The NX Room Controller is a self contained intelligent device that provides standalone room level control. It contains either one or two independently controlled relays. Dimming versions are available that provide one or two 0-10VDC control signal outputs for full range control of dimmable ballasts and LED drivers. The NX Room Controller features SmartPORT™ technology allows auto configuration of occupancy sensors and manual control switches. When devices are plugged into the SmartPORT, the room controller automatically and intelligently responds to the devices to provide the most energy efficient operation.

A free App, available for iOS® or Android™ users, provides a simple but flexible user interface for a variety of room parameters. The App works in conjunction with an optional Bluetooth® radio module connected to a RJ45 port on a device in the room. The optional NXHNB2 Network Adaptor allows additional functions to be accessed via the HubbNET™ network. These include the ability to download schedules for autonomous time based control.

Product Features
- Single or dual relay versions for On/Off
- Zero-cross switching technology extends relay contact life
- Suitable for use with controlled receptacles
- Optional full range dimming control
- Override push button and status LED per relay/dimmer
- Auto configuration support for NX Occupancy Sensors, Daylight Sensors and Smart Switch Stations
- Advanced configuration with NXBTR Bluetooth® Radio Module and smart phone App
- Device intelligently and automatically responds to sensors and switches in the most energy-efficient manner
- Join NX Room Controllers with CAT5 for additional loads
- Schedules are held in the devices themselves (requires optional network connection or NXBTC Bluetooth Radio Module with real time clock)
- Retains data during power outages
- Five-year limited warranty
- 120/277/347VAC universal voltage
- Delivers simplified configuration and control of Hubbell Lighting luminaires using SpectraSync™ color tuning technology
