The LightOWL Dual Technology Passive Infrared and Acoustic Sensor combines passive infrared (PIR) and acoustic (sound-activated) technologies to turn lighting on and off based on occupancy. This sensor features Hubbell Controls’ patented IntelliDAPT® technology, which makes all the sensor adjustments automatically.

Throughout the product’s lifespan, IntelliDAPT software analyzes the controlled area and makes digital adjustments to sensitivity and timer settings. Occupancy sensors with IntelliDAPT technology provide a maintenance-free install-and-forget operation.
