WHAT HAS CHANGED SINCE TITLE 24 2016?

CALIFORNIA TITLE 24, PART 6
NON-RESIDENTIAL LIGHTING

Includes certain mandatory measures such as:
• Area controls to operate lighting
• Multi-level lighting requirements for dimming based on square footage and qty of luminaires/lamps
• Daylighting controls capable of shedding load to eliminate energy waste
Includes energy budget with two options:
• Prescriptive approach: based on LPD (lighting power density)
• Performance approach: combined measures based on TDV (time dependent valuation)

RESIDENTIAL SCOPE

All indoor and outdoor lighting attached to single family buildings, within dwellings in multi-family buildings. Residential spaces in non-residential buildings include:
• Single Family Buildings, indoor and outdoor lighting
• High Rise multifamily residential units
• Hotel and motel guest rooms
• Fire station dwellings
• Dormitory and senior housing dwellings
• Sheds and garages on residential sites

TERMS / SYMBOLS

T24
Any fixture with a socket (other than recessed housings) may be used to support compliance when a JA8 listed light bulb is installed. The light bulb must be marked either as: JA8-YYYY or JA8-YYYY-E (YYYY = 2016 or 2019). The E indicates that the bulb has been tested and meets requirements established for use in enclosed fixtures (ex: flush mounts)

JA8
Any fixture that has an integrated LED or replaceable LED light engine that has been tested and listed in the California Appliance Database. Check for certified bulbs or fixtures by searching the MAEDBS database.

Fixtures that support compliance when used in outdoor lighting applications
TERMS & REQUIREMENTS

RECESSED LIGHTING
Recessed Downlight housings must be rated for direct contact with insulation (Type IC), as well as be labeled and certified airtight with air leakage less than 2.0 CFM at 75 Pascals when tested with accordance with ASTM E283. The opening must be sealed with a gasket or caulk between the housing and ceiling. The recessed housing shall not contain a screw based socket. In addition, the light source must be high efficacy and comply with Reference Joint Appendix JA8. It must also be marked “JA8-2016” or “JA8-2019”.

OUTDOOR LIGHTING
Per Table 150.0-A, light sources, including LED, installed in outdoor luminaires do not have to meet JA8.

OUTDOOR LIGHTING: CONTROL SWITCH
Luminaires providing outdoor lighting shall meet the following requirements: Controlled by a manual ON and OFF switch* that permits the automatic actions of the following:
• Photocell and either a motion sensor, or automatic time switch control
• Controlled by an astronomical time clock control.
* Refer to standard for additional requirements

CONTROL REQUIREMENTS BY SPACE
At least one luminaire in the bathroom, garage, laundry room and utility room must be controlled by a vacancy sensor. Preset scene controllers and EMCS can take the place of dimmers as long as the functionality meets code requirements.

SCREW-BASE LUMINAIRES
All luminaires that utilize a screw-based socket must contain lamps that comply with JA8 high efficacy requirements. All enclosed, screw-base luminaires, must utilize a compliant lamp rated for elevated temperatures.

CONSTRUCTION & INSPECTION
The builder must now provide new homeowners with a schedule that includes a list of installed lamps and luminaires.

</table>
The LED edgelit recessed downlight combines a slim, low profile design with innovative technology, aesthetics, functionality and affordability. A separate recessed housing or junction box is not required for installation. The wet location listing allows for the product to be used in many applications, including showers. The low profile downlight is ideal for many residential, multi-family, commercial and hospitality applications. The detachable driver box can be removed from the fixture and mounted remotely when installing into shallow ceiling applications. The energy efficient design provides up to a 75% energy savings and up to 50,000 hours of LED life. The edgelit recessed luminaire can dimmed down to 10%, flicker free, and is compatible with many forward phase (TRIAC) and electronic low voltage (ELV) dimmers.

LED SLIM-LINE SURFACE MOUNT
The LED slim line surface mount delivers a solution for both residential and commercial markets. An integrated AC LED light engine allows for installation to 4” octagonal junction boxes and 4x1/2” ceiling pan junction boxes. The construction features a die cast aluminum heatsink for thermal management, ensuring a 50,000 hour LED lifetime. Integrated gasketing and a powder coat paint finish make the product suitable for use in wet locations. The diffused polycarbonate lens controls glare and hides LED pixilation. Spring steel mounting clips offer an easy and intuitive snap in installation. The lumen output is comparable to a 60W incandescent lamp.

