

HEALTHCARE SOLUTIONS GUIDE

HEALTHCARE SOLUTIONS

Healthcare facilities are depended on for the reliability of their services, procedures and patient care.

Hubbell's healthcare solutions deliver the best in patient experience, facilities management, safety and regulatory compliance.

Meeting Needs From All Perspectives Human Centric Technology - Wiring Devices - Lighting

The core of Hubbell's product development strategy is a customer-centered approach. With an eye on the evolving needs of the marketplace, Hubbell constantly seeks to provide better solutions for a rapidly changing world.

SNAPConnect® Style Line® Illuminated Switches

Hubbell's SNAPConnect Style Line Illuminated Switch is built to provide long life: It features large silver alloy contacts that reduce contact erosion, pilot or illuminated versions that make use of LEDs to provide extended illumination, and a corrosion-resistant steel/ zinc-plated bridge. The switch is illuminated in blue or red, and is offered in four colors. Available in 15A, 120-277V AC or 20A 120-277V AC, and in single-pole or three-way configurations. With a snap-in connector, wiring the connector into the wall box can be done prior to trim-out. This feature also makes switch replacement quick and effortless.

Extra Heavy Duty GFCI Receptacles

When the environment calls for the ultimate protection and reliability, Hubbell Extra Heavy Duty GFCI Receptacles are on the job. Tamper resistant and weather resistant, Hubbell Extra Heavy Duty GFCIs limit improper access to energized contacts with patented protection technology. They automatically and continually test and monitor for protection with self-test diagnostics and power and ground fault indicator lights. Featuring a durable face with V-0 flammability rating, Extra Heavy Duty GFCIs from Hubbell eliminate false assumption of protection by removing power at the face if reverse wired. They are available in 15 and 20 Amp versions as well as Hospital Grade and a variety of colors.

Wiring Devices

UL2930 Healthcare Facility Outlet Assemblies

Hubbell Wiring Device-Kellems is the first manufacturer to bring the healthcare industry a UL 2930 Health Care Facility Outlet Assembly (HCOA). UL 2930 HCOAs are intended for use in patient care areas of hospitals, medical offices and urgent care centers. With safety in mind, Hubbell's patented Tamper-Resistant Hospital Grade Receptacles are additionally protected by tamper-resistant flip covers that restrict access to the receptacle without the right tool or key. This safety feature prevents unauthorized use of the HCOA plug strip, into which sensitive electronics may be plugged. Hubbell's HCOA products are constructed with a heavy duty metal housing allowing the HCOA to stand up to rigorous medical use.

SNAPConnect® Hospital Grade Decorator LED Indicator Receptacles

Available in eight colors, the SNAPConnect Hospital Grade Decorator LED Indicator Receptacle is made of abuse-resistant nylon for installation in extra-heavy-use applications. A deep nylon body ensures strong performance, while a nylon base with eight tabs locks the device together for long-term durability. Solid brass contacts make sure there's an uninterrupted flow of power. These SNAPConnect Decorator receptacles are offered in straight or right-angled pigtailed terminal options, as well as in Hospital Grade or Hospital Grade/ tamper-resistant options. The duplex receptacle also features a power-indicating LED.

Hospital Grade Illuminated Receptacles

Hubbell's Hospital Grade Illuminated Receptacles have a deep body design that makes them extremely resistant to impact, chemicals, and disinfectants, as well as to abrupt plug removal and insertion. A nickel-plated bypass power contact design promises uninterrupted power, and a four point grounding system provides redundant grounding for low resistance to fault currents in high-abuse areas. Available in four colors, these duplex receptacles also feature an illuminated face. A square head, 10-thread bronze center rivet won't rotate, which reduces stripping and resists corrosion. The receptacle's back wired ground terminal makes installation fast and easy; external bundling terminals contain wire strands and are intended for quick inspection.

Stainless Steel Wallplates

Hubbell's smooth, stainless steel wall plates are ideal for damp and corrosive environments. These non-magnetic plates are ideal for static-free environments, and their satin finish offers excellent cleanability while hiding fingerprint marks. Available in pre-marked and jumbo sizes, each plate includes matching stainless steel crews and is shipped with a special protective film to protect the plate during installation. They also offer impact resistance and improved aesthetics over other faceplates on the market.

Insulgrip® Hospital Grade Valise® Plugs and Connectors

Hubbell Hospital Grade Insulgrip plugs and connectors are the industry standard for 15 and 20 Amp applications in any medical setting.

Available with a black, white or transparent housing, Insulgrip devices ensure high impact, heat and chemical resistance. Hubbell designed Insulgrip plugs and connectors with a molded face to keep out dust and debris and a powerful cord gripping design for superior strain relief. Whether connecting mobile ultrasound equipment or patient monitoring devices, Hospital Grade Insulgrip devices provide better safety and reliability.

Combination Wireless Wall Mount Charger & USB Outlet

Hubbell's Qi certified wireless chargers deliver a new convenience: you no longer have to deal with cords or poor connections while charging your devices. Designed to be aesthetically pleasing and durable, this device will organize your workplace or home, seamlessly transforming any ordinary space or counter into a organized, accessible "drop zone" to charge multiple devices at once.

Charger/Outlet Features:

- Qi certified
- Easy single gang installation
- Two inductive coils for optimum target area
- 7.5W capacity wireless output
- LED indication: green for power, blue when charging
- cULus listed and FCC listed

Applications:

- Patient rooms
- Nurses' stations
- Offices
- Airports
- Education
- Homes
- Restaurants

HUBBCOM™ IP Devices

HUBBCOM™ IP Devices has a multi-functional design that will provide solutions for all your communication needs. It provides the ability to combine web application control, VoIP SIP telephone operation, overhead speaker broadcasts, and point-to-point server-less IP communication (audio and/or video).

HUBBCOM IP Device Features:

- Point-to-point, serverless audio & video
- Overhead paging with intercom (soft zoning, multiple conference calls, serverless)
- SIP telephone option
- Access control option
- Web portal access (applications)
- 7-inch capacitive touchscreen
- Desktop or wall-mount with handset
- Intuitive operation
- 8 Ohm, 8W speaker output

Applications:

- Common areas and public spaces
- Patient rooms
- Nurses' stations
- Offices and meeting spaces
- Data centers

Data Jacks

Hubbell's category-rated modular Jacks deliver cutting-edge performance for today's IP-based voice, data, audio and video applications. From the latest Ethernet protocols like 10 Gig, to Power over Ethernet, VoIP and video, there's no application that Hubbell jacks can't handle. With the QuickLace termination process and 1-Punch tool, these jacks also deliver the fastest termination in the industry. Available in Category 6A, Category 6 and Category 5e performance, Hubbell data jacks easily install in a wide range of Hubbell plates, frames and surface mount boxes alongside modular AV connectors.

iSTATION Front-Loading Plates and Modules

For use at the work area, Hubbell iSTATION Front-Loading Plates are designed to flush mount with a box eliminator and adjustable leveling feature, ensuring a clean attractive appearance for any environment. Available from one to six ports and in single-gang version or higher port counts in 2-, 3- and 4-gang versions, iSTATION Front-Loading Plates fit all Hubbell keystone connections, including data, fiber, and AV connectors. With iSTATION Front-Loading Plates, it's easy to create a customized work area with connections for virtually any low-voltage application.

110 RCA Component Video Modules

Hubbell's iSTATION 110 Component RCA Video Modules deliver high-quality, high definition video signals to workstations and any transmitting devices. The modules are available in seven standard colors, and use UTP cable to deliver component video signals within a horizontal point-to-point run. For ease of installation, the modules require no soldering, offer quick and easy 110 termination, and are set up with a simple snap. The video modules can be used with Hubbell's extensive line of AV connectors, modules, and jacks to create one-of-a-kind multimedia spaces in healthcare environments.

Recessed AV In-Wall Enclosure (FPTV)

Hubbell's netSELECT Rat Panel Television (FPTV) Connection Enclosure delivers high-density AV, data and power for today's flat-panel monitors and interactive whiteboards to sit flush against the wall. Available in a white powder coat finish that blends into the wall, the FPTV Enclosure is constructed of rugged 18-gauge cold rolled steel. It features mounting locations for deploying a variety of AV connectors and accommodating large bend radiuses associated with current cable types like HDMI, DVI, RG6/UQ and VGA.

Patient Rooms (Rough-In)

HUBBELL LED 120 Watt High Bay Temporary / Industrial Light

Temporary LED lighting for a durable light source that saves energy, provides instant illumination and are rated to last 50,000 hours.

120 Watt Light Features:

- Easy, portable LED light fixture
- 120% LED efficiency
- Wire cage and polycarbonate lens design for durability
- 50,000 hours
- 5-15P plug type

Applications:

- Construction site lighting

Wiring Devices

HUBBELL Spider® Temporary Power Box

Temporary and portable power box, Spider® box, complete unit, straight blade style.

- (7) 20a 125V receptacles
- (1) 30a 125/250V inlet and outlet

Spider® Features:

- Heavy duty and portable
- Individual GFCI modules
- NEMA 3R metallic enclosure and heavy duty, abuse-resistant legs
- Standard stab termination circuit breakers with gasketed lift cover
- Yellow

Applications:

- Construction site power
- Temporary power source

Compression Tap Connectors

Burndy® Compression Tap Connectors are used for routing power or voltage drop applications.

Color code system matches installation die color coding. Electro-tin plated for added corrosion resistance. Clear cover is used to allow for visual inspection after installation. Accommodates: range taking allows for greater wire range with a single connector. Some designs accommodate more than 1 tap connection. Can be used for voltage drop applications.

Compression Tap Connector Features:

- Copper wire connector
- Accommodates Copper Code Class B (Concentric, Compressed, Compact) or Class C wire and copper flex. See product details for specific wire classes.
- Electro-tin Plated for added corrosion resistance.
- Color coded markings
- Comes with clear cover
- UL Listed *with Burndy Engineered System
- CSA Certified to C22.2

Applications:

- Common areas and public spaces
- Corridor and stairwells
- Patient rooms
- Nurses' stations
- Surgical suites
- Clinical laboratories
- Office and meeting space
- Data center

Compression Terminal Connectors

Burndy® Compression Terminal Connectors are used for terminating power.

Inspection window allows for full wire insertion inspection. Two hole mounting pad provides extra fastening strength. Long barrel with additional crimps allows for stronger mechanical connection strength. Color code system matches installation die color coding. Barrel ink bands identify the crimp zone and approximate crimp locations. Electro-Tin plated for added corrosion resistance.

Compression Terminal Connector Features:

- Copper wire connectors
- Two hole mounting pad
- Long barrel
- Electro-tin plated
- Color coded ink bands
- Clear markings on pad and barrel
- Accommodates Copper Code Class B (Concentric, Compressed, Compact) or Class C wire and copper flex. See product details for specific wire classes.

Applications:

- Common areas and public spaces
- Corridor and stairwells
- Patient rooms
- Nurses' stations
- Surgical suites
- Clinical laboratories
- Offices and meeting spaces
- Data centers

PAT644LI Battery Actuated Crimping Tool

Burndy® PATRIOT battery actuated crimping tool—Hydraulic self contained with 11 ton output force, 6 awg-1000 kcmil copper, 6 awg-750 kcmil aluminum, dieless, 18V lithium ion.

Overmolded handle for comfort and improved grip, which allows for one-handed operation for advance, retract and hold. 18V lithium-ion batteries provide 2.5 times more charge/discharge cycles than traditional ni-cad batteries and provide 430 percentage more lifetime work. 5-year limited warranty on tool, 3-year on batteries and 1-year warranty on the charger.

PAT644LI Features:

- Dieless system eliminates the need to purchase and maintain dies
- Dieless system allows connectors and splices to become range taking
- 355° head rotation
- Ergonomically balanced

Applications:

- Common areas and public spaces
- Corridor and stairwells
- Patient rooms
- Nurses' stations
- Surgical suites
- Clinical laboratories
- Office and meeting space
- Data center

PAT750LI Battery Actuated Crimping Tool

Burndy® PATRIOT 12-ton, c-head, hydraulic self-contained battery actuated crimping tool, 18v 3.0ah li-ion, 120V AC charger.

