

# TMA (Telephone Management Application) Package (Analogue, VoIP & GSM) SMART Software Kit Euro

By Austdac  
Catalog # 100-02-0309-006

TMA - Telephone Management Application is a Windows® based software package that allows you to remotely monitor the health status of your (Analogue, VoIP & GSM) SMART GAI-TRONICS telephones, program their functions and log and report on their stats - all over a standard telephone line. These features ensure that your phones remain operational with minimal manpower.

## Features

- Ensure your phones are operational
- Streamline manpower
- View at a glance status information
- Plan maintenance and repair work
- Generate automatic reports
- Establish comprehensive database

## General

Catalog Number	100-02-0309-006
Connectivity Options	(SMART) Analogue, VoIP & GSM

## Product Assets
