Your guide to selecting the perfect ceiling fan.

The ceiling fans you select for your home should not only be functional, but also show an expression of your personality and elevate each room's design aesthetic. While there are many choices to make during the selection process, it doesn't have to be overwhelming. This catalog is intentionally designed to easily select the perfect ceiling fan for your space.

Fan Inspiration

Today's ceiling fans incorporate beautiful features, such as hand carved blades, sleek finishes and natural elements to appeal to a variety of different design trends. At Progress Lighting, we strive to incorporate this shift in our ceiling fan designs and are eager to present an expanded offering in this catalog.

The Perfect Fan in 5 Steps

Ceiling Fan *Buyer's Guide*

Ceiling fans are practical and efficient solutions for creating comfortable and welcoming living areas. With many styles, functions and features to choose from, narrowing down the choices can be a challenge. Here we present five tips for selecting the perfect ceiling fan for your home.

1 Settle on Style

Choose a style that complements your décor. Consider fan shape, blade features and finish to help you meet your room's design needs. Choose from Traditional, Transitional, Coastal or Farmhouse styles. The possibilities are vast!

Transitional

Organic Modern

Industrial

Indoor

Featuring Vernal

Outdoor

Featuring Mesilla

② Explore Indoor vs. Outdoor Uses

Fans provide a breezy setting for reading a book or catching up with friends, making them ideal for outdoor rooms. However, it's important to consider the certifications on the fan depending on the use. For high humidity areas, choose a UL-Listed fan for Damp Locations and for spaces that will be exposed to weather, choose a UL-Listed fan for Wet Locations. For interior use in dry spaces with minimal condensation, select a UL-Listed fan for Dry Locations. See testing listings defined on page 25.

The Perfect Fan in 5 Steps *continued...*

54" - 70"

84"
③ Get Your Height Right

You want to allow at least 7 feet (84 in.) from the floor to the bottom of the fan, with 8 or 9 feet being the ideal above-floor placement. For lower ceilings, consider a ceiling fan with a low profile to avoid disturbing inhabitants. Most ceiling fans come equipped with a down rod to help you adjust to the correct height.

④ Size It To Your Space

Size is really important when selecting your ceiling fan. If a fan is too large, it can overwhelm the space. On the flip side, if the fan is too small, the airflow may be inadequate for that area.

Room Size	Fan Size
(in square feet)	(in inches)
0 - 75	0 - 36
76 - 144	36 - 42
145 - 225	42 - 50
226 - 360	50 - 54
361 - 499	54 - 70
500+	70+

P250102-31M-CS

5 **Choose Your Features**

There are many different features to choose from when browsing ceiling fans.

Scan for "The Perfect Fan in 5 Steps" with Steve Register

BLADE FINISH OPTIONS

Multiple blade finish options to coordinate with your home decor.

Example blade options for P250102-31M-CS:

- Rustic Charcoal
- Matte Black

LED

Consider an LED or Energy Star rated fixture to save energy.

LIGHT KIT

For a layered lighting effect, install a ceiling fan with a pre-installed light kit to complement your existing fixtures.

CCT TECHNOLOGY

3-CCT GAZE FAN | 2700K | 3000K | 5000K

Some fan models offer Correlated Color Temperature selection. Warmer color temperatures will lend a glow that is cozy and inviting. Cooler color temperatures can make the room look and feel fresh and bright. Choose the color temperature that best suits your space.

REVERSIBLE MOTOR

Typically, ceiling fans are used to help cool you down and keep the air flowing with a counter-clockwise blade direction. However, fans can also keep you warm when the direction of the blades is reversed. Select a fan with reversible motor for the option to circulate cool or warm air. Most ceiling fans have a small switch located either on the motor housing or the switch cup.

REMOTE CONTROL WITH FULL RANGE DIMMING

Full range dimming and hand-held remote control capabilities are available to offer an added convenience in controlling a room's environment.

BREEZE MODE ON APP

COMPATIBLE WITH ANY PROGRESS AC MOTOR

FULL RANGE DIMMING CONTROL

- WiFi compatible
- WiFi control included

LED Light Kits

Save Money and Energy

When you select a high-quality LED fixture, you can expect a significant return on investment from an energy conservation standpoint. Here are some of the energy saving benefits of LEDs from Progress Lighting:

Vernal
P250059-129-30

Features

LED sources use at least 75% less energy than incandescent lighting, allowing homeowners to save on operating expenses.

LEDs last 35 to 50 times longer than incandescent sources and approximately 2 to 5 times longer than fluorescent lighting. Meaning, less bulb maintenance!

LEDs do not use power when they are turned off. According to MSN Real Estate, LED lights can result in an annual bill as low as $26.

LEDs do not produce heat like traditional sources, reducing cooling costs. Traditional incandescent bulbs waste 98% of the energy they consume on heat.