Refined hydraulic system for ultra performance, speed and reliability. Field proven electronics for ultimate reliability in the harshest environments. 5-year limited warranty, 3-year on batteries and charger, lifetime warranty on INFINITY DRIVE®.

PAT750LI Features:

- True one-handed operation for advance, retract, and hold
- 12 ton output force
- State of the art crimping head design, 360° head rotation
- Ergonomically balanced tool design
- Durable high-impact formed carrying case
- 5-year limited warranty on tool
- 3-year warranty on battery and charger

Applications:

- Common areas and public spaces
- Corridor and stairwells
- Patient rooms
- Nurses' stations
- Surgical suites
- Clinical laboratories
- Office and meeting space
- Data center

CT Series Cable Ties

Burndy® UNIRAP™ cable ties are fabricated of one piece nylon with parts. The straps are tough, resilient, lightweight and abrasion resistant. They offer high tensile strength and are chemically resistive to solvents, alkalides, oils, grease and diluted acids. Self-locking, the secure without twisting or leaving sharp projections.

Organizes wires in all areas of buildings within the walls, ceilings, desk areas, sanitized areas and clean rooms.

CT Series Cable Tie Features:

- Nylon 6/6 and nylon 12 cable ties
- Styles include releasable, identification and screw mount
- Bundle diameter range of .06" to 12"
- Tensile strength from 18 lbs to 250 lbs.

Applications:

- Office and meeting space
- Parking exterior

CTSS-Series Cable Ties

Burndy® 304 Stainless Steel ties are designed to secure hoses, cables, poles, pipes, and more when harsh environmental conditions may adversely affect the bundling application. Used where corrosion, vibration, weathering, radiation, and temperature extremes are a concern. Burndy® Stainless Steel ties can be used in virtually any indoor, outdoor, and underground application.

These Stainless Steel ties are made from Grade 304 Stainless Steel. Designed with a low profile clamping bearing head with fully adjustable strap accommodating many bundle diameters.

CTSS-Series Cable Tie Features:

- 304 Grade Stainless Steel
- Meet the requirements of ABS
- Smooth, rounded edges help ensure safe, efficient handling
- Self-locking steel ball design speeds installation and locks into place at any length
- Provides a strong durable method of cable bundling
- Flame retardant and non-toxic for applications where safety from fire is critical

Applications:

- Offices and meeting spaces
- Parking exterior

LOOM Split Tubing

Burndy® split loom is for applications where braided tubing or spiral wrap may be difficult to install. Tubing provides full coverage. In harsh applications, the tubing provides resistance to crushing, impact, and abrasion.

Tubing offers excellent protection against automotive fluids, vibration wear, water, snow, ice and the effects of heat, cold, and sunlight on cables and wires.

LOOM Split Tubing Features:

- Polyethylene tube construction
- Protection against heat, cold, water, ice and vibration wear
- Protection against crushing, impact and abrasion

Applications:

- Nurses' stations
- Data centers
- Parking exterior

Heat Shrink

Burndy® thin wall and heavy duty heat shrink used in indoor and outdoor applications. used to protect wires and connections for terminals, taps and splice connectors.

Protects cables and connections from different environments and moisture. Allows inspection of new construction of connection, termination or splice. Used in indoor and outdoor applications.

Heat Shrink Features:

- Cross linked polyolefin construction
- Protects from environments and abrasion
- Used in indoor and outdoor applications
- Clear heat shrink provides inspection of electrical connection
- Standard heat shrink for color coding
- Forms a moisture-proof seal

Applications:

- Common areas and public spaces
- Corridor and stairwells
- Nurses' stations
- Offices and meeting spaces
- Data centers

Cable & Wire Management

Wire Basket Tray

For superior protection and management of electrical power or data communications cabling, Hubbell's Wire Basket Tray is field adaptable and easily installed overhead, on walls or under floors using various brackets and supports. Hubbell Wire Basket Tray is made of 100% domestic recycled steel and features a T-weld edge that protects both the installer and the cable from sharp points and a flat-shaped profile that reduces stress points to prevent degrading cabling performance. Available in black, pewter, stainless steel type 304 and 316, pre-galvanized steel and electro-zinc plating, Hubbell Wire Basket Tray is extremely flexible and installs faster than conduit systems while offering increased capacity.

Stab-iT® & Stab-iT® II Boxes

Stab-iT® and Stab-iT® II boxes with built-in cable connectors for flexible armored cable are field-proven 3X faster than using traditional connects. Simply remove the prout and insert cable. Our unique cable clamp locks cable in place quickly and easily. Saves money—these boxes cost no more than a standard box plus cable connector and bushing, yet speed up installation time! Increases productivity and reduces worksite waste.

Stab-iT® & Stab-iT® II Box Features:

- Designed for quick installation of flex, MC, MCI, MCI-A, AC, and HCF Cable
- Great for pre-fab
- Original Stab-iT® line includes 4" square boxes and switch boxes
- Stab-iT® II line includes 4-11/16" square boxes
- UL Listed for use without a plastic bushing (except for AC Cable)
- Pre-installed 8" solid #12 pigtail
- Suitable for use without a bonding jumper in circuits up to 600 volts

Applications:

- Common areas and public spaces
- Corridors and stairwells
- Patient rooms
- Nurses' stations
- Clinical laboratories
- Offices and meeting spaces
- Data centers

Adjustable Mud Rings

Get a flush finish every time! RACO Adjustable Mud Rings provide job site flexibility when finished wall depths are unknown. Inner ring can be adjusted after drywall is installed to match the depth, saving time for the electrical installer.

Adjustable Mud Ring Features:

- Adjustable from 1/2 in. to 1-3/8 in.
- Depth adjusted by 2 screws located on opposite sides
- Adjustment screws are clearly visible and accessible even after device is installed
- All screws are inside of ring eliminating damaged from router
- For use with 2-1/8 in. deep boxes
- cULus Listed

Applications:

- Common areas and public spaces
- Corridors and stairwells
- Patient rooms
- Nurses' stations
- Clinical laboratories
- Offices and meeting spaces
- Data centers
- Service areas

Gangable Data/AV Boxes

RACO AV Wall Boxes provide an ideal solution for in-wall applications requiring data, AV and power. Perfect for Category 6 and 6A fiber optic cables that require a larger bend radius. Designed to install independently or ganged together to support multiple devices. Accommodates industry standard wallplates.

Gangable Data/AV Box Features:

- Knockouts from 1/2" up to 2"
- 4" depth accepts any device
- Raised ground provision in each gang
- Accepts low voltage partition
- NEMA spaced device mounting, accepts industry standard wallplates
- Adjustable stud mounting brackets built in to accommodate different stud and sheetrock thickness
- Adjustable far side support
- Suitable for masonry application

Applications:

- Common areas and public spaces
- Corridors and stairwells
- Patient rooms
- Nurses' stations
- Clinical laboratories
- Offices and meeting spaces
- Data centers

Red Life Safety Adapter Ring

RACO Adapter ring reduces 4-11/16" square box to 4" square opening. Raised 5/8". Red color for Life Safety applications.

911-16 Features:

- Durable pregalvanized steel construction
- Painted red for life safety
- Key-hole allows for installation of cover without removing the box screws
- 5/8 in. raised

Applications:

- Common areas and public spaces
- Corridors and stairwells
- Patient rooms
- Nurses' stations
- Clinical laboratories
- Offices and meeting spaces
- Data centers
- Service areas

Grand Slam Box

RACO's Grand Slam Box is the quickest and easiest way to terminate home runs and other electrical wiring. Specifically designed for commercial applications, the Grand Slam Box offer both the flexibility and space desired in a junction box. Features RACO's unique Stab-iT® clamps for MC built-in, the Grand Slam Box offers the most labor savings and flexibility of any home run box in the market.

Grand Slam Box Features:

- Stab-iT® clamp has been tested at over 3X's faster than traditional MC connectors
- Designed and quick installation of flex, MC, MCI, MCI-A, HCF, AC and EMT
- Surface mount cover included
- Available in two sizes to meet job requirements
- Two raised ground for installation flexibility
- Concentric knockouts on side and back for easy access
- UL Listed

Applications:

- Common areas and public spaces
- Corridors and stairwells
- Nurses' stations
- Clinical laboratories
- Offices and meeting spaces
- Data centers

RACO 9016R and 9024R Open Center Brackets with Built-in Cable Management

RACO's center brackets with built-in cable management easily position and adjust electrical boxes and plaster rings between studs. Features built-in "first means of support" for managing armored cable.

9016R and 9024R Features:

- Accepts both 4" and 4-11/16" square boxes
- Opening gives installer flexibility of box position between studs
- Features built-in first mean of support for securing and supporting MC cable
- 16" or 24" models

Applications:

- Common areas and public spaces
- Corridors and stairwells
- Patient rooms
- Nurses' stations
- Clinical laboratories
- Offices and meeting spaces
- Data centers

RACO 9020R Adjustable Open Center Bracket

RACO's adjustable open center bracket can be adjusted for use on stud spacing anywhere from 16-24" and can be cut for smaller spaces. Rigid heavy-duty design eliminates need for far-side support. Provides maximum flexibility for installers while reducing required SKU's on the jobsite.

9020R Features:

- Accepts both 4" square and 4-11/16" square boxes
- Rigid design eliminates need for far-side support
- Center cutout for quick and level installation
- Can be cut for shorter spacing
- UL Listed

Applications:

- Common areas and public spaces
- Corridors and stairwells
- Patient rooms
- Nurses' stations
- Clinical laboratories
- Offices and meeting spaces
- Data centers

RACO 260H Large Capacity Data/Power Box

RACO's large capacity boxes are used for audio, video, data and power applications providing ample space for Cat 6A and fiber optic cable bends.

260H Features:

- Welded steel construction with "H" bracket which allows for side-by-side mounting on stud and far side box support
- 4-11/16" square x 3-1/4" deep
- Accepts standard 4-11/16" covers
- TKO knockouts for flexibility
- Includes knockouts 1/2" in through 2"
- Three pre-installed ground screws
- Acceptable for use in 2-hour fire rated walls

Applications:

- Common areas and public spaces
- Corridors and stairwells
- Patient rooms
- Nurses' stations
- Clinical laboratories
- Offices and meeting spaces
- Data centers

SNAPConnect® Right Angle Pigtailed Connectors

SNAPConnect® pigtailed connectors assist institutional facilities get spaces up and running faster, and streamlines moves, adds and changes. Hubbell's SNAPConnect® switches and receptacles save significant termination time while providing a fast and consistent installation every time.

Wiring Device-Kellems

Receptacles

GFCIs

USB Chargers

Toggle Switches

Decorator Switches

Right Angle Pigtailed Connectors Features:

- Fast, easy installation with SNAPConnect® modular terminal instead of pigtails
- Clear terminal housing with no exposed live part
- Compact size with a clean finished look
- Transparent housing to inspect contacts
- Audible SNAP, indicates solid connection
- Reduces installation time
- Fully insulated design

Applications:

- Healthcare
- Education
- Hospitality
- Commercial construction
- Pre-Fab assembly
- OEM

Nurses' Stations

USB Charger Receptacles

Hubbell's USB Charger Receptacle provides both USB and electrical power in a standard single gang electrical opening. Designed to provide more charging options for personal electronics, the USB ports are capable of charging two tablets simultaneously. The tamper-resistant Style Line® decorator outlets provide additional power for appliance use. Ideal for use in offices, medical labs, patient rooms, classrooms, etc.

Hubbell SystemOne Fully Adjustable 4-Inch Recessed Floor Box

The Hubbell SystemOne Fully Adjustable Recessed floor box is the next step in a long line of quality products delivering power, data and AV for any application. The challenge of a recessed adjustable floor box is the device depth would vary for different floor thicknesses. We have solved this issue with the integral, patent pending mounting cup which adjusts the device mounting depth to 3 inches, no matter the floor thickness.

