

Tower Broadcast Paging Module (Hardwired 600-ohm input and/or UHF radio receiver input)

By Austdac
Catalog # 10458-103

Our broadcast paging module is the heart of each GAI-TRONICS' Tower Broadcast product. This series device receives the broadcast audio via 600 Ohm telephone pair, RF frequency, or both, and provides high-efficiency amplification for speaker broadcasts. **Note: The 10458-103 is ordered as part of a 234SBA Stanchion Broadcast Assembly or 234SBM Stanchion Broadcast Module. It should be ordered separately only for spare part purposes.**

General

Catalog Number	10458-103
Humidity	95% non-condensing
Temperature Range	-4° F to +140° F (-20° C to +60° C)

Dimensions

Height	7.63 in
Weight	3 lb
Width	4.5 in

Electrical Ratings

Operating Voltage	9-18 V dc, 12 V dc nominal
-------------------	----------------------------

Certifications And Compliance

Compliance	FCC Compliance: Part 90
------------	-------------------------
