## From Science to Solutions

Harvey Hubbell – Inventor - Entrepreneur - Industrialist

Founded in 1888, Hubbell Incorporated is a global manufacturer of quality electrical and electronic products for a broad range of applications in the Electrical and Power Segments.

# Electromechanical to the Latest Connected Innovative Technologies

From early innovation that has shaped our everyday world to a future that includes integrated electronics and controls focused on human centric solutions, Hubbell's rich history defines a strong future.

In 1973, Hubbell created the first “Hospital Grade” wiring devices and, in conjunction with UL, helped establish the original “Hospital Grade” Listing requirements added to safety standards. These product safety requirements remain in effect and assures integrity of critical grounding connections in healthcare facilities.

Hubbell since 1888 – Longevity Means Reliability