The Adjustable Mounting Cup (AMC) is the unique feature of the CFBS1R4 Floor Box product line, and must be purchased separately from the floor boxes. With teeth spaced in 5/32 inch increments, the adjustable cup allows for installation ease and flexibility. The AMC is dropped into the floor box collar then rotated clockwise to set the height and is adjustable until the ground plate is installed. Once the ground plate is installed, the cup is locked into place preventing unwanted adjustment of height. Lastly, the device mounting plate and electrical devices are installed.

Wiring Devices

SNAPConnect® Hospital Grade Isolated Ground Receptacles

Hubbell's SNAPConnect devices offer superior installation efficiency while delivering safe, reliable connections. Instead of traditional pigtails, the device's modular connector is installed during rough-in. Once the walls are up, the protective covering is removed and the connector is simply snapped into the SNAPConnect device for a consistent connection every time. Once installed, SNAPConnect's modular design enables simple device change-out by maintenance personnel. SNAPConnect devices are also a snap to test with standard testers.

SNAPConnect® Hospital Grade Decorator LED Indicator Receptacles

Available in eight colors, the SNAPConnect Hospital Grade Decorator LED Indicator Receptacle is made of abuse-resistant nylon for installation in extra-heavy-use applications. A deep nylon body ensures strong performance, while a nylon base with eight tabs locks the device together for long-term durability. Solid brass contacts make sure there's an uninterrupted flow of power. These SNAPConnect Decorator receptacles are offered in straight or right-angled pigtailed terminal options, as well as in Hospital Grade or Hospital Grade/ tamper-resistant options. The duplex receptacle also features a power-indicating LED.

Hospital Grade Surge Protection Receptacles

Hubbell Surge Protection Receptacles provide safe, reliable power in areas where equipment could be damaged from sudden surges of power.

These receptacles fit in standard wall boxes and have a power-on indicator light that verifies that power is available and the suppression circuit is fully functional. When the surge protection is no longer functioning, a damage alert alarm sounds and continues sounding until the receptacle is replaced or the muting screw is utilized.

Combination Wireless Wall Mount Charger & USB Outlet

Hubbell's Qi certified wireless chargers deliver a new convenience: you no longer have to deal with cords or poor connections while charging your devices. Designed to be aesthetically pleasing and durable, this device will organize your workplace or home, seamlessly transforming any ordinary space or counter into a organized, accessible "drop zone" to charge multiple devices at once.

Charger/Outlet Features:

- Qi certified
- Easy single gang installation
- Two inductive coils for optimum target area
- 7.5W capacity wireless output
- LED indication: green for power, blue when charging
- cULus listed and FCC listed

Applications:

- Patient rooms
- Nurses' stations
- Offices
- Airports
- Education
- Homes
- Restaurants

HUBBCOM™ IP Devices

HUBBCOM™ IP Devices has a multi-functional design that will provide solutions for all your communication needs. It provides the ability to combine web application control, VoIP SIP telephone operation, overhead speaker broadcasts, and point-to-point server-less IP communication (audio and/or video).

HUBBCOM IP Device Features:

- Point-to-point, serverless audio & video
- Overhead paging with intercom (soft zoning, multiple conference calls, serverless)
- SIP telephone option
- Access control option
- Web portal access (applications)
- 7-inch capacitive touchscreen
- Desktop or wall-mount with handset
- Intuitive operation
- 8 Ohm, 8W speaker output

Applications:

- Common areas and public spaces
- Patient rooms
- Nurses' stations
- Offices and meeting spaces
- Data centers

Data Jacks

Hubbell's category-rated modular Jacks deliver cutting-edge performance for today's IP-based voice, data, audio and video applications. From the latest Ethernet protocols like 10 Gig, to Power over Ethernet, VoIP and video, there's no application that Hubbell jacks can't handle. With the QuickLace termination process and 1-Punch tool, these jacks also deliver the fastest termination in the industry. Available in Category 6A, Category 6 and Category 5e performance, Hubbell data jacks easily install in a wide range of Hubbell plates, frames and surface mount boxes alongside modular AV connectors.

Hubbell X-End AV Plug-n-Play System

Ideal for digital signage, smartboards, TVs, monitors and projector systems, the Hubbell X-End AV Plug-n-Play System features pre-terminated, made-to-length assemblies with a locking connector interface that saves valuable installation and testing time. Able to deliver up to 1080i component transmission for superior audio and video, X-End supports multiple applications and configurations. The patch cords and tails are easily swapped out as needs change without needing to change horizontal cabling runs.

HBLALU4800 Series Two Channel Aluminum Raceway

Hubbell's HBLALU4800 Series aluminum raceway is a large two channel, two-piece aluminum raceway that is ideal for delivering power or data access. This extensive line of raceway includes a wide range of plates and covers, transition fittings, and boxes to accommodate the most demanding applications. The HBLALU4800 Series raceway mounts easily to wall or bench tops, and precut covers and plates provide quick installation while the Handi-Screw® boxes eliminate the need for long screws and enables faster mounting.

Illuminated Toggle Switches

Hubbell's Illuminated Toggle Switches are perfect for hospital environments due to their rugged construction and heavy-duty nylon toggle. The toggle not only resists abuse and damage from chemicals, but also illuminates when the switch is in the OFF position. Available in 15A or 20A, and in single-pole or three-way configurations, Illuminated Toggle Switches can be used in applications where lights need to be controlled from two points. Offered in ivory or clear, the switches also feature back and side wire entrance points that accept two wires for feed-through capability.

Wiring Devices

PolyTuff® Non-Metallic Liquidtight Conduit System

When it comes to managing and routing wires, Hubbell's PolyTuff Non-Metallic Liquidtight Conduit System gets the job done.

The system features flexible PVC conduit, a variety of liquidtight straight, SwivelLok and 90-degree fittings. PolyTuff system provides reliable seals. UL listed and CSA certified, PolyTuff's all non-metallic construction is ideal for ending metal fatigue and eliminating circuit separation problems. PolyTuff is extremely easy to install. The 100-foot lengths can be cut cleanly with a knife or PVC cutter without leaving jagged edges. They are also available in a variety of diameters from 3/8 inch to 2 inches.

Stainless Steel Wallplates

Hubbell's smooth, stainless steel wall plates are ideal for damp and corrosive environments. These non-magnetic plates are ideal for static-free environments, and their satin finish offers excellent cleanability while hiding fingerprint marks. Available in pre-marked and jumbo sizes, each plate includes matching stainless steel crews and is shipped with a special protective film to protect the plate during installation. They also offer impact resistance and improved aesthetics over other faceplates on the market.

H-MOSS® Wireless Sensors and Controls

Hubbell's WL-Series Wireless Lighting Controls provide an easy way to save energy. Available in ceiling and wall sensors, these sensors use wireless communications to reduce wiring labor and materials and provide energy savings in retrofit applications or applications not conducive to running low-voltage wiring. They feature reliable Clear Connect wireless technology that operates in a restricted 434 MHz band, avoiding interference from other wireless devices. With a radio frequency (RF) range of 30 feet through walls and 60 feet for line-of-sight applications, Hubbell Wireless Occupancy Sensors feature enhanced digital signal processing to reliably separate signals from external noise and passive infrared technology for enhanced minor motion sensitivity.

Clean Phone® VoIP Telephone (Wall-Mount), UL

The Clean Phone® VoIP telephone offers hands-free communications over an existing VoIP network for clean room or sterile environments. These telephones are intended for connection, via RJ45, to a 10/100 BaseT Ethernet and using either PoE or an external DC power source.

The Clean Phone® VoIP telephone features alarm reporting that permits monitoring the telephone's activity and address maintenance issues immediately.

U.S.A. Brand

Clean Phone® Features:

- Three auto-dial numbers allow quick communication at the touch of a button
- Completely smooth front panel is sealed with an overlay that keeps the phone particulate-free and makes cleaning quick and easy
- Oversized buttons with clearly marked functions permit operation for gloved hands
- Auto-answer feature
- Surface-mount model
- Automatic call divert (rollover), via memory list
- VoIP design, SIP compatible
- PoE or external 24–48V DC power

Applications:

- Clinical laboratories
- Surgical suites

Clean Room Speaker; 8-ohm impedance

The Clean Room Speaker is ideal for clean room environments. The speaker is designed to provide outstanding voice reproduction for use in public address and general alarm applications. The unit can be ceiling mounted or flush mounted into a wall. The completely smooth front panel is sealed with an overlay that allows for wash-downs while keeping the environment particulate-free.

Clean Room Speaker Features:

- Ceiling or wall flush mountable
- Outstanding voice reproduction
- Completely smooth front panel is sealed with an overlay that keeps the environment particulate-free
- Available in 8 ohms
- Stainless steel back-box

Applications:

- Clinical laboratories
- Surgical suites

HBLALU4800 Series Two Channel Aluminum Raceway

Hubbell's HBLALU4800 Series aluminum raceway is a large two channel, two-piece aluminum raceway that is ideal for delivering power or data access. This extensive line of raceway includes a wide range of plates and covers, transition fittings, and boxes to accommodate the most demanding applications. The HBLALU4800 Series raceway mounts easily to wall or bench tops, and precut covers and plates provide quick installation while the Handi-Screw® boxes eliminate the need for long screws and enables faster mounting.

Stainless Steel Wallplates

Hubbell's smooth, stainless steel wall plates are ideal for damp and corrosive environments. These non-magnetic plates are ideal for static-free environments, and their satin finish offers excellent cleanability while hiding fingerprint marks. Available in pre-marked and jumbo sizes, each plate includes matching stainless steel crews and is shipped with a special protective film to protect the plate during installation. They also offer impact resistance and improved aesthetics over other faceplates on the market.

Hospital Grade Insulgrip® Plugs and Connectors

Hubbell Hospital Grade Insulgrip® plugs and connectors are the industry standard for 15 and 20 Amp applications in any medical setting.

Available with a black and white or transparent housing, insulgrip devices ensure high impact, heat and chemical resistance. Hubbell designed Insulgrip plugs and connectors with a molded face to keep out dust and debris and a powerful cord gripping design for superior strain relief. Whether connecting mobile ultrasound equipment or patient monitoring devices, Hospital Grade Insulgrip devices provide better safety and reliability.

Hospital Grade Receptacles

Hubbell Hospital Grade Receptacles are rigorously tested beyond UL requirements.

Extra Heavy Duty Hospital Grade receptacles offer superior electrical, thermal and mechanical properties and greater heat, impact and corrosion resistance. To comply with NEC Article 517-18(c), Hospital Grade Tamper Resistant Receptacles feature an innovative spring-loaded shutter mechanism that allows plugs to enter while resisting access by single-pronged items like keys, hairpins or nails. Hubbell Hospital Grade Receptacles are also available in Isolated Ground, MRI, Style Line Decorator and compact duplex receptacles.

Illuminated Toggle Switches

Hubbell's Illuminated Toggle Switches are perfect for hospital environments due to their rugged construction and heavy-duty nylon toggle. The toggle not only resists abuse and damage from chemicals, but also illuminates when the switch is in the OFF position. Available in 15A or 20A, and in single-pole or three-way configurations, Illuminated Toggle Switches can be used in applications where lights need to be controlled from two points. Offered in ivory or clear, the switches also feature back and side wire entrance points that accept two wires for feed-through capability.

Mobile X-Ray Devices

Hubbellock® Mobile X-Ray Devices include the plugs and receptacles needed to safely and reliably connect and disconnect X-Ray machines in any medical setting.

These 50 and 60 Amp Mobile X-Ray devices are specifically designed to support the mobility of today's advanced diagnostic equipment, providing an extra margin of safety to eliminate the possibility of exterior arcing and maintaining their connection even if they are pulled and tugged. The Mobile X-Ray Receptacles are available with a stainless steel or cast aluminum plate assembly and a stamped steel box accessory with 1¼, 1½ and 2-inch knockouts to accommodate 50 and 60 Amp receptacles.

Hospital Grade Surge Protection Receptacles

Hubbell Surge Protection Receptacles provide safe, reliable power in areas where equipment could be damaged from sudden surges of power.

