or wet listed fan. Damp location fans may also be used indoors.

If the fan comes directly into contact with water, you’ll need to ensure that the ceiling fan has a “wet” listing. Ceiling fans designed for damp or wet locations feature elements, such as moisture resistant motors and all weather blades. Wet location fans may also be used indoors.

This marking indicates fixtures that have an integrated LED or replaceable LED module or LED lamps that has been tested and listed in the California Appliance Database. Check for certified lamps, fixtures or LED light engines by searching the MAEDBS database. Go to cacertappliances.energy.ca.gov.

DC motor ceiling fan feature high torque for increased air movement, whisper quiet operation, and greater energy efficiency than AC motors.

Warranty

For more details regarding product warranty coverage, please consult a qualified Progress Lighting distributor or visit:
