Wiley Twist Strap

WTS Introduction

The innovative Wiley Twist Strap (WTS) provides a quick, dependable wire management solution. As easy to use as a cable tie, while offering the durability of a bundle strap.

NO tools are required—the WTS makes securing, readjusting, and removing fast and effortless. To use, just insert the stem into the twisted eye loop and fold over. Reusable. Saves both material and labor costs!

Available in a variety of lengths, use the WTS to secure wires almost anywhere on a PV system, including around the torque tube.

Description

The corrosion-resistant 300 series stainless steel wire core is coated with UV-resistant PVC. The round geometry eliminates the risk of sharp edges cutting into PV cable jackets.

Benefits and Features

- Long-lasting, labor-saving wire management solution
- Round design protects cable insulation from damage
- No tools necessary for installation or removal
- Reusable / Repositionable
- Tensile strength up to 40 lbs
- Available sizes range from 8” to 36”
- Custom lengths available
- UL62275 pending

A proud member of the Hubbell family.