These receptacles fit in standard wall boxes and have a power-on indicator light that verifies that power is available and the suppression circuit is fully functional. When the surge protection is no longer functioning, a damage alert alarm sounds and continues sounding until the receptacle is replaced or the muting screw is utilized.

Clean Phone® VoIP Telephone (Wall-Mount), UL

The Clean Phone® VoIP telephone offers hands-free communications over an existing VoIP network for clean room or sterile environments. These telephones are intended for connection, via RJ45, to a 10/100 BaseT Ethernet and using either PoE or an external DC power source.

The Clean Phone® VoIP telephone features alarm reporting that permits monitoring the telephone's activity and address maintenance issues immediately.

U.S.A. Brand

Clean Phone® Features:

- Three auto-dial numbers allow quick communication at the touch of a button
- Completely smooth front panel is sealed with an overlay that keeps the phone particulate-free and makes cleaning quick and easy
- Oversized buttons with clearly marked functions permit operation for gloved hands
- Auto-answer feature
- Surface-mount model
- Automatic call divert (rollover), via memory list
- VoIP design, SIP compatible
- PoE or external 24–48V DC power

Applications:

- Clinical laboratories
- Surgical suites

Clean Room Speaker; 8-ohm impedance

The Clean Room Speaker is ideal for clean room environments. The speaker is designed to provide outstanding voice reproduction for use in public address and general alarm applications. The unit can be ceiling mounted or flush mounted into a wall. The completely smooth front panel is sealed with an overlay that allows for wash-downs while keeping the environment particulate-free.

Clean Room Speaker Features:

- Ceiling or wall flush mountable
- Outstanding voice reproduction
- Completely smooth front panel is sealed with an overlay that keeps the environment particulate-free
- Available in 8 ohms
- Stainless steel back-box

Applications:

- Clinical laboratories
- Surgical suites

Data Jacks

Hubbell's category-rated modular Jacks deliver cutting-edge performance for today's IP-based voice, data, audio and video applications. From the latest Ethernet protocols like 10 Gig, to Power over Ethernet, VoIP and video, there's no application that Hubbell jacks can't handle. With the QuickLace termination process and 1-Punch tool, these jacks also deliver the fastest termination in the industry. Available in Category 6A, Category 6 and Category 5e performance, Hubbell data jacks easily install in a wide range of Hubbell plates, frames and surface mount boxes alongside modular AV connectors.

Hubbell iSTATION HDMI Connectors

Offering powerful performance, iSTATION HDMI Connectors feature 110 style connections that transport full, high-definition 1080p signals along with flawless audio. The HDMI connectors are also available in keystone and coupler connections. A locking interface ensures a solid connection, and a four-inch connector tail gives added flexibility to applications where capacity may be restricted. Assemblies are also made to specified lengths, eliminating cable waste and helping with sustainability efforts. When used in conjunction with other iSTATION solutions, Hubbell's HDMI Connectors provide a practical way to deliver AV connections wherever they are needed.

Table Top Boxes

Ideal for conference rooms, training facilities and podiums, Hubbell Table Top Boxes are available in either single or dual-service configurations. The single low-voltage only Table Top Box includes either one microphone jack or a keystone opening to house any Hubbell Keystone Connector such as a data jack, USB coupler, stereo jack or other multi-media connection. The Dual-Service Table Top Box includes either one pre-wired 15A outlet with two keystone openings, an audio jack and 15-pin connection, or two pre-wired 15A outlets with two keystone openings. The pre-wired receptacle with corded end offers fast, easy installation. The Table Top Box also integrates with Hubbell's X-End Plug-n-Play Multimedia systems and features an attractive solid aluminum or brass cover that rotates to remain open.

HUBBCOM™ IP Devices

HUBBCOM™ IP Devices has a multi-functional design that will provide solutions for all your communication needs. It provides the ability to combine web application control, VoIP SIP telephone operation, overhead speaker broadcasts, and point-to-point server-less IP communication (audio and/or video).

HUBBCOM IP Device Features:

- Point-to-point, serverless audio & video
- Overhead paging with intercom (soft zoning, multiple conference calls, serverless)
- SIP telephone option
- Access control option
- Web portal access (applications)
- 7-inch capacitive touchscreen
- Desktop or wall-mount with handset
- Intuitive operation
- 8 Ohm, 8W speaker output

Applications:

- Common areas and public spaces
- Patient rooms
- Nurses' stations
- Offices and meeting spaces
- Data centers

Behavioral Health Surface-Mount VoIP Telephone

GAI-Tronics' Behavioral Health series of rugged telephones are designed for use in environments where conversation privacy is desired but safety is a concern. The Model 210-700BH Surface-mount Handset Telephone is equipped with a shortened, 12-inch handset cord to prevent the handset being used as a weapon. The cord is also short enough to prevent the possibility of strangulation. Its rugged design provides both quality and longevity.

Behavioral Health Telephone Features:

- Surface-mount for indoor use
- Brushed stainless steel housing
- Front panel pushbutton volume control
- Handset with noise-canceling microphone, hearing aid-compatible receiver, and 12-inch armored cord with anchored lanyard
- Ringer with loudness control
- ADA compliant for corridor installation
- Power over Ethernet or alternative 24–48 VDC supply
- SIP compatible

Applications:

- Behavioral health
- Common areas and public spaces

Isolated Ground Receptacles

Computers, FAX machines, televisions, cash registers and any other electronic equipment can be severely impacted by ground noise and interference. Hubbell isolated ground receptacles provide point-of-use protection for a variety of equipment. Developed by Hubbell several decades ago, these devices feature a patented insulating barrier construction that isolates the ground contacts, an impact-resistant nylon face, and superior heat and flame resistance. Easy to install and clearly marked with the amperage and voltage, Hubbell isolated ground receptacles are available in several configurations and colors.

Surge Protection Receptacles

Hubbell Surge Protection Receptacles provide safe reliable power in areas where equipment could be damaged from sudden surges in power.

These receptacles fit in standard wall boxes, and have a power-on indicator light that verifies that power is available and the suppression circuit is fully functional. When the surge protection is no longer functioning, a damage alert alarm sounds and continues sounding until the receptacle is replaced or the muting screw is utilized.

Combination Wireless Wall Mount Charger & USB Outlet

Hubbell's Qi certified wireless chargers deliver a new convenience: you no longer have to deal with cords or poor connections while charging your devices. Designed to be aesthetically pleasing and durable, this device will organize your workplace or home, seamlessly transforming any ordinary space or counter into a organized, accessible "drop zone" to charge multiple devices at once.

Charger/Outlet Features:

- Qi certified
- Easy single gang installation
- Two inductive coils for optimum target area
- 7.5W capacity wireless output
- LED indication: green for power, blue when charging
- cULus listed and FCC listed

Applications:

- Patient rooms
- Nurses' stations
- Offices
- Airports
- Education
- Homes
- Restaurants

HUBBCOM™ IP Devices

HUBBCOM™ IP Devices has a multi-functional design that will provide solutions for all your communication needs. It provides the ability to combine web application control, VoIP SIP telephone operation, overhead speaker broadcasts, and point-to-point server-less IP communication (audio and/or video).

HUBBCOM IP Device Features:

- Point-to-point, serverless audio & video
- Overhead paging with intercom (soft zoning, multiple conference calls, serverless)
- SIP telephone option
- Access control option
- Web portal access (applications)
- 7-inch capacitive touchscreen
- Desktop or wall-mount with handset
- Intuitive operation
- 8 Ohm, 8W speaker output

Applications:

- Common areas and public spaces
- Patient rooms
- Nurses' stations
- Offices and meeting spaces
- Data centers

Data Jacks

Hubbell's category-rated modular Jacks deliver cutting-edge performance for today's IP-based voice, data, audio and video applications. From the latest Ethernet protocols like 10 Gig, to Power over Ethernet, VoIP and video, there's no application that Hubbell jacks can't handle. With the QuickLace termination process and 1-Punch tool, these jacks also deliver the fastest termination in the industry. Available in Category 6A, Category 6 and Category 5e performance, Hubbell data jacks easily install in a wide range of Hubbell plates, frames and surface mount boxes alongside modular AV connectors.

Hubbell iSTATION Furniture Plates

Hubbell furniture plates integrate seamlessly with a variety of office furniture systems, including Steelcase, Herman Miller, Haworth, HON and Knoll furniture openings. They offer a sleek, contemporary design that positions connectivity outside the furniture channel for maximum internal capacity. Hubbell furniture plates are available in 2-port or 4-port configurations, with the 4-port option available in either stacked 2-over-2 or linear port configurations. Each plate is made of durable high-impact thermoplastic housing with openings to fit any keystone data jack and adequate labeling space for easy identification.

Rough-In

Hubbell SystemOne Furniture Feed Poke-Throughs

Hubbell's innovative SystemOne Delivery System includes flush furniture feed fire-rated poke through devices that are ideal for delivering power and data to furniture systems in today's computer lab settings. Able to feed up to a 2-inch conduit and accommodate up to 36 Category 5e network cables, the SystemOne Furniture Feed Poke-Through delivers whatever combination of power, data and audio/video connections are required for educational facilities to keep pace with technology.

SystemOne Furniture Feed Poke-Throughs

Extra Heavy Duty Receptacles

Power receptacles need proven durability and reliability to withstand frequent plug-ins and ensure safety. Hubbell's HBL Extra Heavy Duty receptacles are designed for superior impact resistance, greater heat and corrosion resistance, and reduced stripping. They offer superior electrical, thermal and mechanical properties while providing the safest, most reliable design for a low resistance flow of fault currents and fast, easy installation. Extra Heavy Duty receptacles are available as 15 and 20 Amp devices in either duplex, single or weather resistant version.

Hubbell Advantage™ Series Pin and Sleeve Device

Hubbell's Advantage Series Pin and Sleeve devices provide safe, dependable electrical performance in a variety of environments.

Hubbell combined the advantages of their top performing IEC pin and sleeve with the capabilities of a UL 2682 switch-rated device. Hubbell's standard industrial pin and sleeve is HP rated and recognized as a disconnecting means. The Advantage Series provides the only Switch-Rated IEC Pin and Sleeve Devices in the market. By working with existing installed IEC 60309-2 pin and sleep plug and inlet bases, customers save both time and money.

The Advantage Series are UL witnesses IP69K and UL Type 4X and 12 devices. They are designed for use in harsh environments — the devices offer protection against water and dust, even during times of high water flow or in areas the excessive amounts of dust.

Ergonomic Design
The easy-to-use leverage grip design from Hubbell puts the Advantage into the palm of your hands.

Wiring Devices

Hubbell Twist-Lock® Locking Devices

Hubbell Twist-Lock devices, available in 15, 20, and 3 Amp, are the industry standard for locking plugs and receptacles. The plug and connector feature a powerful cord grip that clamps the conductors, not just the cable jacket, making it the most powerful cord grip in the industry. The tough ribbed nylon housing provides secure gripping while ensuring impact and corrosion resistance. An individually molded face for each blade configuration keeps debris out of the plug while the dust shield provides additional protection from contamination. Hubbell also offers a variety of Twist-Lock receptacles that combine functional design and features for secure and easy mating. Only Twist-Lock delivers premium service and longer life while keeping electrical connections connected.

H3 Series Cabinets

Hubbell full size enclosures are for high density cabling requirements in data centers and telecommunication rooms. The H3 Series products have been designed to maximize air flow, support increased load capacity and provide easy access to cables. The H3 Series high quality construction allows for 3,000 pounds of equipment loading and each cabinet has two pairs of adjustable mounting rails that are rack unit numbered. Each unit comes with four casters installed and also features leveling feet to support the cabinet on any type of flooring. The perforation on the doors is compact, allowing ample airflow to cool equipment while the reinforced doors provide security.

NEXTSPEED® Ascent Category 6A Patch Panels

Hubbell's NEXTSPEED® Ascent Category 6A, Component-Compliant Patch Panels available in both straight and angled versions are the industry's fastest terminating patch panels. The patch panel's zero-crosstalk contact structure provides the highest performance while maintaining true balance to offer 10-Gigabit Ethernet application assurance with 4.5 dB near-end crosstalk margin over TIA-568-C component specifications at 500 MHz. The angled patch panel eliminates the need for horizontal cable management, while the straight versions are available in up to 96 ports in a 4RU footprint.

Hubbell OptiChannel Rack Enclosures

Ideal for data center and telecommunications spaces where proper cable management is critical to network performance, flexibility and scalability, Hubbell's OptiChannel Rack Mount Enclosures enhance the management capabilities of high-density fiber optic connections at the interconnect or cross-connect. With enhanced bend radius control, easy labeling and an inner splice tray with optimum slack storage, OptiChannel features a one-piece removable cover and magnetic door for easy use. They integrate seamlessly with a wide range of panel and cassette options and are available in 1 to 4U sizes to house anywhere from 72 to 360 LC fiber ports.

Grounding & Bonding

PAT750LI Battery Actuated Crimping Tool

Burndy® PATRIOT 12-ton, c-head, hydraulic self-contained battery actuated crimping tool, 18v 3.0ah li-ion, 120V AC charger.

Refined hydraulic system for ultra performance, speed and reliability. Field proven electronics for ultimate reliability in the harshest environments. 5-year limited warranty, 3-year on batteries and charger, lifetime warranty on INFINITY DRIVE®.

PAT750LI Features:

- True one-handed operation for advance, retract, and hold
- 12 ton output force
- State of the art crimping head design, 360° head rotation
- Ergonomically balanced tool design
- Durable high-impact formed carrying case
- 5-year limited warranty on tool
- 3-year warranty on battery and charger

Applications:

- Common areas and public spaces
- Corridor and stairwells
- Patient rooms
- Nurses' stations
- Surgical suites
- Clinical laboratories
- Office and meeting space
- Data center

Grounding and Bonding Systems

The grounding network in any building is responsible for directing electricity, static noise and built up charges to an outside discharge away from people and equipment.

The grounding products featured here are designed around the ANSI-J-STD-607-B, Commercial Building, Grounding (Earthing) and Bonding requirements for telecommunications.

This standard specifies the requirements for a uniform telecommunications grounding and bonding infrastructure that shall be followed within commercial buildings where telecommunications equipment will be installed.

Grounding and Bonding Systems

Item	Description	Catalog No.
Compression Lugs	Long barrel with inspection window; available in 6 AWG up to 750 kcmil	YAZxxxx
Busbars	Copper or tin plated copper	BBBxxxx
Raised Floor Grounding Clamps	In parallel or grid mesh bonding applications	GPxxxx
Compression Taps	Copper C-Taps or tin plated copper H-Taps	YCxxxx

BGRKTVC In-Cabinet Grounding Kit

BGRK grounding kits offer conveniently packaged components which simplify the decision making process at material acquisition and installation on the job site. These grounding kits bundle the same quality UL listed connectors with value-adding components such as: conductor, installation hardware, oxide inhibitor, labeling and installation instructions.

Includes:

- 36" busbar
- Busbar hardware kit
- 60" #6 AWG conductor
- YAZ6C2TC14 HYDENT™ terminal (pre-crimped to conductor on one side)
- 8" Black Hook & Loop Cable Fastener (10 pieces)
- ESD Port Kit
- ESD Identification Label
- Additional Labeling
- 1/2 ounce PENETROX™ A oxide inhibitor

Grounding Kit Features:

- Conveniently packaged for ease of procurement and installation
- Comprised of UL listed components
- Wire brush free when installed with telecom WEEB® washer
- TIA607 compliant

Applications:

- Data centers

BGRKTHC On-Rail
Busbar Grounding Kit

BGRK grounding kits offer conveniently packaged components which simplify the decision making process at material acquisition and installation on the job site. These grounding kits bundle the same quality UL listed connectors with value-adding components such as: conductor, installation hardware, oxide inhibitor, labeling and installation instructions.

Includes:

- 3/4" x 19" busbar
- Busbar hardware kit
- 60" #6 AWG conductor
- YAZ6C2TC14 HYDENT™ terminal (pre crimped to conductor on one side)
- 8" Black Hook & Loop Cable Fastener (10 pieces)
- ESD Port Kit
- ESD Identification Label
- Additional Labeling
- 1/2 ounce PENETROX™ A oxide inhibitor

On-Rail Busbar Grounding Kit Features:

- Conveniently packaged for ease of procurement and installation
- Comprised of UL listed components
- Wire brush free when installed with telecom WEEB® washer
- TIA607 compliant

Applications:

- Data centers

BGRKTD30DN Ground
Conductor/Jumper Kit

BGRK grounding kits offer conveniently packaged components which simplify the decision making process at material acquisition and installation on the job site. These grounding kits bundle the same quality UL listed connectors with value-adding components such as: conductor, installation hardware, oxide inhibitor, labeling and installation instructions.

Includes:

- 30" #6 AWG conductor
- YAZ6C2TC14 HYDENT™ terminal pre crimped to one end of conductor
- YAZ6C2TC1490 HYDENT™ terminal pre-crimped to the other end of conductor
- 1/2 ounce PENETROX™ A oxide inhibitor
- Hardware Kit
- Labeling

Ground Conductor/Jumper Kit Features:

- Conveniently packaged for ease of procurement and installation
- Comprised of UL listed components
- Wire brush free when installed with telecom WEEB® washer
- TIA607 compliant

Applications:

- Data centers

BGRKTD9D Ground Conductor/Jumper Kit

BGRK grounding kits offer conveniently packaged components which simplify the decision making process at material acquisition and installation on the job site. These grounding kits bundle the same quality UL listed connectors with value-adding components such as: conductor, installation hardware, oxide inhibitor, labeling and installation instructions.

Includes:

- 9" #6 AWG conductor
- YAZ6C2TC14 HYDENT™ terminals pre crimped to each end of conductor
- 1/2 ounce PENETROX™ A oxide inhibitor
- Hardware Kit
- Labels for conductor
- Ground Symbol Label

Ground Conductor/Jumper Kit Features:

- Conveniently packaged for ease of procurement and installation
- Comprised of UL listed components
- Wire brush free when installed with telecom WEEB® washer
- TIA607 compliant

Applications:

- Data centers

BGRKTWB5 Ground Conductor/Jumper Kit

BGRK grounding kits offer conveniently packaged components which simplify the decision making process at material acquisition and installation on the job site. These grounding kits bundle the same quality UL listed connectors with value-adding components such as: conductor, installation hardware, oxide inhibitor, labeling and installation instructions.

Includes:

- 9" #6 AWG Conductor (5 pieces)
- KS23 SERVIT® split bolt connectors (10 pieces)
- Ground wire labeling (5 pieces)
- Ground symbol labeling (5 pieces)

Ground Conductor/Jumper Kit Features:

- Conveniently packaged for ease of procurement and installation
- Comprised of UL listed components
- Wire brush free when installed with telecom WEEB® washer
- TIA607 compliant

Applications:

- Data centers

Grounding & Bonding

WEEB® Two Hole Telecom Washer

The Telecom WEEB® Washer design utilizes patented WEEB® Washer teeth eliminating the need to remove nonconductive coatings (e.g. anodization and powder coat) when making bonding connections. The teeth pierce through most nonconductive coatings and embed into the underlying metal creating a bonding connection between the lug and the coated metal component that it is installed on (e.g. equipment racks, cabinets, enclosures, cable tray, etc.).

wiley

Two Hole Telecom Washer Features:

- Made from corrosion resistant 304 stainless steel for outstanding durability and performance
- Eliminates the need for surface preparation and oxide inhibitor
- Detailed manual specifying proper hardware, torque, and mounting information is available upon request
- UL 467 Recognized for grounding and bonding equipment

Applications:

- Equipment bonding
- Power connections
- Grounding and bonding
- Solar PV system
- Electrical connections

Type BTCGC Cable Tray Clamp

Cable Tray Clamp for Copper or Aluminum Conductor to Aluminum or Steel Cable Tray. Made of aluminum and tin plated, the BTCGC cable tray clamp accommodates aluminum or copper conductor #6 AWG through 250 kcmil. Suitable for indoor applications, the BTCGC clamp may be used with most types of cable tray with an inside or outside flange design.

Quick and easy installation requiring no drilling or special tools; use with 1/2" maximum straight rail, aluminum and steel cable trays. Tin plated for durability and corrosion resistance. UL Listed for Grounding and Bonding; CSA 22.2 NO. 41 for Grounding and Bonding.

 **BURNDY®**

Clamp Features:

- Accepts rail thickness up to 1/2"
- Conductor range from #6 to 250 kcmil
- Installs with 1/4" Hex Key
- Installation Torque 275 in-lb

Applications:

- Healthcare
- Data Centers
- Telecommunications
- Renewable Energy
- Petrochem
- Utilities
- Industrial Manufacturing

Wire Basket Tray

For superior protection and management of electrical power or data communications cabling, Hubbell's Wire Basket Tray is field adaptable and easily installed overhead, on walls or under floors using various brackets and supports. Hubbell Wire Basket Tray is made of 100% domestic recycled steel and features a T-weld edge that protects both the installer and the cable from sharp points and a flat-shaped profile that reduces stress points to prevent degrading cabling performance. Available in black, pewter, stainless steel type 304 and 316, pre-galvanized steel and electro-zinc plating, Hubbell Wire Basket Tray is extremely flexible and installs faster than conduit systems while offering increased capacity.

Under Floor Wire Basket Tray

Hubbell's wire basket system meets specific requirements for commercial controlled interior environments and data centers. Wire basket systems help save labor and minimize waste, while reducing impact to the environment. The painted, masked version reduced on-site paint removal, saving time and money. The raised access floor system ships as a complete unit, eliminating the need to locate and assemble components. Hubbell wire basket systems are available in overhead and raised floor applications. Both systems are UL classified as equipment ground conductor, provided they are installed and spliced according to recommended instructions.

Under Floor Wire Basket Tray Features:

- T-weld construction prevents snags
- 5mm round wire on smaller sizes
- High load rating
- 100% recycled steel
- Use factory support hardware or fabricate supports on the job site
- 2" x 4" mesh opening
- Painted tray includes factory installed masking to assure proper grounding at splices; no need to remove paint during installation

Applications:

- Data centers

Cable & Wire Management

NEXTFRAME® Ladder Tray

Hubbell's NEXTFRAME® ladder tray is an effective cable runway that supports and delivers bundles of copper and fiber cables between cabinets, racks and closets, along walls and suspended from ceilings. This lightweight system features rugged, tubular steel construction that provides the mechanical support, strain relief and smooth gradual bend needed to protect cables and maintain their performance. Hubbell ladder tray features a durable black or gray powder coat finish and a broad range of sizes and fitting for proper installation, including wall supports and brackets, cable drops, retaining posts, splice kits and ceiling mount kits.

NEXTFRAME® Ladder Tray Features:

- HLS Ladder Tray is a modular system that is easily configured for all unique installations
- Ladder tray sections universally work with all ladder tray accessories
- HLS Ladder feature rung spacing every 9" to support and relieve cable stress

Applications:

- Data centers

Transformer

General Purpose Dry-Type Distribution Transformers

General purpose dry-type distribution transformers. Extra large front access wiring compartment through 9 kVA; top access through 75 kVA for easier installation and cooler case temperatures. Completely enclosed—suitable for indoor/outdoor service. Excellent for dust or lint laden atmosphere. Encapsulated—electrical grade silica and resin compound completely encloses the core and coil. Encapsulation seals out all moisture and air, eliminating corrosion and insulation deterioration.

Distribution Transformers Features:

- Quiet operation with sound levels below NEMA standards
- Electrostatic shield for enhanced protection
- Optional weather shield - WSA1
- UL Class 180°C insulation system. 115°C rise
- High efficiency and excellent regulation

Applications:

- Engineering
- Parking and exterior

Engineering

Manual Motor Controllers

Enhance safety and increase your confidence with Hubbell's motor controllers and disconnects. Because our Circuit-Lock motor controllers are also disconnects, you get the safety, flexibility, compliance and productivity you need for industrial applications and motor controls. Hubbell motor control devices are also available for use with Hubbell LINKOSITY® modular plug-and-play power distribution system.