Find Your Rating

Indoor, Damp and Wet Location

All ceiling fans sold in the United States have been tested and rated by either Underwriters Laboratories (UL) or Intertek (ETL), each an independent product safety certification organization. It's important to pay attention to the rated listing when purchasing a ceiling fan as it will tell you what location the fan was designed for. There are three location options: dry, damp and wet.

Dry Location

Please note indoor only (dry location) fans should only be used indoors. Even if an outdoor area or screened-in porch is covered, the motor and the blades can be affected when exposed to humidity. You can, however, "bring the outdoors inside" – as using outdoor ceiling fans are perfectly acceptable to use in interior spaces.

Damp Location

If you are selecting a ceiling fan for a space that is outdoors and under a roof, i.e. any covered porches; you should select either a damp rated or wet listed fan. Damp location fans may also be used indoors.

Wet Location

If the fan comes directly into contact with water, you'll need to ensure that the ceiling fan has a "wet" listing. Ceiling fans designed for damp or wet locations feature elements, such as moisture-resistant motors and all weather blades. Wet location fans may also be used indoors.

Indoor Ceiling Fans

Featuring Bexar and Design Series™ Cordova

Vernal

| 031 Black | 129 Architectural Bronze | 152 Painted Nickel |

Vernal refreshes a room's decor with elegant curves and an expansive 60-inch, five- blade span for the ultimate in design-savvy comfort. Vernal includes WiFi smart control: once installed, Vernal can be controlled by a voice assistant, tablet or smart phone. Finished in Koa Woodgrain, Matte Black or Painted Nickel, Vernal is designed to complement New Traditional and Transitional interiors.

Briarwood

020 Antique Bronze	
31M Matte Black	**141** Galvanized Finish
	143 Graphite

The Briarwood ceiling fan brings vintage farmhouse detailing into the present day with a classic cross-brace pattern enclosing vintage-style bulbs and a trio of fan blades within its airy, open-frame design. Faux-painted wood accentuates Briarwood's simple geometric form, adding the perfect touch of country character to a variety of room settings.

The Dallam ceiling fan graciously creates the impression of a flower in bloom as its six blades wrap around gently around its opal white shade. This 60-inch design is available in Silver and Chestnut with a Brushed Nickel housing or Matte Black and Rustic Charcoal with a Matte Black housing, offering a rustic presence to any space it occupies. The white opal shaded light kit is an integrated 20W LED module offering color-selectable 90 CRI illumination in a gentle 2700K, 3000K soft light or a bright 5000K light that you select from the included full-function remote control. Its DC motor is whisper-quiet, and UL damp location listed for indoor and outdoor covered areas.

Springer II

| 31M | Matte Black | 081 | Antique Nickel | 129 | Architectural Bronze |

Relax under the refreshing breeze of the Springer Collection 60-Inch Windmill Ceiling Fan. Its large scale and windmill-style blades make it ideal for any great room, bedroom, living room, or bonus room in modern farmhouse, rustic, and coastal-style settings. Its twelve sweeping blades are coated in a choice of Distressed Charcoal with a Matte Black housing, Antique Nickel with Galvanized blades, and Distressed Walnut finished blades with an Architectural Bronze body for a rustic flair. Its cULus damp rating makes this lovely fan ideal for use inside or in outdoor covered areas. A full-function remote control and wall bracket are included.

Albin

031	Black	**129**	Architectural Bronze

The Albin collection offers a modern take on a traditional design that will be perfectly at home in so many outdoor spaces and lifestyles. Five blades finished with a faux wood grain texture extend from a modern-style center available in an Architectural Bronze, Matte White, or Matte Black finish. An LED light source is encased in a crisp shade to illuminate a patio or porch space that will beg to be lived in an enjoyed.

Remotes and Wall Controls

P2662-01 Fan/Light Remote
2.37" L, 0.87" D, 4.5" ht.

Universal remote operates three fan speeds and full-range dimming light control. Includes canopy receiver and wall storage bracket. Will work with LED lamps and modules. Featuring four "dip" switches and 16 code options to avoid the chance of interference from other remotes.

P2667-031 WiFi Fan/Light Remote
1.75" L, 0.5" D, 4.37" ht.

Universal WiFi remote control for AC motor fans. Control your ceiling fan or light kit via WiFi from anywhere. Pairs with Alexa, Google Home, or app on your phone or tablet. Voice control the fan with three speeds and the light with full range dimming. App control the fan with three speeds or four timer selections or full range dimming control of the light. Can be controlled with the hand held remote included with the kit.

P2663-01 Fan/Light Remote
1.75" L, 0.5" D, 4.37" ht.

Universal remote with two, four or eight-hour timer option, operates three fan speeds and full-range dimming light control. Includes canopy receiver and wall storage bracket. Will work with LED lamps and modules. Featuring many code combination options to avoid the chance of interference from other remotes.

