TMA (Telephone Management Application) Package (VoIP) SMART Software Kit UK

By Austdac
Catalog # 100-02-0309-003

TMA - Telephone Management Application is a Windows® based software package that allows you to remotely monitor the health status of your SMART VoIP GAI-TRONICS telephones, program their functions and log and report on their stats - all over a standard telephone line. These features ensure that your phones remain operational with minimal manpower.