Heavy Duty Pendant Pushbutton Stations

Suitable for the toughest environments, Hubbell's Heavy-Duty Pendant Pushbutton Stations are used to control circuit operation of electric motor hoists and other machinery. With high-impact resistance and a sealing ring that shuts out dust and moisture, the enclosure is ideal for any high-use industrial application. A mechanical interlock feature prevents simultaneous activation of both buttons. Pendant pushbutton stations are available in single or two speed, with two-, four-, six-, or eight-button configurations.

Kellems® Support Grips

Kellems® Support Grips from Hubbell hold the weight of a variety of cables as they hang in vertical, sloping or horizontal positions, preventing excessive strain or pullout at the connections that can result in a power failure. Available in light, standard and heavy duty, Kellems Support Grips feature a strand equalizer that positions the cable for equal loading throughout the entire grip for maximum performance and reliability. Kellems support grips also absorb strain from flexing, vibration, and expansion and contraction. They are available in four eye styles, including single, double, universal and offset.

Support Grips

Hubbell Insulgrip® 15 and 20 Amp Straight Blade Devices

Another Hubbell innovation that has become an industry standard, Insulgrip plugs and connectors meet a wide range of commercial and heavy-duty applications ranging from 15 to 200 Amps. Encased in tough nylon, Insulgrip devices ensure high impact, heat and chemical resistance while insulating current-carrying components from the user for maximum safety. Hubbell has designed Insulgrip plugs and connectors with an individually molded face to keep out dust and debris and a powerful cord gripping design for superior strain relief. Whether connecting mobile medical equipment or food preparation equipment, Insulgrip devices last longer and provide better safety and reliability.

Hubbell Insulgrip® 15 and 20 Amp Straight Blade Devices

Hubbell Twist-Lock® Locking Devices

Hubbell Twist-Lock devices, available in 15, 20, and 30 Amp, are the industry standard for locking plugs and receptacles. The plug and connector feature a powerful cord grip that clamps the conductors, not just the cable jacket, making it the most powerful cord grip in the industry. The tough ribbed nylon housing provides secure gripping while ensuring impact and corrosion resistance. An individually molded face for each blade configuration keeps debris out of the plug while the dust shield provides additional protection from contamination. Hubbell also offers a variety of Twist-Lock receptacles that combine functional design and features for secure and easy mating. Only Twist-Lock delivers premium service and longer life while keeping electrical connections connected.

Communications

SP2 PoE / PoE+ Indoor Handset Station

The SP2 with Power over Ethernet (PoE/ PoE+) operation is one of GAI-Tronics' most advanced paging and intercom systems. Combining the simplicity of "press to page, release to party" operation with cutting-edge multicast Voice over Internet Protocol (VoIP) technology, SP2 is capable of providing virtually instant communication in the most demanding of environment.

Handset Station Features:

- Multicast VoIP technology
- Serverless technology
- Full duplex communication
- Five party lines
- PoE or PoE+ operation
- Efficient 30 watt Class D amplifier
- Ambient Level Sensing (ALS)
- Remote Terminal Unit (RTU) operation for input/output applications
- Remote monitoring
- CAT5/5E network connection
- Indoor mounting

Applications:

- Engineering

Heavy Duty Hose Reels

Gleason Reels' heavy duty hose reels are designed for supplying air or fluid to machines in applications where the machine supplies the power to pull out the hose and the reel supplies the rewinding power. They are also widely used overhead where the hose is pulled down by hand. In hand pull applications, a ratchet lock is usually employed to keep the hose extended while in use.

Hose Reel Features:

- Multi-position four roller guide and adjustable hose stop included
- Weatherproof gasket on spring motor
- Positive ratchet lock with disengage
- Rugged steel construction; baked polyester finish
- All welded solid steel construction
- Optional 340° pivot base

Applications:

- Engineering
- Parking and exterior

Heavy Duty Tool Balancers

Gleason Reels' heavy duty 'BG' series tool balancers feature rugged steel construction with black polyester baked finish, reinforced hanging bracket with forged clevis for ceiling mounting and extra holes for safety chain attachment. Spring is permanently lubricated and provides constant tension, adjustable for balancing tool in normal working zone.

Tool Balancer Features:

- Rugged steel construction with black polyester baked finish
- Reinforced hanging bracket with forged clevis for ceiling mounting and extra holes for safety chain attachment
- Spring is permanently lubricated. Includes safety tool clip and adjustable cable stop

Applications:

- Engineering

Industrial Power Cord Reels

Cord reels provide point-of-use power in a variety of maintenance environments—from shops and garages, to outdoor spaces.

Hubbell Power Cord Reels are powder coated with solid-steel construction and a UL Type 4X enclosure that protects the motor, junction box, slip ring assembly and cable entrance from weather, hose down and corrosion. Available in 15 and 20 Amp versions, Power Cord Reels feature a multi-position roller guide that can be mounted in four different positions and an optional 340-degree pivot base to deliver power in any direction.

Transformer

General Purpose Dry-Type Distribution Transformers

General purpose dry-type distribution transformers. Extra large front access wiring compartment through 9 kVA; top access through 75 kVA for easier installation and cooler case temperatures. Completely enclosed—suitable for indoor/outdoor service. Excellent for dust or lint laden atmosphere. Encapsulated—electrical grade silica and resin compound completely encloses the core and coil. Encapsulation seals out all moisture and air, eliminating corrosion and insulation deterioration.

Distribution Transformers Features:

- Quiet operation with sound levels below NEMA standards
- Electrostatic shield for enhanced protection
- Optional weather shield - WSA1
- UL Class 180°C insulation system. 115°C rise
- High efficiency and excellent regulation

Applications:

- Engineering
- Parking and exterior

Enclosures & Boxes

NEMA 4X JIC Continuous Hinge Electrical Enclosure

Wiegmann NEMA 4X JIC Continuous Hinge Quarter Turn 12X12X6 304 Stainless Steel.

The Ultimate Mini-Max series enclosures are designed to house and protect electrical and electronic components in harsh, dirty environments. Streamlined styling, quarter-turn latch, and attractive durable finish complement any high tech electronic equipment.

WIEGMANN

NEMA 4X JIC Enclosure Features:

- 1/4 turn style JIC enclosure makes for easy door seal
- Eliminates the need for exterior clips to secure door shut
- 1/4 turn latch is interchangeable with many locking designs available to better suit the customer
- FTC flange around the entire door opening to channel liquids away
- Available in light grained finish 304 or 316 stainless steel

Applications:

- Medical grounds
- Parking garages
- Food services

Fire Pump Controller

Soft Start Fire Pump Controller

The MPT700 Pilot Series Soft Start Fire Pump Controllers utilize a solid state motor controller. The motor voltage is raised to an adjustable initial torque value. The motor voltage is gradually increased during the acceleration ramp time, max. of 10 seconds per NFPA 20. After a minimum run time and all starting causes have returned to normal, the controller will initiate a ramp down process by smoothly decelerating the motor at an adjustable rate to a stop. This smooth acceleration/deceleration of the motor reduces surges and water hammer in the sprinkler system. In-rush current can be adjusted as low as 25%.

Fire Pump Controller Features:

- Large 7" color LCD touch screen
- Simultaneous display on Home screen for 3 phase amperage/voltage, system pressure, start pressure, stop pressure, system status, alarm status, date and time
- On-screen Icons for Pilot/Quick Start, System Set Points, User Settings, Data Log, Diagnostics, and others for ease of installation and data log/event history retrieval
- Conforms to requirements of NFPA 20, UL 218 and FM 1321/1323

Applications:

- Fire pump room

Parking & Exterior (Indoor)

Hubbell 50A Twist-Lock® Locking Devices

Hubbell's 50 amp Twist-Lock® devices features heavy-duty design built for heavy-duty applications. These Hubbell 50 amp Twist-Lock plugs and connector bodies are built to go where you need power, even in some of the harshest environments.

On the outside, 50 amp plugs and connectors are made of super tough nylon for better impact resistance. On the plug, the stainless steel shroud not only provides protection and durability, but safety as well. That's because the rigid construction restricts distortion, thus minimizing the possibility of mating incorrect devices.

On the inside are the kinds of features that separate Hubbell from all the rest. The cord grip has been designed with offset gripping jaws to securely hold the conductors — not just the cord jacket. Hubbell's box terminals speed wiring and provide a superior termination. The plug's thermoplastic polyester interior provides excellent heat resistance without compromising strength.

50 Amp Twist-Lock® Devices

Grounding & Bonding

Ground Conductor to Water Pipe, Pipe or Conduit

Type C- Cast Bronze Clamps For connecting grounding conductor to water pipe or copper tube. "D" indicates UL 467 Listed for direct burial in earth and concrete and are supplied with silicon bronze hardware.

Type GC-A ground clamps are UL Listed for use with either copper or aluminum conductors to copper water pipe, galvanized pipe, or steel conduit. All clamps are constructed from tin plated high-strength extruded aluminum alloy.

Type C

Type GC-A

Connector Features:

Type GC-A:

- Clamps are dual rated for both copper and aluminum conductors providing maximum flexibility of application
- All connectors are tin plated to provide low contact resistance and prevent galvanic corrosion
- All clamps are range taking; only 3 catalog number covers the complete range of applications from 1/2 to 4 inches

Applications:

- Pipe Grounding

Grounding & Bonding

Type GCS; The CONSTRUCTOR™

The Type GCS connector is used to ground cable to steel in applications where drilling is either not possible or unwanted. Installation of the Type GCS connector requires no power tools and is suitable for all applications particularly where power equipment of any kind is not allowed. The CONSTRUCTOR™ GCS series of ground connectors are cULus Listed for Grounding and Bonding.

The CONSTRUCTOR™ Features:

- cULus for Grounding and Bonding; Direct Burial rated for installation into earth and concrete
- Accepts beam thickness: .125-.625" (1/8 to 5/8")
- Conductor range from #6 to 2/0
- Versatile; allows parallel or perpendicular conductor orientation
- Stainless steel hardware
- 5/32" Allen cup point screw penetrates coatings on steel
- No special tooling required
- Applicable for use in "extremely volatile environments"

Applications:

- Healthcare
- Data Centers
- Telecommunications
- Renewable Energy
- Petrochem
- Utilities
- Industrial Manufacturing

Communications

Emergency Communication Station

GAI-TRONICS' Wall-Mount Stanchion provides a complete communications package in a self-contained, easy to install assembly (stanchion body, telephone, interior light kit and LED strobe all sold separately). The aluminum stanchion body resists corrosion and is painted safety yellow for ease of location. The blue strobe is bright enough to see during daylight hours. Custom colors and graphics available.

Model #398-001
Emergency Telephone

Model #234WM-202
Wall-Mount Stanchion

Model #540-001
LED Strobe

Emergency Communication Station Features:

- Wall-Mount Stanchion, aluminum, yellow, powder epoxy paint, EMERGENCY graphics (model #234WM-202)
- RED ALERT Emergency Telephone, help, autodial push button, call push button with keypad (model # 398-001)
- LED blue strobe with constant-on feature (model #540-001)
- Interior Lighting Kit (model #203-003)

Applications:

- Medical grounds
- Parking garages

Weatherproof Electrical Box

1-gang Weatherproof Electrical Box features 3 threaded 1/2" outlets

Weatherproof Electrical Box Features:

- Rugged die-cast aluminum construction
- Powder coat finish for maximum weatherability and scratch resistance
- Eight box mounting options with detachable lugs
- Includes two 1/2" closure plugs
- NEMA compliant internal hub threads accept all threaded fittings and threaded conduit
- Ground screw installed

Applications:

- Building exteriors
- Rooftop
- Parking

600 Series Trench Drain

Polycast drains offer a high degree of chemical resistance and have a water absorption value of less than one percent (ASTM C140). Made of a high strength, chemical resistant, composite material.

Polycast Polymer Concrete is more than four times stronger than ordinary Portland Cement Concrete, simplifies installation and lowers overall costs. Ideal for indoor and outdoor applications. Rapid drainage and durability. Resistant to freeze/thaw cycles (ASTM C666). Offers superior versatility with 24" and 48" components.

600 Series Trench Drain Features:

- Variable 9–14" bolt circle
- 4 slots, 1" diameter x 4" long
- 6-5/8" OD x 60" long
- 1" thick x 12" square base plate, variable circle
- Hardware included

Applications:

- Healthcare
- Parking decks
- Vehicle maintenance

Enclosures & Boxes

MX7200 2-gang In-Use Weatherproof Cover

TayMac Jumbo 2-Gang EXTRA DUTY Weatherproof In-Use Cover is designed to provide weatherproof protection while an outlet is in-use.

MX7200 Features:

- Heavy duty die-cast metal construction with premium powder coat finish
- Quick-Fit keyhole mounting system allows installation in under a minute
- Universal Fit Adapter System Technology (U-Fast) for 55-in-1 custom device configurations
- Comes pre-configured for GFCI
- Includes attached gasket and mounting hardware
- Jumbo size, 5-1/8" deep
- Lockable tab
- Extra Duty rated
- Vertical mount

Applications:

- Building exteriors
- Rooftop
- Parking

NEMA 4X JIC Continuous Hinge Electrical Enclosure

Wiegmann NEMA 4X JIC Continuous Hinge Quarter Turn 12X12X6 304 Stainless Steel.

The Ultimate Mini-Max series enclosures are designed to house and protect electrical and electronic components in harsh, dirty environments. Streamlined styling, quarter-turn latch, and attractive durable finish complement any high tech electronic equipment.

NEMA 4X JIC Enclosure Features:

- 1/4 turn style JIC enclosure makes for easy door seal
- Eliminates the need for exterior clips to secure door shut
- 1/4 turn latch is interchangeable with many locking designs available to better suit the customer
- FTC flange around the entire door opening to channel liquids away
- Available in light grained finish 304 or 316 stainless steel

Applications:

- Medical grounds
- Parking garages
- Food services

Electric Vehicle (EV)
Charging Station

With a variety of features that offer fast, easy, and convenient charging, Hubbell's Electric Vehicle Charging Station complies with all industry standards for electric vehicle supply equipment (EVSE), meets all safety requirements, and is compatible with all major auto manufacturers' electric vehicles with standard SAE J1772™ electrical connectors.

The charging station features a ground monitor interrupter circuit and overtemperature protection — both important safety features that disable electric vehicle charging in the event of loss of ground or an over-temperature condition. A time-delay feature allows users to delay charge times to take advantage of economical charging rates.

Constructed of durable cast aluminum with a water-resistant enclosure, Hubbell's 30A Electric Vehicle Charging Station is ideal for indoor or outdoor use. Its compact size allows for hassle-free installation in small spaces.

Electric Vehicle (EV) Charging Station

Description	Catalog Number
EV Charging Station, 208–240V AC, 7.2 kW output, 20 ft. charging cable	HBLEV30B
EV Charging Station, 208–240V AC, 7.2 kW output, 20 ft. charging cable, hardwired	HBLEV30BHW

Parking & Exterior (Outdoor)

Emergency Tower Communication Station

GAI-TRONICS' RED ALERT Tower provides a complete emergency communications station (RED ALERT tower, telephone, and LED strobe all sold separately). The tower is powder-coated with an epoxy finish to withstand harsh environments. The tower stands over nine feet tall with large EMERGENCY graphics on all four sides.

Model #398-001
Emergency Telephone

Model #234
RED ALERT Tower

Model #540-001
LED Strobe

Emergency Tower Station Features:

- RED ALERT Tower, architectural bronze, and safety blue standard colors (model #234)
- RED ALERT Emergency Telephone, help, autodial push button, call push button with keypad (model # 398-001)
- LED blue strobe with constant-on feature (model #540-001)

Applications:

- Medical grounds
- College campuses
- Parking garages
- Shopping malls
- Sports arenas
- Amusement parks

HUBBCOM™ Remote

The HUBBCOM Remote IP device is featured as a door or gate entry device, providing the convenience of card entry with the ability to connect to a live attendant for entry. In addition as a remote monitoring station, HUBBCOM Remote provides clear video from its HD, ONVIF-compatible camera and audio from a built-in microphone. The HUBBCOM™ Remote also gives you the option of making an announcement through the unit's integral speaker.

HUBBCOM Remote Features:

- Point-to-point serverless audio and one-way video
- SIP telephone access
- Card access control (RFID or NFC)
- Vertical wide-angle HD camera
- Integral 2W speaker

Applications:

- Medical grounds
- College campuses
- Parking garages

Fence Post Connectors

Burndy® mechanical grounding connectors for fence posts and fence mesh. Easy, fast installation for all grounding and bonding applications.

Fence Post Connector Features:

- Range taking
- No special tooling required
- Secure connections using bolts or other hardware
- Meets UL467 for Ground and Bonding applications"

Applications:

- Parking exterior

Insulated Secondary Pedestal Connectors

CMC's Insulated Secondary Connectors dual rated for aluminum or copper conductors.

Clear plated for low-contact resistance. Dual-rated for aluminum or copper conductors.

Secondary Pedestal Connector Features:

- Connector fabricated from 6061-T6 aluminum alloy for conductivity and strength
- Supplied with radial-tipped set-screws
- Includes CO-OX oxide inhibitor in all conductor holes
- Each unit is individually wrapped and labeled for ease of identification and cleanliness
- Fully tested to ANSI C119.4 for Class 'A' connectors

Applications:

- Electrical power distribution
- Electrical connections
- Electrical splices
- Electrical taps

Streetlight Connector

The DSR-K product is a hinged, single piece clamshell housing, each side filled with pre-cured insulating material and a 6061-T6 aluminum alloy connector.

Simple to use — install the conductors in the connector, position the connector in the cover and close the cover.

Streetlight Connector Features:

- The housing provides physical protection to the insulating material and provides compression that is essential for the sealing properties
- Fully tested to ANSI C119.4 for Class 'A' connectors

Applications:

- Streetlights
- Area and site

Stud-Mount Transformer Connectors

CMC NSA uni-joint dual rated connectors for aluminum or copper conductors.

Clear plated for low-contact resistance.

Transformer Connectors Features:

- Hinged, single piece clamshell housing, each side filled with pre-cured insulating material
- Fabricated from 6061-T6 aluminum alloy
- Housing provides physical protection to the insulating material and provides compression that is essential for the sealing properties
- Clear plated for low-contact resistance
- Fully tested to ANSI C119.4 and C119.1 and Western Underground Guide 2.5

Applications:

- Electrical transformers

Grounding & Bonding

Burndy Compression Grounding System

BURNDY® HYGROUND® is an irreversible compression ground system which meets the most stringent safety and performance requirements, including those of OSHA and nuclear power plant design. Performance excellence and long life expectancy are the system's basic design guidelines. It is a complete system which consists of connectors for grid cross connections, taps, splices, cable to ground rod, ground plates and terminations.

The compression made by the BURNDY® HYGROUND® tool and die combination also embosses an identification code on the installed connector.

Compression Grounding System Features:

- A range-taking tool and die design minimizes inventory and provides for multiple connector combinations
- Pre-crimp dies for ground rod connectors add mechanical strength to help the connectors withstand power installation and maintain IEEE and UL performance
- All compression elements are made of pure wrought copper—the same material as the conductor
- The heavy-duty connector design carries the equivalent or greater current-carrying capacity of the conductor

Applications:

- Healthcare
- Data centers
- Telecommunications
- Renewable energy
- Petrochem
- Utilities
- Industrial manufacturing

Mechanical Equipment Grounding

BURNDY® mechanical grounding lugs can be used to adequately ground equipment. All Burndy mechanical grounding connectors have been designed for easy installation and for outstanding durability. Only the finest high copper alloys are used in their manufacture, ensuring top performance under the most extreme environmental conditions.

KCKF

CL

Ground Conductor to Water Pipe, Pipe or Conduit

Type C- Cast Bronze Clamps For connecting grounding conductor to water pipe or copper tube. "D" indicates UL 467 Listed for direct burial in earth and concrete and are supplied with silicon bronze hardware.

Type GC-A ground clamps are UL Listed for use with either copper or aluminum conductors to copper water pipe, galvanized pipe, or steel conduit. All clamps are constructed from tin plated high-strength extruded aluminum alloy.

Type C

Type GC-A

Connector Features:

Type GC-A:

- Clamps are dual rated for both copper and aluminum conductors providing maximum flexibility of application
- All connectors are tin plated to provide low contact resistance and prevent galvanic corrosion
- All clamps are range taking; only 3 catalog number covers the complete range of applications from 1/2 to 4 inches

Applications:

- Pipe Grounding

Type GCS; The CONSTRICTOR™

The Type GCS connector is used to ground cable to steel in applications where drilling is either not possible or unwanted. Installation of the Type GCS connector requires no power tools and is suitable for all applications particularly where power equipment of any kind is not allowed. The CONSTRICTOR™ GCS series of ground connectors are cULus Listed for Grounding and Bonding.

The CONSTRICTOR™ Features:

- cULus for Grounding and Bonding; Direct Burial rated for installation into earth and concrete
- Accepts beam thickness: .125-.625" (1/8 to 5/8")
- Conductor range from #6 to 2/0
- Versatile; allows parallel or perpendicular conductor orientation
- Stainless steel hardware
- 5/32" Allen cup point screw penetrates coatings on steel
- No special tooling required
- Applicable for use in "extremely volatile environments"

Applications:

- Healthcare
- Data Centers
- Telecommunications
- Renewable Energy
- Petrochem
- Utilities
- Industrial Manufacturing

Grounding & Bonding

Type SSBC Submersible Pedestal Connectors

Rubber Insulated Submersible Secondary Connectors, Standard spacing, Dual rated connectors for Aluminum or Copper conductors. Each submersible connector we ship is individually packaged and spark tested to ensure reliability. These insulated connectors are approved for submersible and direct-burial designs for use below grade.

Pedestal Connectors Features:

- Clear plated for low-contact resistance
- Meets the performance requirements of ANSI C119.1, ANSI C119.4 and Western Underground Committee Guide 2.5
- Supplied with aluminum set-screws
- Includes silicone grease and CO-OX oxide inhibitor
- Connector fabricated from 6061-T6 aluminum alloy for conductivity and strength
- Each unit individually wrapped and labeled for ease of identification and cleanliness

Applications:

- Underground

Enclosures & Boxes

Weatherproof Electrical Box

1-gang Weatherproof Electrical Box features 3 threaded 1/2" outlets

Weatherproof Electrical Box Features:

- Rugged die-cast aluminum construction
- Powder coat finish for maximum weatherability and scratch resistance
- Eight box mounting options with detachable lugs
- Includes two 1/2" closure plugs
- NEMA compliant internal hub threads accept all threaded fittings and threaded conduit
- Ground screw installed

Applications:

- Building exteriors
- Rooftop
- Parking

Pad Mounted Termination Enclosures

CMC pad mounted termination enclosures Provides a safe and convenient primary cable terminating, sectionalizing, tapping, and switching point for underground distribution systems.

Aluminum mechanical bar connector eliminates compression tools, lugs and bolt assemblies. Aluminum enclosure is lightweight, low maintenance and has excellent corrosion resistance. Ample working space, allowing for easier termination with a removable swinging door.

**CONNECTOR
MANUFACTURING
COMPANY**

Termination Enclosure Features:

- Heavy-Duty channelized construction
- Standard cabinet is fabricated from 14 gauge galvanized steel
- Also available in stainless steel or aluminum (contact rep)
- Heavy duty wind locks are standard on all models
- Custom sizes and special junction mounting brackets available
- Stainless steel hinge barrels, pins, padlock hasp, and exterior hardware
- Ground nut provision for each phase. Units shipped completely assembled (except Junctions)

Applications:

- Electrical power distribution
- Medical campuses
- Commercial facilities
- Solar applications

Above Ground Enclosures

Outdoor above ground backflow device enclosures in aluminum, fiberglass and HDPE which provide protection for outdoor infrastructure and piping systems.

Above Ground Enclosure Features:

- High quality, customizable options for all backflow applications
- Superior insulation aids in protection from outside temperatures
- Corrosion & scratch resistant external materials
- Quick and easy installation whether pre-assembled or modular
- Multiple material types; aluminum, fiberglass and HPDE
- Various options and added accessories for easy customization
- ASSE 1060 certified

Applications:

- Parking and exterior/perimeter of facility

Enclosures & Boxes

Below Ground Enclosures

Polymer concrete boxes positioned below grade, covers positioned at grade to house and protect utility components such as electrical, communications and water.

Below Ground Enclosure Features:

- High strength and durable
- Lighter weight than standard concrete
- Stable under freeze/thaw conditions
- Non-conductive and nonflammable
- Impact resistant
- UL listed and ASNI/SCTE 77 tier rated
- Multiple styles and sizes to meet vast application needs

Applications:

- Parking and exterior/perimeter of facility

MX3200 1-gang In-Use Weatherproof Cover

TayMac 1-Gang EXTRA DUTY Vertical Weatherproof In-Use Cover is designed to provide weatherproof protection while an outlet is in-use.

MX3200 Features:

- Heavy duty die-cast metal construction with premium powder coat finish
- Quick-Fit keyhole mounting system allows installation in under a minute
- Universal Fit Adapter System Technology (U-Fast) for 8-in-1 custom device configurations
- Comes pre-configured for GFCI
- Includes attached gasket and mounting hardware
- 3-1/8" deep
- Lockable tab
- Extra Duty rated
- Vertical mount

Applications:

- Building exteriors
- Rooftop
- Parking

**ML500 Expandable 1-gang
In-Use Weatherproof
Cover**

TayMac 1-Gang EXTRA DUTY Expandable Weatherproof In-Use Cover is designed to provide weatherproof protection while an outlet is in-use and stay out of the way when not in-use.

ML500 Features:

- Revolutionary design expands from 1" to 3" for In-Use needs
- Ultra-rugged polycarbonate & synthetic neoprene rubber that will not dry rot, crack or deteriorate in sunlight
- Quick-Fit keyhole mounting system allows installation under a minute
- Universal Fit Adapter System Technology (U-Fast) for 16-in-1 custom device configurations, comes pre-configured for GFCI
- NEMA 3R compliant

Applications:

- Building exteriors
- Rooftop
- Parking

Instant Bollard Foundation

Chance Instant Foundation Solutions bollard foundation offers immediate loading—no wait time for concrete to cure. Remove and reuse the foundation. Simply reverse the motor to back out. Designed and engineered in the USA. Quick and easy installation using standard hydraulic equipment. Installs in most weather conditions, even below freezing. No excavation or spoil removal. Commonly installed in 10 minutes with a two-man crew.

Instant Bollard Foundation Features:

- Variable 4–8" bolt circle
- 4 slots, 1/2" diameter x 2-1/4" long
- 2-3/8" OD x 36" long
- 1/2" thick x 7" square base plate, variable circle
- Hardware included

Applications:

- Parking
- Exterior

Instant Streetlight
Foundation

Chance Instant Foundation Solutions streetlight foundation offers immediate loading—no wait for concrete to cure. Remove and reuse the foundation. Simply reverse the motor to back out. Designed and engineered in the USA. Quick and easy installation using standard hydraulic equipment. Installs in most weather conditions, even below freezing. No excavation or spoil removal. Commonly installed in 10 minutes with a two-man crew.

Instant Streetlight Foundation Features:

- Variable 9–14" bolt circle
- 4 slots, 1" diameter x 4" long
- 6-5/8" OD x 60" long
- 1" thick x 12" square base plate, variable circle
- Hardware included

Applications:

- Parking
- Exterior

Hubbell Advantage™ Series Pin and Sleeve Device

Hubbell's Advantage Series Pin and Sleeve devices provide safe, dependable electrical performance in a variety of environments.

Hubbell combined the advantages of their top performing IEC pin and sleeve with the capabilities of a UL 2682 switch-rated device. Hubbell's standard industrial pin and sleeve is HP rated and recognized as a disconnecting means. The Advantage Series provides the only Switch-Rated IEC Pin and Sleeve Devices in the market. By working with existing installed IEC 60309-2 pin and sleep plug and inlet bases, customers save both time and money.

The Advantage Series are UL witnesses IP69K and UL Type 4X and 12 devices. They are designed for use in harsh environments — the devices offer protection against water and dust, even during times of high water flow or in areas the excessive amounts of dust.

Ergonomic Design
The easy-to-use leverage grip design from Hubbell puts the Advantage into the palm of your hands.

30A Advantage Series Switched P&S

*Mating plug required to maintain 4X/IP69K ratings. HP Ratings when used with Advantage Series connections. Additional devices available.

Enclosures & Boxes

Circuit-Lock Fused Disconnect Switches

When it comes to safely shutting down power, nothing performs like Hubbell Circuit-Lock. Required by the NEC® within line of sight of all motor controllers and power driven equipment, Hubbell Circuit-Lock Disconnect Switches feature a highly-visible red handle that can be locked in the off position to comply with OSHA lockout-tagout requirements. Housed in a corrosion and impact-resistant Type 4X enclosure with a watertight neoprene gasket, Hubbell Circuit-Lock Disconnect Switches are UL listed as both a motor controller and disconnect for maximum value. Circuit-Lock Disconnect Switches are available in 30, 60 and 100 Amp 600-Volt AC ratings with available auxiliary contacts for various control applications.

30 and 60 Amp Fused Disconnect Switches

Description	Catalog Number
30A Circuit-Lock fused disconnect switch.	FDS30
60A Circuit-Lock fused disconnect switch.	FDS60

Auxiliary Contacts

Description	Catalog Number
Auxiliary contact, normally open, A600 pilot duty.	ACFSNO
Auxiliary contact, normally closed, A600 pilot duty.	ACFSNC

WEEB® Washer

WEEB is inserted between the module frame and mounting structure, the teeth of the WEEB pierce the anodized coating. The result is excellent conductivity without oxidation — bonding the PV module frame with the metal racking structure. Essentially, the module and rail become one singular piece of metal, creating an electrical path to the ground.

WEEB® washers eliminate the need for older, more expensive grounding methods while also significantly reducing the amount of labor and materials used in installations.

WEEB Washer Features:

- ETL Listed to ANSI/UL 467
- UL Recognized to UL 2703
- CSA Certified to C22.2 No. 41
- Corrosion-resistant 304 stainless-steel construction
- Reliability for use throughout the lifetime of the PV system
- Rated for outdoor use
- Multiuse

Applications:

- Exterior

WEEB® Grounding Lug

The WEEB® Grounding Lug is constructed of corrosion resistant, tin-plated copper, the Wiley line of grounding lugs are high quality solutions for your solar PV system. The tin-plated lug assures minimum contact resistance and protection against corrosion. The low profile of the grounding lug allows it to be installed in a variety of positions with one solid or stranded copper wire (14 AWG to 6 AWG), or two copper wires (12 AWG to 10 AWG). Copper wire is secured by a 1/4-28 stainless steel screw, which is horizontal to the tang. This allows for easy access when mounted under a PV module. The result is a continuous ground on all solar applications.

Grounding Lug Features:

- Made of corrosion-resistant, tin-plated copper
- Design ensures a quick and easy installation
- No surface preparation required on the rail or module
- Reliability for use throughout the lifetime of the PV system
- UL 2703 Listed
- ETL Listed to ANSI/UL 467
- CSA Certified to C22.2 No. 41

Applications:

- Solar PV System

WEEB® Bonding Jumper

The WEEB® Bonding Jumper is constructed of corrosion resistant, tin-plated, braided copper, the Wiley line of bonding jumpers are high quality solutions for your solar PV system. The WEEB® Bonding Jumper is used to create an electrical connection between two pieces of anodized aluminum or any electrically conductive metal. This maintains electrical continuity over long spans or air gaps between metal structures.

wiley

WEEB® Bonding Jumper Features:

- Equivalent to 6AWG
- In-stock standard lengths from 6" to 36"
- 10, 8 and 4 AWG options available
- UL 2703 Listed
- ETL Listed to ANSI/UL 467
- CSA Certified to C22.2 No. 41

Applications:

- Solar PV System

ACE Conduit Entry Box

The ACE Conduit Entry Box makes quick and simple transitions from USE-2 or PV array wire to conduit protected THWN-2 wire. The box features a compact two-piece UV resistant, NEMA 3R rated enclosure that allows ample wiring space and is compatible with any conduit type.

wiley

ACE Conduit Entry Box Features:

- Convenient side and bottom conduit drill-out for easy conduit routing
- Choice of pass-through or combiner box with bracket
- Compatible with any conduit type
- Preassembled for quick and easy installation
- UL 1741 Listed
- 1000V DC rating

Applications:

- Solar PV System

Solar Module Cable Clips

Engineered for high quality wire management solutions, Wiley Cable Clips simplify wire management and create a cleaner aesthetic to solar PV arrays. The clips are made of corrosion resistant stainless steel, which makes them a durable, long lasting and reliable solution for all environments, and are designed with coined edges to prevent damage to cable insulation.

Solar Module Cable Clips Features:

- Accommodation for a broad range of cable combinations and sizes (e.g., USE-2, PV, AC module and micro inverter cables)
- Compatible on modules with a flange thickness range of 1.3 to 2.5mm
- No tools required for installation
- Multiuse capabilities
- Coined edges to prevent damage to cable insulation
- Reliability for use throughout the lifetime of the PV system
- UL 1565 Listed

Applications:

- Solar PV System

Solar Mid-Clamp

The universal mid-clamp and adjustable end clamp designs accommodate various module thicknesses. Plus, the Wiley Mid-Clamp uses proven WEEB® technology for integrated bonding as well as a quick and easy installation.

Solar Mid-Clamp Features:

- Low profile design
- Increased inspectability
- Available in mill finish, or black or clear anodizing
- Custom designs and finishes available upon request
- Reliability for use throughout the lifetime of the PV system
- ETL Listed to ANSI/UL 467
- UL Recognized to UL 2703

Applications:

- Solar PV system

Insulated Bundle Strap

The Wiley reusable insulated bundle straps protect cables from vibration and insulation damage. Use for bundling PV wire, Micro Inverter Trunk or AC cable - 2" bundle diameter. Made with vinyl coated steel.

wiley

Insulated Bundle Strap Features:

- UV resistant vinyl, zinc plated steel
- Reusable coated bundle strap
- -40°C to 85°C
- 50 lb tensile strength

Applications:

- Solar PV system

Mechanical Equipment Grounding

BURNDY® mechanical grounding lugs can be used to adequately ground equipment. All Burndy mechanical grounding connectors have been designed for easy installation and for outstanding durability. Only the finest high copper alloys are used in their manufacture, ensuring top performance under the most extreme environmental conditions.

 **BURNDY®**

KCKF

GKA

KPB

Mechanical Equipment Grounding Features:

- UL 467 Listed for direct burial applications in earth or concrete

Applications:

- Equipment Grounding

NEMA 4X JIC Continuous Hinge Electrical Enclosure

Wiegmann NEMA 4X JIC Continuous Hinge Quarter Turn 12X12X6 304 Stainless Steel.

The Ultimate Mini-Max series enclosures are designed to house and protect electrical and electronic components in harsh, dirty environments. Streamlined styling, quarter-turn latch, and attractive durable finish complement any high tech electronic equipment.

NEMA 4X JIC Enclosure Features:

- 1/4 turn style JIC enclosure makes for easy door seal
- Eliminates the need for exterior clips to secure door shut
- 1/4 turn latch is interchangeable with many locking designs available to better suit the customer
- FTC flange around the entire door opening to channel liquids away
- Available in light grained finish 304 or 316 stainless steel

Applications:

- Medical grounds
- Parking garages
- Food services