- 120v input voltage
- 50,000 hour life

LED DECORATIVE SURFACE MOUNT ROUND
The LED decorative surface mounts combine function and aesthetics. The Brushed Nickel finish and decorative glass ring complement the look of the room. These luminaires are a good solution for both residential and commercial markets. An integrated AC LED light engine allows for installation to standard 4” octagonal junction boxes. The construction features a die cast aluminum heatsink for thermal management, ensuring a 50,000 hour LED lifetime. Integrated gasketing and a powder coat paint finish make the product suitable for use in wet locations. The diffused polycarbonate lens controls glare and hides LED pixilation. Spring steel mounting clips offer an easy and intuitive snap in installation. The lumen output is comparable to a 60W incandescent lamp.

The HIDE-a-LITE™ Linear undercabinet series provides the ideal solution for residential and light commercial applications. The luminaire is constructed from an aluminum housing and features a lens designed to optimize light distribution, ensuring for proper illumination of the work space below. The HIDE-A-LITE linear undercabinet utilizes a through hole mounting method to allow for an easy installation. The luminaire can be direct wired, removing the need for separate cords. Two armored cable fittings are included with the product for applications requiring the use of armored cable. An on/off switch is located on the front of the luminaire, allowing for easy access when used as a task light. The energy efficient LEDs can be dimmed down to 10% with many forward phase (TRIAC) and electronic low voltage (ELV) dimmers.

The HIDE-a-LITE™ LED Puck provides an ideal solution for many applications. The low profile design provides versatility to allow installations inside a cabinet or under a cabinet. It can also be used above cabinets to provide up light. The HIDE-a-LITE LED Puck utilizes a simple through hole mounting. It is direct wired using SPT-2 wire, removing the need for separate cords. The LED Puck is Energy Star listed and meets CA T24 JA8-2016 requirements. The LED Puck is compatible with many forward phase (Triac) and electronic low voltage (ELV) dimmers and can be dimmed down to 10%.

LED TAPE UNDERCABINET SYSTEM

LED Tape provides lighting to enhance aesthetics, while also aiding in tasks around the home. Common applications for LED Tape include: undercabinet lighting in kitchens to add illumination to work surfaces, highlighting back splashes in kitchens or bathroom areas and adding toe kick lighting at the bases of cabinets for dramatic and functional lighting.

FOLLOW FOUR SIMPLE STEPS:

1. CHOOSE A TAPE LENGTH
   - Flexible tape can be cut every 4 inches (cut ends can be reconnected, allowing for full use of LED tape).
   - Tape is fully enclosed in silicone to allow for use in damp location. 24 VDC tape pairs with 24 VDC power supplies.

2. SELECT TRANSFORMER
   - Progress Lighting offers multiple power supplies to meet various project sizes. Power supplies can be dimmed, flicker-free, on Forward Phase (TRIAC) and Reverse Phase (ELV) dimmers down to 10% output.

3. ADDITIONAL SYSTEM CONNECTORS
   - Various connectors allow for customized layouts. Use linking connectors to join runs of tape. Use the L Connector for 90° bends and use the Y Connector to split one run of tape into two.

4. MOUNTING CLIPS/END CLIPS
   - Select end caps or add mounting clips to finish the installation.
BEZEL LED

Featuring a sleek and slim appearance, Bezel LED is an architectural series of flush mount options. Etched white glass is accented by a metal trim in a metallic finish. The glass shade is illuminated on both the bottom and sides to provide a pleasing lighted effect.

FINESSE LED

Finesse LED flush mount fixtures take on a new perspective with an open cage design. The beautifully graphic frame, available in Vintage Gold, Metallic Silver or Graphite, closes to create a circular pattern. The form casts a pleasing illumination and complements popular wire designs found in other home accents and furniture. Ideal for 8 to 9 foot ceilings in spaces that showcase Mid-Century or Modern styling.

Northampton LED lanterns take a designer-influenced approach for these updated outdoor wall lanterns. Two distinctive styles provide a modern or more traditional accent to your home with striking textured glass in a classic pattern. A Black frame highlights clear fluted glass panels with a metallic silver interior reflector, while the Architectural Bronze housing showcases clear seeded glass with a quatrefoil inspired metal pattern paired with a brass tone internal reflector.

WISH LED

The Wish Collection recognizes the growing trend seeking to protect views of the night sky. This innovative style conceals a full cutoff shield to combine a traditional lantern aesthetic with dark sky performance. To further extend the versatility of this classic style, the shield can be removed for those that like the style, but don’t require dark sky compliance. Available in wall, hanging or post applications. Post light does not include full cutoff shield.
