

## WCHJ-30HH

Span the NexTracker /  
First Solar FS7 Module Gap

### BHA Jumper Hanger

Protect your First Solar FS7 PV module wires from potential snag and drag on the NexTracker bearing house during rotation. Wiley's WCHJ-30HH 300 series stainless steel hanger is designed specifically to insert and stay secure in FS7's wire management holes. It provides just enough slack to support the module's lead wire connection in place. Approved by First Solar and NexTracker.

Also available in galvanized steel.

Material Number	Product Name	Material
50140066	WCHJ-30HH	300 series stainless steel
50141114	WCHJ-30HHGS	galvanized steel
