

## Bundling Link

By ANDERSON  
Catalog # [BLVE5](#)

Type BLV yoke assemblies are used to vertically bundle conductors on new or rebuilt lines. Consequently, information as to conductor size, conductor spacing, ultimate strengths, and existing clamp details must be given at time of ordering. BLV yoke assemblies are designed for use with Fargo® HCSA suspension clamps. The HPS Bundling Links Vertical (BLV) yoke assembly are used for vertical bundling Fargo® Helical Cushion Suspension-clamp Assembly (HCSA) suspension clamps. The BLV yoke assembly includes two forged steel eye-eye links, hex bolt, flat washer, lock washer, hex nut, and stainless steel cotter key. For use with conductor range 0.908 - 1.005 inches.