P2618-01 Fan/Light Remote
2.12" L, 1.12" D, 4.75" ht.

Provides fan speed and light control from convenient hand-held remote. Compatible with non-dimmable compact fluorescent lamps. For single pole applications. Receiver fits in fan canopy.

P2661-01 Universal Fan/Light Remote
2.75" L, 0.87" D, 4.56" ht.

Provides fan speed and full range light dimming control from a convenient hand held remote control. For single pole applications. Includes a wall plate for added storage convenience. Receiver fits in the fan canopy.

P2665-30 White

Universal remote includes a wall mount transmitter, ideal for multi-family applications, that operates three fan speeds and full-range dimming light control. Includes canopy receiver and wall storage bracket. Will work with LED lamps and modules. Featuring four "dip" switches and 16 code options to avoid the chance of interference from other remotes.

P2631-30 White
Full-function wall control transmitter (receiver sold with ceiling fan). Use with, or in place of, hand-held remote included with fans that have a downlight. Includes switch plate cover.

P2630-30 White
Four-speed fan wall control with full-range light dimmer. Fits single-gang wall box; requires two circuits. Includes switch plate cover. Not for use with multiple fans.

ENERGY INFORMATION

P2613-30 White
Four-speed fan wall control. Includes switch plate cover. Not for use with multiple fans.

FEATURES

LAMPING

P2673-01 Unfinished DC Fan WiFi Module
Add the WiFi module to your Ryne or 52" Springer ceiling fan ceiling fan for control at your fingertips. You can easily control your fan with a hand-held remote; or a smart phone, tablet, voice assistant (Amazon Alexa and Google Home) via the Smart By Bond app. 2" L, 2" D, 0.9" ht.

PROGRESS LIGHTING®

All finish representations are part of Progress Lighting's comprehensive design and specification program. Through extensive research, these finishes have been carefully chosen to compeiment all Progress Lighting products, including our extensive range of materials and accessory options.

These finish representations match actual finish colors as accurately as possible, and while every effort has been made to render colors accurately, they may vary slightly from the actual product, especially hand-painted finishes due to the nature of hand craftsmanship.

Icon Guide

Products referencing this logo meet the energy efficiency requirements for ceiling fans and or ceiling fan light kits set forth in ENERGY STAR® product specifications. Please refer to www.energystar.gov for specific product qualifications and list of certified products.

Please note indoor only (dry location) fans should only be used indoors. Even if an outdoor area or screened-in porch is covered, the motor and the blades can be affected when exposed to humidity. You can, however, "bring the outdoors inside" – as using outdoor ceiling fans are perfectly acceptable to use in interior spaces.

If you are selecting a ceiling fan for a space that is outdoors and under a roof, i.e. any covered porches; you should select either a damp rated or wet listed fan. Damp location fans may also be used indoors.

If the fan comes directly into contact with water, you'll need to ensure that the ceiling fan has a "wet" listing. Ceiling fans designed for damp or wet locations feature elements, such as moisture-resistant motors and all weather blades. Wet location fans may also be used indoors.

JA8 This marking indicates fixtures that have an integrated LED or replaceable LED module or LED lamps that has been tested and listed in the California Appliance Database. Check for certified lamps, fixtures or LED light engines by searching the MAEDBS database. Go to cacertappliances.enegy.ca.gov

DC MOTOR DC motor ceiling fan feature high torque for increased air movement, whisper quiet operation, and greater energy efficiency than AC motors

T20 Products comply with the California Appliance Efficiency Regulations. Certified products are listed on the appliance efficiency database found at www.appliances.energy.ca.gov.

Products with this icon are Dark-Sky Friendly: they are certified by the International Dark-Sky Association to minimize glare while reducing light trespass and skyglow (they don't pollute the night sky.)

The products with this logo have passed the cUL requirements and are available for sale in Canada. These products include the additional safety features needed to comply with the regulations in Canada. Items with the icon are listed with NRCan.

Products with this icon are WiFi compatible and may be controlled with WiFi when one of the following controls is added;
- AC Motor fans can add the P2667-31 WiFi remote control
- DC Motor fans that are WiFi compatible can add the P2673-01 WiFi module.

With the addition of one of the above controls, you may easily control your fan or light with your smart phone, tablet, voice controls, or hand held remote. Use the Smart by Bond technology to control on/off function of the fan and the light kit along with full range dimming and fan speed control.

Products with this icon have WiFi Control Included. Easily control your fan with your smart phone, tablet, voice controls, or a hand held remote. Use the Smart by Bond technology to control on/off function of the fan and the light kit along with full range dimming and fan speed control.

Products with this icon have a feature that allows for selectable CCT (correlated color temperature)

Warranty

For more details regarding product warranty coverage, please consult a qualified Progress Lighting distributor or visit:
