OFWIPES90	FIBER,WIPES,LINT-FREE,4X2,90SH,ROLL

Sticklers® CleanWipes™ fiber optic cleaning wipes are high quality optical grade wipes engineered for cleaning fiber prior to splicing, or for cleaning fiber optic jumpers and connector plugs. These wipes make cleaning virtually any kind of connector fast, reliable and affordable. They are engineered to be used with the Sticklers Fiber Optic Splice & Connector Cleaner fluid (#MCC-POC03M) for perfect cleaning results.

The wipes are a static dissipating high modulus fabric that resists shredding even when cleaning LC connectors. Using the patent pending Sticklers CleanSwipe slots they quickly lift away fingerprints, oils, grime, polishing compound, dust and lint. Multifunctional, they are ideal for cleaning bare fiber and fiber optic connector end-faces, as well as lenses, mirrors, diffraction gratings, prisms and test equipment.

The Sticklers CleanWipes fiber optic cleaning wipes are offered in two package sizes with the larger size perfect for high-volume, high-speed cleaning required by OEMs making patch cords and jumpers. The smaller size fits in tool kits for the "go anywhere, clean anything" demands of field service applications.

Experts recommend each connector and every splice be cleaned during installation, maintenance and reconfiguration. (This is true even if a jumper is factory-new.) The Sticklers CleanWipes fiber optic cleaning wipes are your key to fast reliable and low cost cleaning when you need perfectly clean splices & connectors®.

- CleanSwipe™ slots for fast, perfect cleans
- CleanSwipe™ slots are "color clean" coded for usage control
- Super Simple - Super Fast - Super Value
- No touch, No rip, No shredding
- High modulus wipes won't scratch end-faces
- Exclusive static dissipating cleaning surface eliminates static and re-cleaning

"Color Clean" coded CleanSwipe slots for fast, perfectly clean results.

NOTES:

1. KIT SHOULD CONTAIN:

(1) CLEAN WIPES CONTAINER

2. SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE.

OFWIPES400

STICKLERS™ BENCHTOP CLEANWIPES™

- Optical-Grade Lint-Free Wipe for Cleaning Fiber Optic Connectors, or Bare Fiber Before Splicing
- Far Stronger than Traditional Wipes, for Better Cleaning
- No Glues, Bleach or Cellulose to Degrade End-Faces
- Makes "Wet/Dry" Cleaning Easy
- Highly Cost-Effective

Packaging

Each mini-tub contains 100 pre-rolled lint-free wipes, each wipe being 4" x 2" (10 cm x 5 cm). Normally each wipe is used 2-4 times before disposal. There are 24 mini-tubs per case, for a total of 2,400 wipes per case. Each mini-tub is approx. 2" in diameter and 2" tall (5 cm x 5 cm). Unlimited shelf life. 12-month warranty.

Sticklers™ Benchtop CleanWipes™ are high quality, lint-free wipes engineered for cleaning bare fiber before splicing and for cleaning jumpers and other male connectors used in fiber optic networks. These wipes have exactly the right absorbency, quality and packaging to make cleaning fast, reliable and affordable. They are engineered to be used with the Sticklers™ Fiber Optic Splice & Connector Cleaner for the best possible cleaning results.

The wipes are made from soft, hydroentangled polyester fabric, made without troublesome glues or cellulose which can leave residues on end-faces. The strong fabric resists shredding even when cleaning LC connectors. These wipes lift away fingerprint oils, grime, dust and lint. This makes them ideal for cleaning bare fiber or fiber optic connector end-faces, plus lenses, mirrors, diffraction gratings, prisms and test equipment.

The packaging has been designed to make cleaning easier for technicians. The handy mini-tub is rugged and spill-proof. Each wipe is protected with a plastic over-wrap which keeps fingerprints and moisture off the wipes. The unique "Drop-n-Stop™" packaging keeps the tub from rolling when dropped, and is far more cost-effective than comparable "cartridge-style" cleaning devices.

In summary, each connector and every splice must be cleaned during installation, maintenance and reconfiguration. (This is true even if a jumper is new, right out of the bag.) Most experts recommend cleaning with a damp wipe, as shown in the photo, for best results. To implement this "wet-dry" cleaning, nothing beats the combination of Sticklers™ Benchtop CleanWipes™ and the Fiber Optic Splice and Connector Cleaner fluid.

Below are microphotographs of fiber optic end-faces. Every tech should always be equipped with an inspection scope to ensure connectors are clean. Left to right: a connector carrying a piece of cotton fiber from clothing; fingerprints oils; results of using a clean connector with the oily connector to its left; and a clean connector which will transmit data perfectly. Enlarged approx. 200x.
